# PREFACE

The **Connecticut Department of Labor's Office of Research** is the state's leading producer of information and statistics on the economy, workforce, occupations, and careers. Our mission is to produce, analyze, and deliver timely and reliable workforce information and statistics to assist in decision-making for those planning economic development initiatives, for education and training providers, and for job seekers and students who are seeking guidance in making career choices.

In support of these efforts, the Office of Research is pleased to provide the **2010 Information for Workforce Investment Planning**. This publication contains a variety of data on Connecticut and each of the state's five Workforce Investment Areas including population and population density, labor force, employment and wages by industry sector, and new housing permits. In addition, detailed information on residents in need of workforce investment services such as high school dropouts, Medicaid recipients, adult probationers, Temporary Family Assistance (TFA) recipients, and other residents with barriers to employment.

The *2010 Information for Workforce Investment Planning* also includes appendix tables and historical data on the aforementioned topics for comparisons and trends analysis.

Data sources are cited on each appendix table, which includes other State agencies, the Connecticut Department of Labor and the U.S. Census Bureau. We wish to thank all of the data providers for their contribution to this year's publication. The charts and tables in the *2010 Information for Workforce Investment Planning* are within the public domain, and may be copied and/or quoted. However, we do request that you attribute such material to this publication.

We hope that you find the *2010 Information for Workforce Investment Planning* an effective data source for your planning needs.

# **ACKNOWLEDGMENTS**

Managing Editors: Sarah York, Economist Matthew Krzyzek, Economist

We would like to thank the following Department of Labor and Office of Research staff who provided data and editorial assistance for this publication: Todd Bentsen, John DiSette, Edward Doukas, Patrick Flaherty, Doreen LeBel, Dana Placzek, Michael Polzella, David Post, Joseph Slepski and Mark Stankiewicz.

**Population and Population Density** 

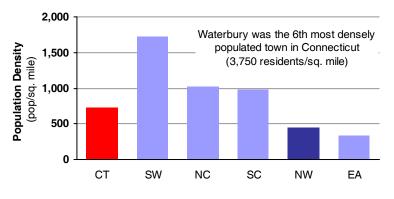

- From 2000 to 2009, Connecticut's population increased by 112,681 (+3.3%) from 3,405,607 to 3,518,288.
- In 2009, there were 593,243
  residents in the Northwest WIA,
  which were 21,604 more residents
  (+3.8%) since 2000. The towns
  that had the largest increase since
  2000 were Danbury (+4,905),
  Newtown (+1,811), New Milford
  (+1,407) and Wolcott (+1,247).
  Waterbury (-128 residents) had the
  area's largest decline in population.
- Fifteen towns in the Northwest WIA had populations of more than 10,000 in 2009. Thirty-eight of the WIA's total population resided in Waterbury (107,143), Danbury (79,743) and Torrington (35,408).
- In 2009, the Northwest WIA reported a population density of 441 persons/sq. mile. Waterbury was the area's most densely populated town and ranked sixth in Connecticut with 3,750 persons per square mile. Naugatuck (1,954/sq. mi.), Danbury (1,894/sq. mi.) and Bethel (1,104/sq. mi.) were the only other area towns with more than 1,000 persons per sq. mile.

