PREFACE

The **Connecticut Department of Labor's Office of Research** is the state's leading producer of information and statistics on the economy, workforce, occupations, and careers. Our mission is to produce, analyze, and deliver timely and reliable workforce information and statistics to assist in decision-making for those planning economic development initiatives, for education and training providers, and for job seekers and students who are seeking guidance in making career choices.

In support of these efforts, the Office of Research is pleased to provide the **2014 Information for Workforce Investment Planning**. This publication contains a variety of data on Connecticut and each of the state's five Workforce Investment Areas including population and population density, labor force, employment and wages by industry sector, and new housing permits. In addition, detailed information on residents in need of workforce investment services such as high school dropouts, Medicaid recipients, adult probationers, Temporary Family Assistance (TFA) recipients, and other residents with barriers to employment is included.

The **2014 Information for Workforce Investment Planning** also includes appendix tables and historical data on the aforementioned topics for comparisons and trends analysis.

Data sources are cited on each appendix table, which includes other State agencies, the Connecticut Department of Labor and the U.S. Census Bureau. We wish to thank all of the data providers for their contribution to this year's publication. The charts and tables in the **2014 Information for Workforce Investment Planning** are within the public domain, and may be copied and/or quoted. However, we do request that you attribute such material to this publication.

We hope that you find the **2014 Information for Workforce Investment Planning** an effective data source for your planning needs.

Additional data on the North Central WIA are available at: http://www1.ctdol.state.ct.us/lmi/wia_northcentral.asp.

ACKNOWLEDGMENTS

Director: Andrew Condon

Managing Editor: Matthew Krzyzek, Economist

We would like to thank the following Department of Labor and Office of Research staff who provided data and editorial assistance for this publication: Diana Arbelaez, Todd Bentsen, Patrick Flaherty, Jungmin Joo, Jonathan Kuchta, Doreen LeBel, Dana Placzek, and Michael Polzella.

Connecticut

- In 2013, Connecticut issued 5,424 new housing permits; an increase of 755 from 2012.
- Permits are up 16% from 2012, but still down 54% from the peak in 2005.
- All but the Northwest WIA experienced an over-the-year increase in permits.

North Central WIA

- The North Central WIA issued 1,198 new housing permits in 2013, 171 more than in 2012.
- Southington (112), Bloomfield (105), and Rocky Hill (100) issued the highest number of permits.
- Bloomfield (+80) had the largest increase from 2012 in the area.

In 2013, 22% of Connecticut's total new housing permits were issued in the North Central WIA

From 2006-13, the number of new housing permits issued in the NC WIA declined by 68%

See Also Appendix Table on Page 23

Connecticut

- The percent of Connecticut employment that also live in Connecticut has decreased slightly from 93.5 percent in 2002 to 92.1 percent in 2011.
- This resident employment decrease is coupled with more non-Connecticut residents commuting into the state for work, rising from 4.5 percent of state employment in 2002 to 7.9 percent of Connecticut employment in 2011.
- More Connecticut residents are also working out of state, 6.7 percent of employed residents in 2011, up from 4.5 percent in 2002.

North Central WIA

- North Central WIA employment in 2011 was comprised of 67.9 percent North Central WIA residents, down 3.1 percent from 2002. The remaining 32.1 percent of WIA employment lived outside the area.
- The North Central WIA had the largest proportion of its workforce commuting less than 10 miles in 2011.
- In 2011, 60.3 percent of the North Central WIA’s workforce lived in Hartford County, down 0.6 points from a year before.
- The North Central WIA had an employment inflow of 32.1 percent commuting in from outside areas in 2011, up 3.1 percentage points from 2002.

Connecticut

- The number of Temporary Family Assistance (TFA) recipients in Connecticut decreased slightly by 70 recipients in 2014 to 36,267 from a year before.
- The Eastern and North Central WIAs experienced slight recipient increases from 2012-13. The other three WIAs had minor recipient declines.

TFA Recipients 2014

North Central WIA

- Thirty-Six percent of Connecticut’s total TFA population lived in the North Central WIA (13,206 recipients) in 2014, among which 71 percent lived in Hartford, New Britain, and East Hartford.

- From 2012 to 2013, the largest North Central WIA town increase occurred in Hartford.

