

LABOR SITUATION

Office of Research Danté Bartolomeo, Commissioner

FOR IMMEDIATE RELEASE

June 2023 Data CT Unemployment Rate = 3.7% US Unemployment Rate = 3.6%

Connecticut June jobless rate (3.7%) stable at post-COVID lows; jobs down 4,600

WETHERSFIELD, July 20, 2023 – Connecticut nonfarm industry jobs decreased 4,600 (-0.3%) in June 2023 to a level of 1,687,200 while the state's unemployment rate remained steady at 3.7% (preliminary, seasonally adjusted data). Nonfarm payroll employment in the state is now 20,300 (1.2%) positions higher than the June 2022 level. The state has now recovered **96.4%** (278,800) of the 289,100 jobs lost during the March-April 2020 COVID lockdown. The May 2023 preliminary payroll gain of 5,000 positions was revised higher by 300 to a 5,300 (0.3%) job gain. June was the largest monthly statewide job loss since April 2020. Connecticut's unemployment rate held firm at 3.7% (at the COVID recovery lows) from the May 2023 level and is now lower by three-tenths of a percentage point from the 4.0% rate in June 2022. This release presents up-to-date labor statistics from two different monthly surveys (worksites and households) generated by the U.S. Bureau of Labor Statistics (BLS) in cooperation with the states.

"Even after the June decline, Connecticut has gained 14,100 so far in 2023, more jobs than added in the first six months of any pre-pandemic year since 2006," said Patrick Flaherty, Director of the Office of Research at the Connecticut Department of Labor. "Seasonal adjustment exaggerated May strength and is now exaggerating June weakness. Industries with the largest (seasonally adjusted) June losses had large May gains suggesting summer hiring took place earlier in 2023 than in previous years. The unemployment rate remains low and steady."

Connecticut's private sector employment (86.3% of total) declined by 5,300 (-0.4%) jobs in June 2023 to 1,455,700 but is still higher by 15,300 positions (1.1%) from the June 2022 level (1,440,400). The state's private sector is **98.1%** recovered from the April 2020 COVID employment low point. 5,100 more jobs are needed to reach February 2020 private sector levels. There was an upward revision to May's preliminary private sector job gain (4,800, 0.3%) to a 5,200 (0.4%) job increase. The **government** *supersector* was up by 700 (0.3%) to a level of 231,500 jobs. Aggregated government sector employment in the state is 5,000 positions (2.2%) above year-ago levels. The public sector is 77.5% recovered from the overall COVID April 2020 employment bottom. Connecticut's government *supersector* includes all civilian federal, state, local, and tribal government employment, including public education and Native American casino jobs located on federally recognized tribal reservations.

Three of the ten major industry *supersectors* added jobs in June 2023, while seven declined.

The three industry *supersectors* that increased employment in June 2023:

Increasing Sectors						
Industry Sector Amount of Percent June 20						
-	Increase	Change	Employment			
Construction & Mining	+1,000	1.7%	60,300			
Government	+700	0.3%	231,500			
Manufacturing	+400	0.3%	158,000			

The seven industry *supersectors* that decreased jobs in June 2023:

Decreasing Sectors							
Industry Sector	Amount of	Percent	June 2023				
-	Decrease	Change	Employment				
Other Services	-1,700	-2.7%	61,700				
Leisure & Hospitality	-1,700	-1.1%	154,700				
Information	-1,000	-3.1%	31,100				
Financial Activities	-900	-0.8%	114,400				
Education & Health Services	-700	-0.2%	350,800				
Trade, Transportation, & Utilities	-600	-0.2%	299,500				
Professional & Business Services	-100	-0.04%	225,200				

Connecticut Labor Market Areas (LMAs): Two of the six major Connecticut *LMAs* that are seasonally adjusted by the BLS posted nonfarm employment gains in June 2023, while the other four declined. Both the *Danbury LMA* (0.1%, 77,200) and the more seasonal southeastern *Norwich-New London-Westerly LMA* (0.1%, 125,800) disclosed small 100 position gains in June. The *New Haven LMA* (-0.8%, 300,400) had the largest decline (-2,400), while the *Hartford LMA* (-0.4%, 575,700) also posted a large job loss (-2,300). The *Bridgeport-Stamford-Norwalk LMA* (-0.4%, 406,000) also was down by 1,700 positions while the *Waterbury LMA* (-0.1%, 67,200) was only marginally lower (-100).

Note: The six major Connecticut LMAs are independently estimated from the statewide data by the BLS and cover around 90% of the nonfarm employment in the state. Thus, estimates will not exactly sum to the statewide total.

Hours and Earnings: The June 2023 **private sector** workweek, *not seasonally adjusted*, averaged 32.9 hours. This is lower by nine-tenths of an hour (-2.7%) than the June 2022 average of 33.8 hours. Average hourly earnings at \$35.16 last month, *not seasonally adjusted*, were up by \$1.08 (3.2% - beating inflation) from the June 2022 estimate of \$34.08. The accompanying June 2023 private sector weekly wage averaged \$1,156.76 – now higher by \$4.86 from a year ago (0.4%, \$1,151.90). The Consumer Price Index for All Urban Consumers (CPI-U, U.S. City Average, not seasonally adjusted) for June 2023 was up 3.0% from a year ago. *Current all-employee private sector hours and earnings estimates can be volatile due to fluctuating sample responses.*

<u>Labor Force Data (residential household survey)</u>

The preliminary June 2023 unemployment rate for Connecticut was estimated by the BLS Local Area Unemployment Statistics program (LAUS) to be **3.7%** (seasonally adjusted). This matches the new post COVID lockdown low achieved last month and is unchanged compared to the May 2023 level of 3.7%. The Connecticut unemployment rate was 4.0% in June 2022. The U.S. unemployment rate for June 2023 was tallied at 3.6%, down one-tenth of a percentage point from the May 2023 rate (3.7%) and equal to the U.S. jobless rate of 3.6% a year ago.

Average weekly initial unemployment claims for first-time filers (AWIC) in Connecticut in June 2023 were 7,738, *not seasonally adjusted.* The twelve-month moving average was 4,549 per week through June 2023, higher by 454 (11.1%) from the twelve months ending May 2023 and higher by 1,351 (42.2%) than the average weekly count of 3,198 for the twelve months ending in June 2022.

The nonfarm employment estimate, derived from a survey of businesses, is a measure of jobs in the state; the unemployment rate and labor force estimates are based on a household survey, and measure the work status of people who live in Connecticut. Overall, as the national and state economies recover, volatility in monthly numbers can be expected. Job and employment estimates are best understood in the context of their movement over several months rather than observed changes in a single month's value.

Next Connecticut Labor Situation release: Thursday, August 17, 2023 (Preliminary July 2023 data on the updated benchmark)

Starting with March, 2011, our monthly statewide and major LMA nonfarm job estimates have been taken over by the US Department of Labor Bureau of Labor Statistics. This is the final phase of transition in this program, which began in 2008. As a result of changes in the estimation procedures, you are likely to see more variability in month-to-month estimates of job counts. Caution should be used in interpreting any single month's estimate. The data are best interpreted to identify trends and cycles over several months and quarters. If you have any questions about these changes, please email us at: dol.lmi@ct.gov.