The Northwest WIA accounted for 17% of the total statewide population in 2009

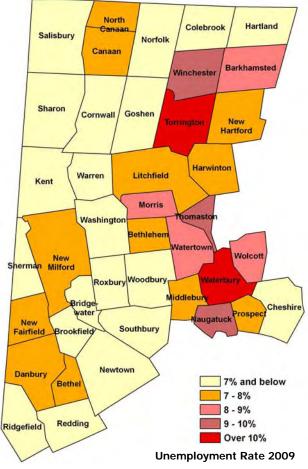

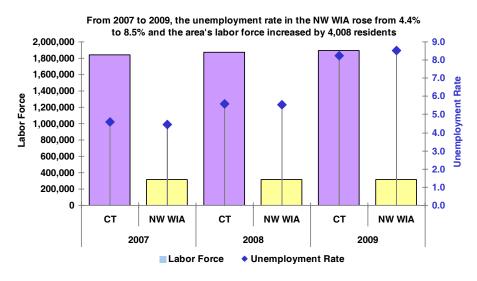

See Also Appendix Tables and Maps on Pages 15 and 31

- From 2008 to 2009, Connecticut's labor force increased by 19,717 (+1.0%) to 1,889,947. During this period, the state's unemployment rate increased from 5.6% in 2008 to 8.2% in 2009, an increase of 2.6%. This over-the-year increase brought the number of unemployed job-seeking Connecticut residents to 155,656, an amount higher than any seen in this decade or the 1990s. The top five towns in the state with the largest labor force population in 2009 were; Stamford (67,693, 7.3UR), Bridgeport (63,959, 12.1UR), New Haven (56,670, 11.3UR), Hartford (50,819, 14.2UR) and Waterbury (50,568, 13.4UR).
- United States unemployment rose from 5.8% in 2008 to 9.3% in 2009, an increase of 3.5%. U.S. unemployment increased by .9% more than Connecticut during the period.
- The North Central WIA (529,131) had the largest labor force in 2009. The Southwest WIA had the second largest labor force (403,863). The Eastern WIA reported the smallest labor force (243,818) and the lowest unemployment rate of 7.9%. The highest WIA unemployment rate was 8.5% as found in the North Central and Northwest workforce investment areas.

- The Northwest WIA's unemployment rate increased by 2.9% to an average of 8.5%, or 26,858 unemployed from 2008 to 2009. This 2.9% increase represents a 9,508 decline in employment and a 3,829 expansion of the labor force.
- The Northwest WIA's town unemployment rate high of 13.4% was found in Waterbury. The town of Colebrook reported the Northwest WIA's lowest unemployment rate in 2009 at 3.9 percent. Average and median unemployment rates by town were 7.2 and 7.0 percent, respectively. The Northwest WIA total labor force unemployment rate stood at 8.5 percent.

#### Labor Force

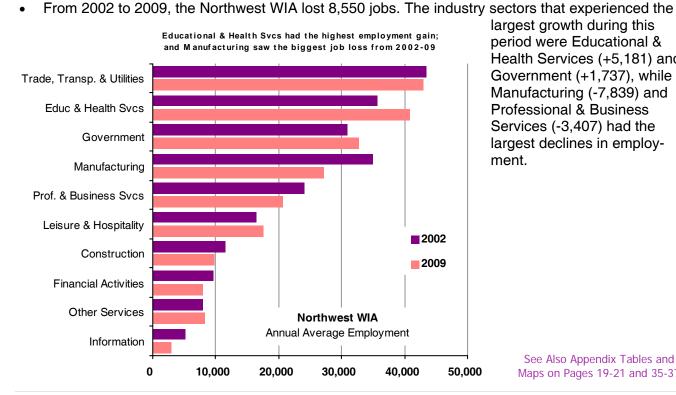

### Annual Average Employment by Industry

From 2008 to 2009, Connecticut's total employment declined significantly by 61,138 jobs to 1.615.355; this was a much steeper decline than the previous year's loss of 9.614 jobs. The only two industries

	In 2009, over half (56%) of the NW WIA's total employment was in the Trade, Transportation & Utilities; Educational & Health Services; and Government sectors.

Information	2,974	3,426	3,498	3,769	4,026	4,436	4,791	5,146			

that were able to grow throughout this recession were the Educational & Health Services (+5,709) and the Financial Activities (+5,003) sectors. The largest job losses came from the Trade, Transportation & Utilities (-16,760) and the Professional & Business Services (-16,524) sectors.

- Connecticut's Educational & Health Services (+33,699 jobs) and Leisure & Hospitality (+10,758 • jobs) sectors experienced the highest employment growth during the 2002 to 2009 period; and the largest job losses occurred in the Manufacturing (-40,358) and the Trade, Transportation & Utilities (-18,689) sectors.
- The Northwest WIA accounted for 13 percent of Connecticut's total employment in 2009 and lost • 12,373 jobs from 2008, which brought the area's total employment to 211,471. In 2009, over half (56%) of the area's total employment was in the Trade, Transportation & Utilities (43,037), Educational & Health Services (40,881) and Government (32,714) sectors. Educational & Health Services (+513) was the only sector to experience job growth from 2008 to 2009; and Manufacturing (-3,649) had the biggest loss.