TFA Recipients in Connecticut

TFA Recipients in the North Central WIA

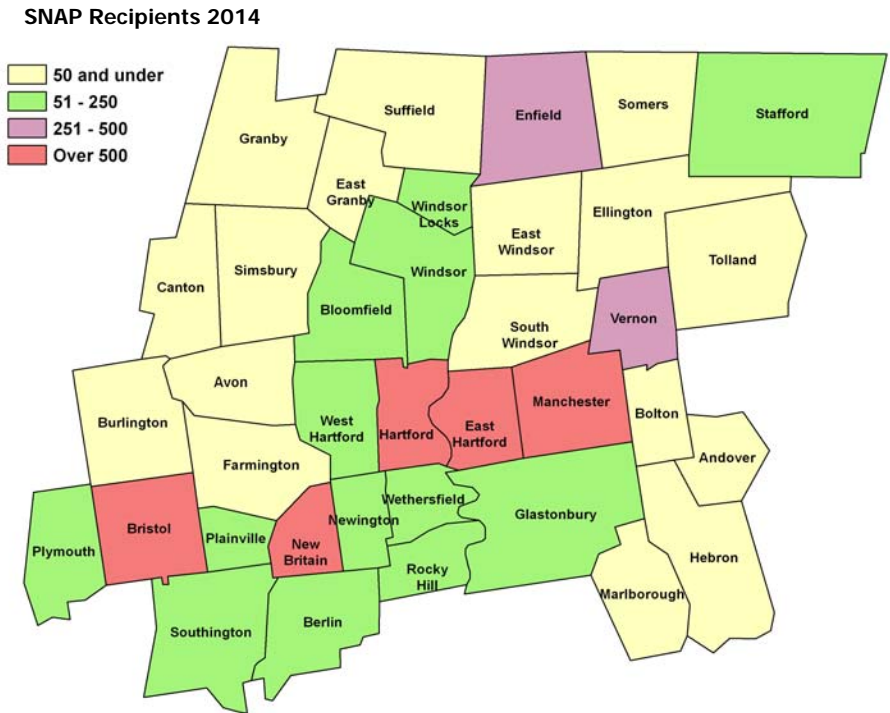

2014 Connecticut TFA Recipients by WIA

See Also Appendix Table on Page 24

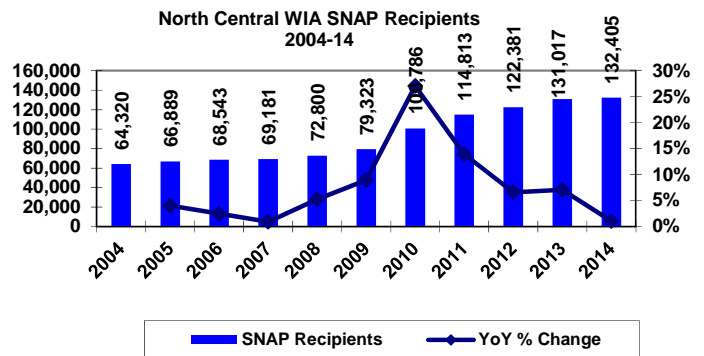

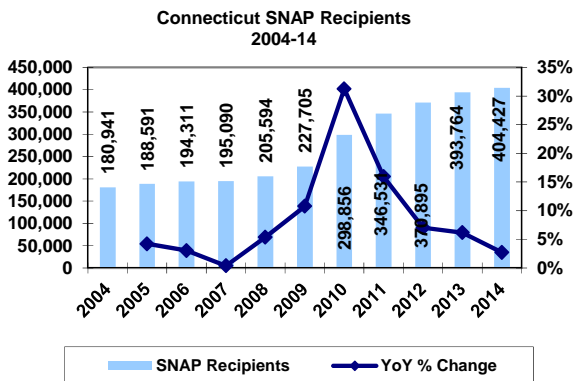

Connecticut

- From 2013 to 2014, the total number of Supplemental Nutrition Assistance Program (SNAP) recipients in Connecticut increased 2.7 percent, up 10,663 to 404,427 recipients.
- All five WIAs had percent increases between 1.1 and 4.4 percent, as found respectively in the North Central and South Central WIAs.

North Central WIA

- North Central WIA SNAP recipients increased 1.1 percent from 2013 to 2014. Recipients are up 8.2 percent since 2012.
- Thirty-three percent of Connecticut’s total SNAP recipient population resided in the North Central WIA (132,405 recipients) in 2014, among which 63.2 percent lived in Hartford, New Britain, and East Hartford.
- The largest WIA SNAP recipient increases occurred in Manchester (+409), East Hartford (+386), and New Britain (+163).

