FOR IMMEDIATE RELEASE

May 2023 Data

CT Unemployment Rate = 3.7%

US Unemployment Rate = 3.7%

Connecticut adds 5,000 jobs in May as state unemployment rate (3.7%) matches U.S.

WETHERSFIELD, June 15, 2023 – Connecticut nonfarm payroll jobs increased 5,000 (0.3%) in May 2023 to 1,691,500 and the state’s unemployment rate declined one-tenth of a percentage point to 3.7% (preliminary, seasonally adjusted data). Industry payroll employment in the state is 24,900 (1.5%) positions higher than the May 2022 level. The state has now recovered **97.9%** (283,100) of the 289,100 jobs lost during the March-April 2020 COVID lockdown. The April 2023 preliminary overall payroll decline of 900 positions was revised higher by 2,100 to a 1,200 (0.1%) job gain. Connecticut’s unemployment rate continued to tick lower to 3.7% (new COVID recovery low) from the April 2023 level (3.8%) and is now lower by four-tenths of a percentage point from the 4.1% rate in May 2022. This release presents current labor data from two monthly surveys (establishment and household) produced by the U.S. Bureau of Labor Statistics (BLS) in association with the states.

“Job growth averaged 3,680 per month during the first five months of 2023 with the unemployment rate back to the November 2019 level,” said Patrick Flaherty, Director of the Office of Research at the Connecticut Department of Labor. “We have seen job growth slow later in the year in recent years, and that may happen again in 2023. However, the labor market is strong as we approach the summer.”

Connecticut’s private sector employment increased by 4,800 (0.3%) jobs in May 2023 to 1,460,600 and is higher by 21,000 positions (1.5%) from the May 2022 level (1,439,600). The state’s private sector is **99.9%** recovered from the April 2020 COVID employment low point. Just 200 more jobs are needed to reach February 2020 private sector levels. May job gains were broad. In addition, there was an upward revision to April’s preliminary private sector job loss (-1,400, -0.1%) of 1,600 to a now slight 200 (0.01%) job gain. The **government supersector** was up by 200 (0.1%) to a level of 230,900 jobs. Combined government employment in the state is 3,900 positions (1.7%) above year-ago levels. The public sector is 74.9% recovered from the overall COVID April 2020 employment trough. Connecticut’s government *supersector* includes all civilian federal, state, local, and tribal government employment, including public education and Native American casino jobs located on federally recognized tribal reservations.

Eight of the ten major industry *supersectors* increased jobs in May 2023, and two declined.

The eight industry *supersectors* that increased employment in May 2023 (below)

Increasing Sectors			
Industry Sector	Amount of Increase	Percent Change	May 2023 Employment
Leisure & Hospitality	+2,600	1.7%	156,700
Trade, Transportation, & Utilities	+1,700	0.6%	300,500
Other Services	+1,100	1.8%	63,400
Information	+400	1.3%	31,900
Manufacturing	+200	0.1%	157,700
Government	+200	0.1%	230,900
Financial Activities	+100	0.1%	114,900
Professional & Business Services	+100	0.04%	224,600

The two industry *supersectors* that decreased jobs in May 2023 (below)

Decreasing Sectors			
Industry Sector	Amount of Decrease	Percent Change	May 2023 Employment
Education & Health Services	-1,200	-0.3%	351,200
Construction & Mining	-200	-0.3%	59,700

Connecticut Labor Market Areas (LMAs): All six major Connecticut **LMAs** that are seasonally adjusted by the BLS revealed nonfarm industry employment gains in May 2023, with the largest **Hartford LMA** (0.3%, 579,600) leading in numerical gains (1,700) while the more seasonal southeastern **Norwich-New London-Westerly LMA** (+1,100, 126,000) led in percentage gains (0.9%). The **Bridgeport-Stamford-Norwalk LMA** (0.3%, 408,100) added 1,200 positions and the **New Haven LMA** (0.3%, 303,800) chipped in 900. The **Danbury LMA** (0.5%, 77,300) contributed 400 positions and the **Waterbury LMA** (0.3%, 67,500) gained 200 additional jobs as well.

Note: The six major Connecticut LMAs are independently estimated from the statewide data by the BLS and cover around 90% of the nonfarm employment in the state. Thus, estimates will not exactly sum to the statewide total.

Hours and Earnings: The May 2023 **private sector** workweek, *not seasonally adjusted*, averaged 33.1 hours. This is lower by one and one-tenth hour (-3.2%) than the May 2022 average of 34.2 hours. Average hourly earnings at \$35.31 last month, *not seasonally adjusted*, were up by \$0.65 (1.9%) from the May 2022 estimate of \$34.66. The associated May 2023 private sector weekly wage averaged \$1,168.76 – now lower by \$16.61 from a year ago (-1.4%, \$1,185.37). The Consumer Price Index for All Urban Consumers (CPI-U, U.S. City Average, *not seasonally adjusted*) for May 2023 was up 4.0% from a year ago. *Current all-employee private sector hours and earnings estimates can be volatile due to fluctuating sample responses.*

Labor Force Data (residential household survey)

The preliminary May 2023 unemployment rate for Connecticut was estimated by the BLS Local Area Unemployment Statistics program (LAUS) to be **3.7%** (seasonally adjusted). This is a new post lockdown low. This is lower by one-tenth of a percentage point compared to the April 2023 level of 3.8%. The Connecticut unemployment rate was 4.1% in May 2022. The U.S. unemployment rate for May 2023 was calculated at 3.7%, up three-tenths of a percentage point from the revised April 2023 rate (3.4%) and now higher by one-tenth of a percentage point than the U.S. jobless rate of 3.6% a year ago.

Average weekly initial unemployment claims for first-time filers (AWIC) in Connecticut in May 2023 were 3,972, *not seasonally adjusted*. The twelve-month moving average was 4,095 per week through May 2023, higher by 141 (3.6%) from the twelve months ending April 2023 and still higher by 653 (19.0%) than the average weekly count of 3,442 for the twelve months ending in May 2022.

*The nonfarm employment estimate, derived from a survey of businesses, is a measure of jobs in the state; the unemployment rate and labor force estimates are based on a household survey, and measure the work status of people who live in Connecticut. Overall, as the national and state economies recover, volatility in monthly numbers can be expected. **Job and employment estimates are best understood in the context of their movement over several months rather than observed changes in a single month's value.***

Starting with March, 2011, our monthly statewide and major LMA nonfarm job estimates have been taken over by the US Department of Labor Bureau of Labor Statistics. This is the final phase of transition in this program, which began in 2008. As a result of changes in the estimation procedures, you are likely to see more variability in month-to-month estimates of job counts. Caution should be used in interpreting any single month's estimate. The data are best interpreted to identify trends and cycles over several months and quarters. If you have any questions about these changes, please email us at: dol.lmi@ct.gov.