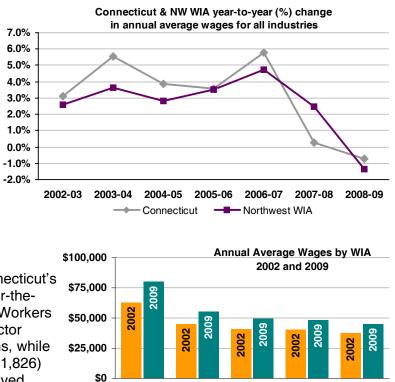

largest growth during this period were Educational & Health Services (+5,181) and Government (+1,737), while Manufacturing (-7,839) and **Professional & Business** Services (-3,407) had the largest declines in employment.

> See Also Appendix Tables and Maps on Pages 19-21 and 35-37

- The 2009 annual average wage in Connecticut was \$57,754, which was \$435 less than the 2008 level. With an average wage of \$119,761 in 2009, workers in the Financial Activities sector continued to be the state's top earners. Professional & Business Services (\$73,885), Information Services (\$71,230) and Manufacturing (\$70.238) workers also received hefty salaries. In contrast, workers in the Other Services\* (\$30,147) and Leisure & Hospitality (\$19,545) sectors earned the lowest average wages.
- Unlike previous years, only half of Connecticut's major industry sectors experienced over-theyear average wage increases in 2009. Workers in the Financial Activities (-\$13,110) sector experienced the largest wage reductions, while workers in the Information Services (+\$1,826) and Government (+1,686) sectors received wage increases.

In the Northwest WIA, average wages were \$48,388 in 2009, down \$672 from the 2008 level. • Workers in the area's Financial Activities (\$74,124) and Manufacturing (\$70,435) sectors earned the highest wages in 2009, and had the biggest average wage increase from 2002 (+\$14,934 and +\$16,574, respectively). Other Services (\$25,483) and Leisure & Hospitality (\$18,853) sector workers earned the lowest average wages in 2009.

Major industry sector annua	I average wage by WIA - 2009
-----------------------------	------------------------------

\* The 'Other Services' (except Public Admin.) sector includes a wide range of employment establishments engaged in activities such as automotive & equipment repair/maintenance; religious or political advocacy activities; dry-cleaning/laundry, personal, death, or pet care services; and private household services.

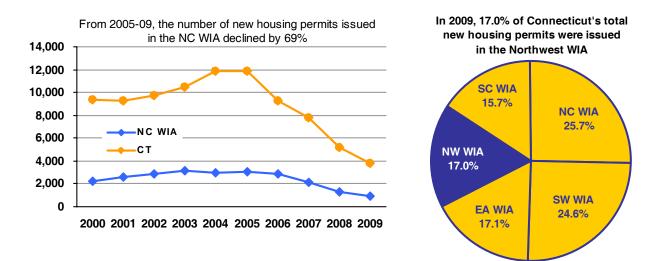

See Also Appendix Tables and Maps on Pages 19-21 and 35-37

- Since 1990, the highest number of new housing permits issued in Connecticut was in 2005 (11,885), and the lowest number of permits was issued in 2009 (3,786), indicating a sixty-eight percent decline. Each of Connecticut's workforce investment areas experienced the same trend from 2005 to 2009: South Central (-72%), Northwest (-71%), North Central (-69%), Eastern (-67%), and Southwest (-63%). During this period, Norwalk (+115) and Chester (+63) were the only towns in Connecticut to have an increase of more than 50 new housing permits.
- Four of the five WIAs experienced a decline in new housing permits over the 2008 to 2009 period, with the Northwest (-94, -13%) and Southwest (-799, -46%) areas reporting the smallest and largest decrease, respectively. The North Central (-313, -24%) and South Central (-286, -32%) regions also experienced declines during the period. The Eastern (+58, +10%) WIA is the only area that had an increase in new housing permits.
- The number of new housing permits in the Northwest WIA fell by 1,573 from 2005 to 2009, and thirty-six percent of this decline was recorded in the towns of Danbury (-339), Redding (-128) and Waterbury (-106).