See Also Appendix Table on Page 24

Connecticut

- From 2013 to 2014, the total number of State Supplement recipients (SSR) in Connecticut increased by 393 recipients to 15,367.
- The North Central WIA increased the most while the South Central WIA declined the least.

State Supplement Recipients 2014

North Central WIA

- The North Central WIA experienced an increase of 164 (+3.4%) recipients from 2013-14.
- Thirty-two percent of Connecticut’s total SSR population resided in the North Central WIA (4,959 recipients) in 2014, among which fifty-two percent resided in Hartford, New Britain and West Hartford.
- Hartford, Manchester, and New Britain had the largest North Central WIA increases from 2013-14.
- Vernon and West Hartford had the largest North Central WIA decreases from 2013-14.

In 2014, 32% of Connecticut's SSR population lived in the North Central WIA

State Supplement Recipients in Connecticut 2004-14

See Also Appendix Table on Page 25

Connecticut

- Connecticut’s Medicaid population increased by 168,700 to 778,561 from 2013 to 2014.
- Statewide Medicaid Lowest Income Population (LIP) recipients increased by 3,177 to 89,612 recipients from 2013 to 2014.

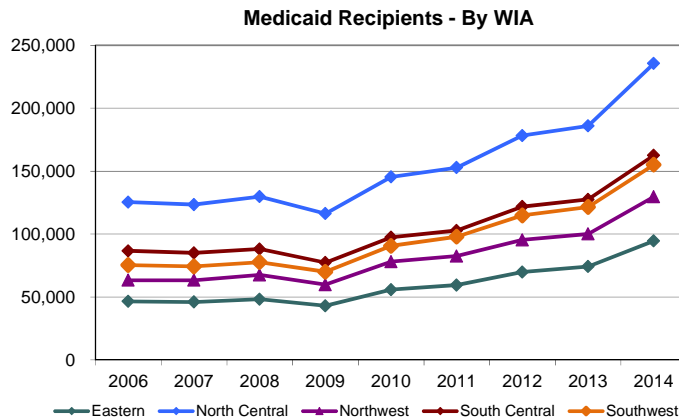

Medicaid Recipients 2014

North Central WIA

- Thirty percent of the state’s total Medicaid population resided in the North Central WIA (235,529 recipients) in 2014.
- North Central Medicaid recipients grew by 49,825 recipients from 2013 to 2014.
- Fifty-two percent of North Central Medicaid recipients lived in Hartford, New Britain, and East Hartford in 2014.
- The North Central WIA had 28,261 LIP recipients in 2014, up 1,212 from a year before.
- Sixty percent of LIP recipients lived in Hartford, New Britain, and East Hartford in 2014.

Note: From SFY2014 onward, total Medicaid figures include Medicaid Lowest Income Populations (LIP), which replaced the Medicaid LIA program.

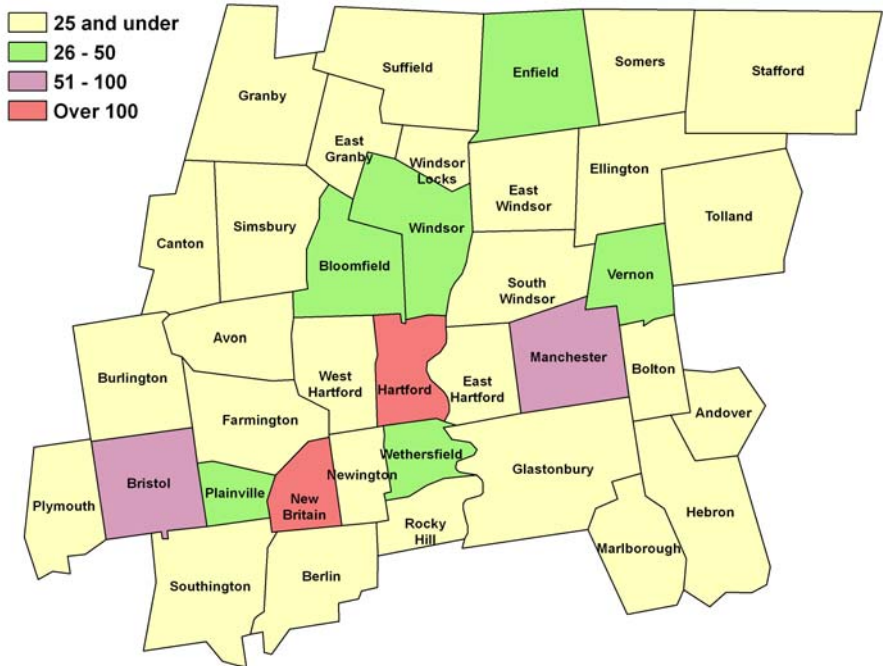

See Also Appendix Table on Page 25

Connecticut

- State Administered General Assistance (SAGA) Cash recipients increased by 659 recipients to 5,503 from 2013 to 2014.
- Affordable Care Act recipients amounted to 84,587 statewide in 2014, the first year of available data.