2009

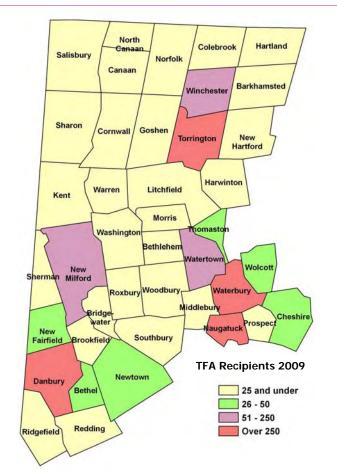

In 2009, the Northwest WIA issued 642 new housing permits, which represented seventeen
percent of the statewide total. Danbury (259), Bethel (47) and Waterbury (37) reported the highest
number of new housing permits. Danbury (+170) and Bethel (+22) were the only area towns to
have an increase of at least ten new housing permits from 2008.

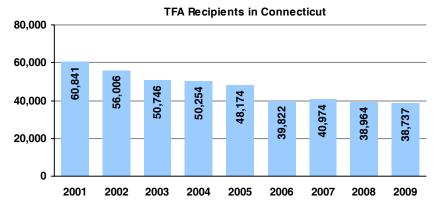

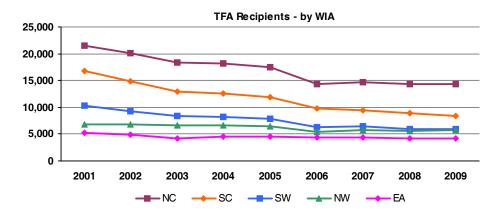

#### **New Housing Permits**

#### **Temporary Family Assistance Recipients**

- In 2009, the number of Temporary Family Assistance (TFA) recipients in Connecticut decreased by 227 recipients to 38,737, which marks a new ten vear low. This downward trend has maintained from a 2001 high of 60,841 recipients and an average decline of 2,778 per year. The year-over-year decline of 227 recipients is a 1.2 percent decline from 2008. Four of the state's five WIAs experienced an increase in TFA; Eastern (+7), North Central (+7), Northwest (+263) and the Southwest (+30). The South Central WIA experienced the only decline statewide at -527 recipients.
- Fifteen percent of Connecticut's total TFA population resided in the Northwest WIA (5,798 recipients) in 2009, among which seventy percent resided in Waterbury (4,086).
- From 2008 to 2009, seven Northwest WIA towns reported an increase of more than ten TFA recipients and occurred most notably in Waterbury (+69), Torrington (+61) and Danbury (+42). Among the five area towns that experienced an over-the-year decline in TFA recipients, Watertown (-9), Southbury (-8) and Washington (-7) were most significant.