SAGA Cash Recipients 2014

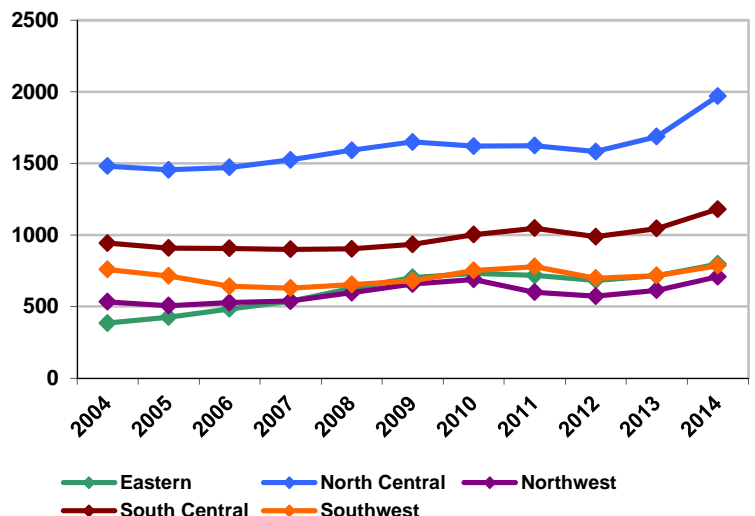

North Central WIA

- North Central WIA Cash recipients increased by 282 to 1,969 recipients from 2013.
- Sixty-five percent of North Central SAGA recipients lived in Hartford, New Britain, and East Hartford in 2014.
- Twenty-nine percent (24,615 recipients) of statewide ACA recipients live in the North Central WIA, among which 45 percent live in Hartford, New Britain, and East Hartford.

Note: From SFY2014 onward, total Medicaid figures include Medicaid Lowest Income Populations (LIP), which replaced the LIA program.

SAGA Cash Recipients By WIA

2014 Affordable Care Act recipients by WIA

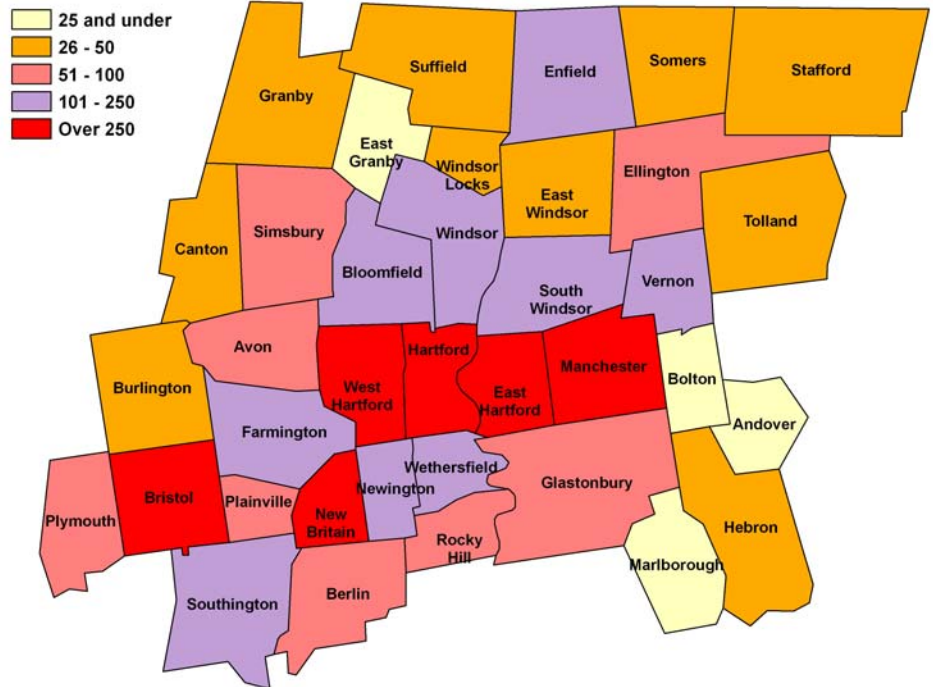

See Also Appendix Table on Page 26

Connecticut

- As of June 2014, there were 16,323 active Department of Developmental Services (DDS) consumers in Connecticut, an increase of 457 since 2013 and 1,387 since 2004.
- The number of consumers has increased by 9.3% since 2004.

DDS Consumers June 2014

North Central WIA

- The North Central WIA had 4,582 consumers in June 2014, an increase of 126 since 2013.
- Hartford (505) and Manchester (426) had the largest DDS consumer population in the area.
- Farmington (+15) had the largest over-the-year increase in DDS consumers.
- Glastonbury (-4) and Wethersfield (-4) had the largest over-the-year decrease in DDS consumers.

Department of Developmental Services (DDS) Consumers by WIA

In 2014, 28% of Connecticut's DDS Consumer Population lived in the North Central WIA

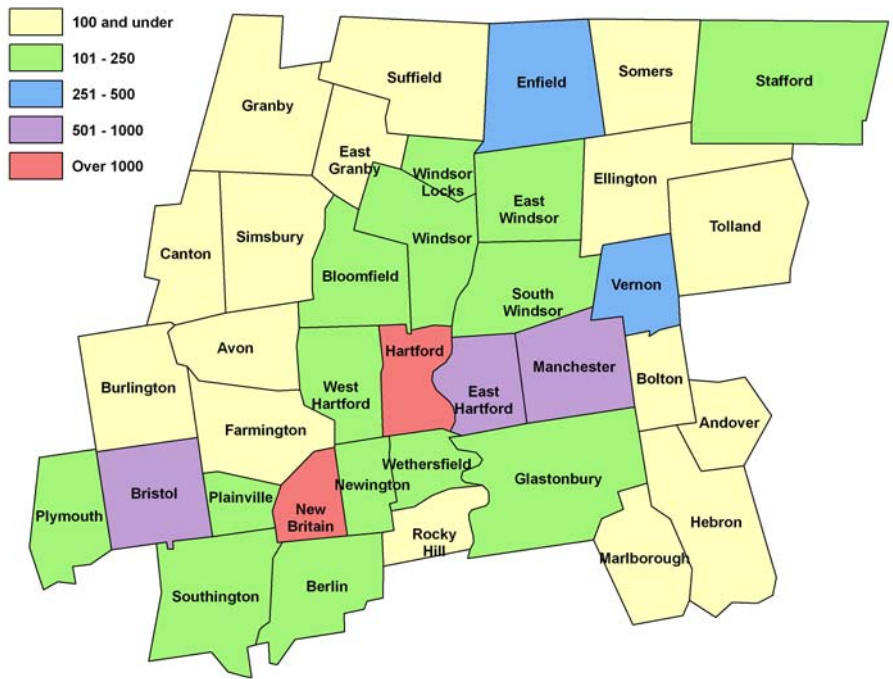

See Also Appendix Table on Page 27

Connecticut

- In 2014, there were 43,141 adult probationers in Connecticut, a decrease of 2,473 from 2013.
- All five WIAs experienced an over-the-year decrease in their adult probationer population.

Adult Probationers 2014

North Central WIA

- The North Central WIA had 11,128 adult probationers in 2014, down 1,115 from 2013.
- Hartford (3,568), New Britain (1,593) and East Hartford (819) accounted for 54% of the area's probationers.
- Plymouth (+16) had the highest over-the-year increase of adult probationers.
- Hartford (-375) had the highest over-the-year decrease of adult probationers.

As of October 2014, 28% of Connecticut's total number of adult probationers resided in the North Central WIA

See Also Appendix Table on Page 29

Connecticut

- Statewide high school enrollment for the 2012-13 school year was 169,900 students.
- The four-year graduation rate was 85.5 percent for the 2012-13 school year, a 0.7 percentage point increase over the prior school year.
- Connecticut’s Technical High School System had enrollment of 10,651 students. Four year graduation was 96.3 percent, up 0.4 percentage points from the prior school year.

North Central WIA

- The North Central WIA had 49,015 high school students enrolled and 86.4 percent 4 year graduation rate for the 2012-13 school year, up 0.3 percentage points from the prior year.
- Bolton had the highest 4 year graduation rate, 97.5 percent.
- New Britain had the lowest 4 year graduation rate, 60.9 percent.