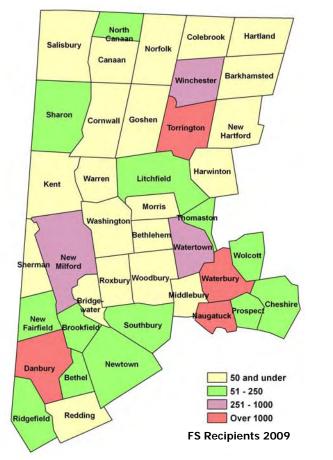

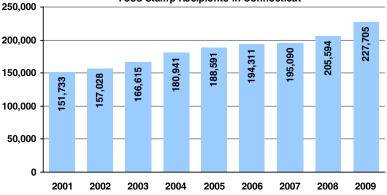

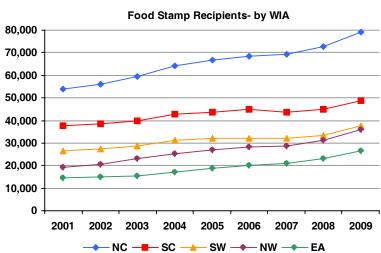

#### **Food Stamp Recipients**

- From 2008 to 2009, the total number of Food Stamp (FS) recipients in Connecticut increased by 22,111 to 227,705more than doubling the previous year-over-year increase of 10,504 recipients.
- Among the state's five WIAs, North Central reported the largest increase in FS recipients (+6,523), followed by Northwest (+4,418), Southwest (4,158), South Central (+3,642) and Eastern (3,374).
- Sixteen percent of Connecticut's total FS population resided in the Northwest WIA (35,771 recipients) in 2009, among which sixtyfour percent lived in Waterbury (23,007).
- Four Northwest WIA towns experienced an increase of at least 100 FS recipients from 2008 to 2009: Waterbury (+2,342), Danbury (+559), Torrington (+400) and Naugatuck (+278). Of the three towns that experienced a decrease in WIA recipients, none were in excess of 10 residents.

Food Stamp Recipients in Connecticut

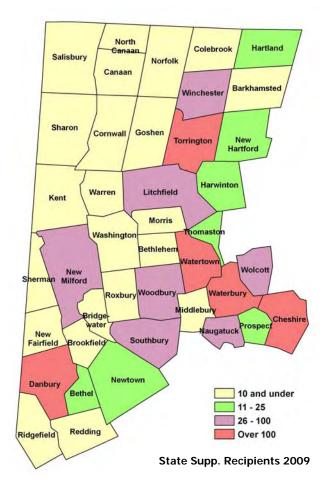

See Also Appendix Table on Page 23

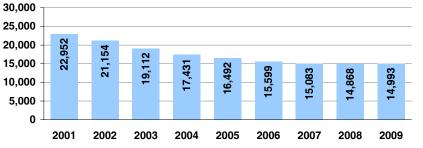

2010 Information for Workforce Investment Planning Connecticut Department of Labor - www.ct.gov/dol - Labor Market Information

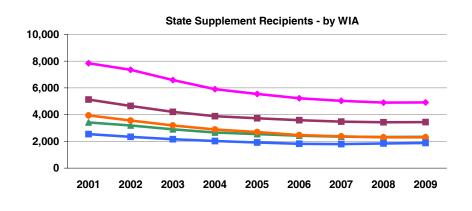

#### **State Supplemental Recipients**

- From 2008 to 2009, the total number of State Supplement recipients (SSR) in Connecticut increased by 125 recipients to 14,993. This increase follows a seven year decline from a high of 22,952 in 2001 to 14,868 recipients in 2008.
- The Northwest WIA experienced a State Supplement increase of five recipients in 2009 to 2,332. The other four WIAs experienced the following changes; Eastern (+35), North Central (+11), South Central (+8) and the Southwest (-7). The Northwest WIA's 2009 year-over-year increase of five recipients differs from its 2008 decrease of 18 recipients.
- Sixteen percent of Connecticut's total State Supplement population resided in the Northwest WIA (2,332 recipients) in 2009, among which forty-seven percent resided in Waterbury (1,106 recipients).
- Watertown (+7) and Cheshire (+5) represent the largest Northwest increases in 2009. Danbury (-8), Waterbury (-6) and Winchester (-5) represent the WIA's largest nominal decline.