Industry Employment Concentration North Central WIA relative to Connecticut and the U.S.

These figures reflect the importance of various industries to the economy of an area, in terms of the number of jobs they provide, compared with their significance to the State and Nation. Specifically, they measure the concentration of an industry's employment in a local area relative to the larger areas. A ratio above 1.0 indicates that an industry may be more important to the area than to the State or Nation as a whole. For example, if an industry provides 3.0 percent of local area jobs and 1.5 percent of State jobs, its local employment concentration ratio would be 2.0, revealing twice the concentration of jobs in that industry in the local area than exists in the State overall. This may uncover smaller industries that make relatively significant contributions to the local economy, representing both a source of economic strength to the area and a potential vulnerability if an economic turn affects those industries. In the North Central WIA, the concentration of employment in the finance and insurance industry is most dominant.

*Excludes government

Size class is determined by the number of employees at a worksite.

NOTE: The sum of the areas is less than the statewide total because some firms only report statewide employment and are not included in the area data.

- Nearly half (49%) of Connecticut's jobs are concentrated in five major occupational categories: Office and Administrative Support, Sales and Related, Food Preparation and Serving-Related, Education, Training, and Library, and Management. Among these five categories, workers in the Management occupation earned the highest wages.
- Workers in 12 of Connecticut's 22 major occupational categories earn an annual average wage of at least \$50K/year.
- Entry level wages of below \$10/hour are predominate in five of the 22 occupational categories: Farming, Fishing, and Forestry, Food Preparation and Serving-Related, Personal Care and Service, Sales and Related, and Building/Grounds Cleaning and Maintenance.
- Entry level wages of more than \$20/hour are predominate in seven of the 22 occupational categories: Life, Physical, and Social Science, Healthcare Practitioners and Technical, Business and Financial Operations, Legal, Computer and Mathematical, Architecture and Engineering, and Management.

Per Capita Income: U.S. Bureau of Economic Analysis

Median Family and Household Income: U.S. Census Bureau, 2012 ACS

Per capita personal income

This measure of income is calculated as the total personal income of the residents of an area divided by the population of the area. Per capita personal income is often used as an indicator of consumers' purchasing power and of the economic well-being of the residents of an area.

- The Population of Connecticut in 2013 was 3,596,080.
- In 2013, Connecticut had a per capita personal income (PCPI) of \$60,847. This PCPI ranked 1st in the U.S. and was 132 percent of the national average of \$44,543. The 2013 PCPI reflected a 1.7 percent increase from 2012. The 2012-2013 national increase was 4.3 percent.
- In 2003, the PCPI of Connecticut was \$43,822 and ranked 1st in the United States. The 2003-2013 average annual growth rate of Connecticut PCPI was 3.4 percent. The average annual growth rate for the nation overall was 3.2 percent.

Family household (Family)

A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

Household

A household includes all the people who occupy a housing unit as their usual place of residence.

Base Period: A selected period of time, frequently one year, against which changes to other points in time are calculated (*also see Index Number*).

Benchmarking: The process of re-estimating statistics as more complete data become available. Estimates are usually calculated using only a sample of the universe (total count). Therefore, benchmarking allows for correction of estimating errors. New benchmarking levels are introduced on an annual basis.

Covered Employment: Employment in any industry insured under the provisions of the Connecticut Unemployment Compensation Law.

Current Population Survey: A national household survey conducted each month by the Census Bureau for the U.S. Bureau of Labor Statistics. Information is gathered from a sample of about 60,000 households (1,200 in Connecticut) designed to represent the civilian non-institutional population of persons 16 years of age and over.

Discouraged Workers: Persons not included in the unemployment count who say they did not look for work because they think none is available, or they believe they lack the skills necessary to compete in the labor market.

Dislocated Worker: As defined under the Workforce Investment Act of 1998, an individual who: 1. (a) has been terminated or laid off, or received notice of same; (b) is eligible for or has exhausted entitlement to unemployment compensation, or has demonstrated attachment to the workforce but is not eligible for unemployment compensation; and (c) is unlikely to return to a previous industry or occupation. 2. (a) has been terminated or laid off, or has received notice of same, as a result of permanent closure or substantial layoff at a plant, facility or enterprise; or (b) is employed at a facility at which employer has made a general announcement that such facility will close within 180 days; (c) for purposes of receiving certain services, is employed at a facility at which the employer has made a general announcement that such facility will close; (d) was self-employed but is unemployed as a result of general economic conditions in the community in which the individual resides or because of natural disasters; (e) is a displaced homemaker.

Displaced Homemaker: An individual who has been providing unpaid services to family members in the home and who: (a) has been dependent on the income of another family member but is no longer supported by that income; and (b) is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

Durable Goods: Items with a normal life expectancy of three years or more. Automobiles, furniture, household appliances, and mobile homes are examples. Because of their nature, expenditures for durable goods are generally postponable. Thus, durable goods sales are the most volatile component of consumer expenditures.

Employed Persons: Those individuals who are 16 years of age and over who worked for pay any time during the week which includes the 12th day of the month, or who worked unpaid for 15 hours or more in a family-owned business, and individuals who were temporarily absent from their jobs due to illness, bad weather, vacation, labor dispute, or personal reasons. Excluded are persons whose only activity consists of work around the house and volunteer work for religious, charitable, and similar organizations.

Employment Concentration: Industry Employment Concentration, or Location Quotient reflects the importance of an industry to the economy of a geographical area, in terms of the number of jobs it provides. It is a calculated ratio that determines whether or not the local economy has a greater share of that industry than expected. This publication uses Location Quotients to compare workforce investment area employment by industry relative to Connecticut. A Location Quotient of greater than 1.0 indicates a higher level of employment concentration in an area, while a Location Quotient of 2.0 shows that an industry has twice the employment concentration in that area relative to Connecticut as a whole.

Establishment: An economic unit such as a farm, mine, factory, or store, which produces goods or provides services. It is usually at a single physical location and engaged in one predominant type of economic activity.

Family: A group of two or more people who reside together and who are related by birth, marriage, or adoption.

Farm Employment: Persons who work as owners and operators of farms, as unpaid family workers on farms, or as hired workers who are engaged in farm activities.

Full-Time Employment: Employment of 35 or more hours per week.

Household: A household includes all the people who occupy a housing unit as their usual place of residence.

Housing Permits: Counted by the Bureau of the Census, new housing permits include permits issued for all new privately owned, attached and detached single-family houses.

Index Number: A measure of the relative changes occurring in a series of values compared with a base period. The base period usually equals 100, and any changes from it represent percentages. By use of an index number, large or unwieldy data, such as sales in thousands of dollars or costs in dollars and cents, are reduced to a form in which they can be readily understood.

Industry: A generic term for a distinct group of economic activities. Industries are described and classified by their primary activity or product.

Initial Claim: A notice filed by a worker, at the beginning of a period of unemployment, requesting a determination of insured status for jobless benefits.

Labor Force: All persons 16 years of age and over who are classified as employed, unemployed and seeking employment, or involved in a labor-management dispute. The labor force does not include persons who never worked a full-time job lasting two weeks or longer and “discouraged workers” who have been unemployed for a substantial length of time and are no longer actively seeking employment. Members of the armed forces stationed either in the United States or abroad are counted by their place of residence. The civilian labor force excludes members of the armed forces and the institutionalized population.

Labor Force Participation Rate: The proportion of the total civilian non-institutional population or of a demographic subgroup of that population classified as “in the labor force.”

Labor Market Area (LMA): As defined by the U.S. Bureau of Labor Statistics, an economically integrated geographic area within which individuals can reside and find employment within a reasonable distance or can readily change employment without changing their place of residence.

Labor Market Information (LMI): The body of information that deals with the functioning of labor markets and the determination of the demand for and supply of labor. It includes, but is not limited to, such key factors as changes in the level and/or composition of economic activity, the population, employment and unemployment, income and earnings, wage rates, and fringe benefits.

Labor Surplus Area: A civil jurisdiction where the average unemployment rate is at least 20 percent above the average unemployment for all states, or its unemployment during the previous two calendar years was ten percent or more. The designation allows establishments in the area preference in bidding for certain federal contracts.

Location Quotients: Measures an industry’s concentration or specialization in one geographical area relative to a larger area (also see *Employment Concentration*).

Manufacturing: Includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power-driven machines and materials handling equipment. The new product of a manufacturing establishment may be “finished” in the sense that it is ready for utilization and consumption, or it may be “semi-finished” to become a raw material for an establishment engaged in further manufacturing.

Median: The middle value or midpoint between two middle values in a set of data arranged in order of increasing or decreasing magnitude. As such, one-half of the items in the set are less than the median and one-half are greater.

Median Income: The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median. For households and families, the median income is based on the distribution of the total number of households and families, including those with no income.

Metropolitan Statistical Area (MSA): The general concept of a Metropolitan Statistical Area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. Connecticut currently has seven Metropolitan Statistical Areas, as defined by the federal Office of Management and Budget.

Money Income: Census-based money income is derived from a sample of individuals 15 years of age and older, and consists only of income that is received by individuals in cash and its equivalents.

Nondurable Goods: Items that generally last for only a short period of time (three years or less). Food, beverages, apparel, and gasoline are common examples. Because of their nature, nondurable goods are generally purchased when needed.

Nonfarm Employment: The total number of persons on establishment payroll employed full- or part-time who received pay for any part of the pay-period which includes the 12th day of the month. Temporary and intermittent employees are included, as are any workers who are on paid sick leave, on paid holiday, or who work during only part of the specified pay period. A striking worker who only works a small portion of the survey period, and is paid, is included. Persons on the payroll of more than one establishment are counted in each establishment. Data exclude proprietors, self-employed, unpaid family or volunteer workers, farm workers, and domestic workers. Persons on layoff the entire pay-period, on leave without pay, on strike for the entire period or who have not yet reported for work are not counted as employed.

Occupation: A name or title of a job that identifies a set of activities or tasks that employees are paid to perform. Employees that perform essentially the same tasks are in the same occupation, whether or not they are in the same industry. Some occupations are concentrated in a few particular industries, other occupations are found in the majority of industries.

Part-Time Employment: As defined by the U.S. Bureau of Labor Statistics, employment in which a worker is regularly scheduled to work fewer than 35 hours a week.

Per Capita Personal Income: The annual total personal income of residents divided by resident population as of July 1st of current year.

Personal Income: Measures the net earnings, rental income, personal dividend income, personal interest income, and transfer payments by place of residence before the deduction

of personal income taxes and other personal taxes. Reported in current dollars.

Private Household Workers: Persons who work for profit or fees in private households such as child care workers, cooks, housekeepers or other household staff.

Production Worker: Employees, up through the level of working supervisor, who are directly engaged in the manufacture of the product of an establishment. Among those excluded from this category are persons in executive and managerial positions and persons engaged in activities such as accounting, sales, advertising, routine clerical work, and professional and technical functions.

SAGA (State-Administered General Assistance): Provides cash, medical, and emergency assistance to persons who do not qualify for federal and state assistance programs, such as Supplemental Security Income (SSI), Temporary Family Assistance (TFA), and Medicaid.

Seasonal Adjustments: The adjustment of time-series data to eliminate the effect of intra-year variations that tend to occur each year in approximately the same manner. Examples of such variations include school terms, holidays, and yearly weather patterns.

Seasonal Industry: An industry in which activity is affected by regularly recurring weather changes, holidays, vacations, etc. The construction and recreational industries are typically characterized as “seasonal.”

Self-Employed Workers: Persons who work for profit or fees in their own business, profession, trade, or farm. Self-employed persons whose businesses are incorporated are included among wage and salary workers, because technically, they are paid employees of a corporation.

Underemployed: Persons working full- or part-time in jobs that are below their earning capacity or level of competence. The terms “underemployed” and “underutilized” are used interchangeably. Underemployment has also been defined as “involuntary part-time” employment or employment of a person on a part-time basis when full-time work is desired.

Unemployed: Persons who, during the survey week, had no employment but were available for work and: (a) had engaged in any job-seeking activity within the past four weeks, i.e. registered at a public or private employment office, met with prospective employers, checked with friends or relatives, placed or answered advertisements, wrote letters of application, or was on a union or professional register; (b) were waiting to hear back from a job which they had been laid off; or (c) were waiting to report to a new wage/salary job within 30 days.

Unemployment Rate: Represents the number unemployed as a percent of the labor force. The seasonally adjusted unemployment rate eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, etc., and

therefore, more clearly shows the underlying basic trend of unemployment.

Units: (*see Establishment*)

Workforce Investment Act (WIA) of 1998: Represents significant changes to federal statutes governing programs of job training, adult education and literacy, and vocational rehabilitation in order to establish a coordinated, streamlined and more flexible workforce development system. It is a revitalized system that focuses on providing *employers* with skilled workers, and the economic and workforce information they need to conduct business effectively - and on providing *workers* with the information, advice, job search assistance, and training they need to get and keep good jobs.

Worksite: A worksite is an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed (e.g. factory, mill, store, hotel, restaurant).