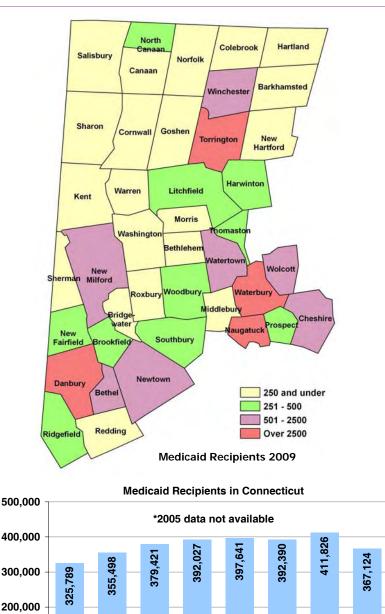

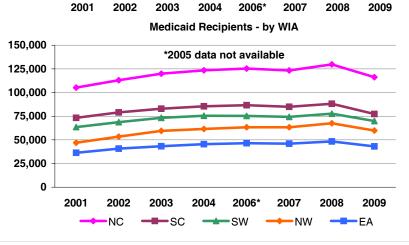

State Supplement Recipients in Connecticut

- Connecticut's Medicaid population decreased by 44,702 (-11%) to 367,124 from 2008 to 2009. Each of the state's five WIAs consequently experienced year-over-year rate declines; Eastern (-5,260), North Central (-13,536), Northwest (-7,745), South Central (-10,847) and the Southwest WIA (-7,680).
- Sixteen percent of the state's total Medicaid population resided in the Northwest WIA (59,795) in 2009, among which forty-eight percent reside in Waterbury (29,223). In 2009, seven Northwest WIA towns reported a Medicaid population of more than 1,000 residents.
- In 2009, no Northwest WIA towns reported a substantial increase in Medicaid recipients, Warren (+13), Goshen (+7), Redding (+6) and Barkhamsted (+4) were the only WIA towns to report an increase. Declines occurred for the thirty-seven other Northwest WIA towns. most notably occurring in Waterbury (-2,686), Torrington (-928), Danbury (-710) and Southbury (-647). These four towns accounted for sixty-four percent of the Northwest WIA's recipient decline. Overall in 2009, total Northwest WIA Medicaid recipients was down 11.5% of its 2008 level.

See Also Appendix Table on Page 24

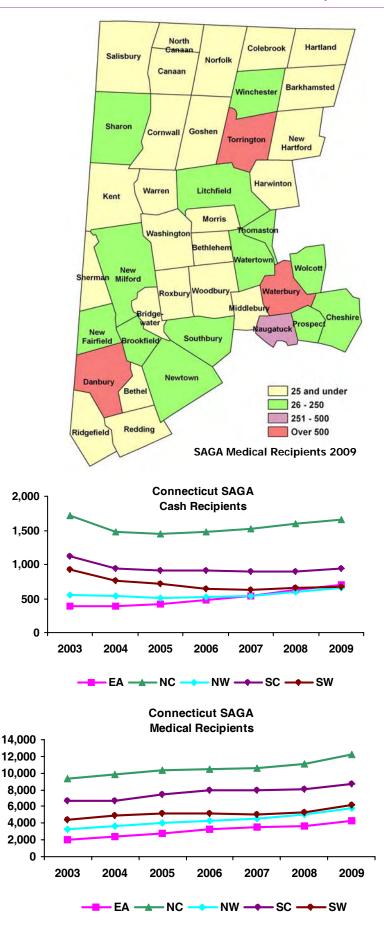

100,000

0

#### **State Administered General Assistance Recipients**

# **Northwest WIA**

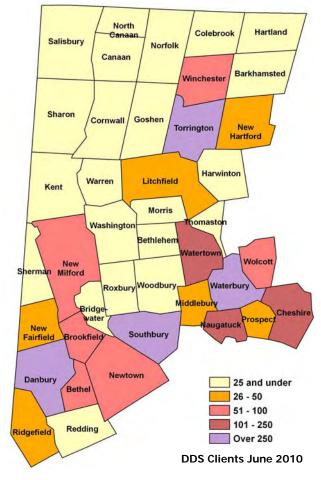

- In 2009, Connecticut's State Administered General Assistance (SAGA) cash recipients increased by 254 to 4,701. Medical recipients rose by 4,028 to 37,288. This four-thousand recipient increase contributes substantially to Connecticut's SAGA recipient increase of 5,981 from 2006 to 2009.
- Cash recipients in 2009 increased six percent statewide from a year before. Cash recipient percent increase most notably occurred in the Eastern WIA, where it rose 12 percent (+73) from a year before. Growth for the other four WIAs was as follows, North Central +58 (3.6%), Northwest +61 (10.2%), South Central +32 (3.9%) and the Southwest WIA +26 (5.7%) recipients.
- From 2003 to 2009 in the Northwest WIA, the number of SAGA cash recipients increased to 657 (+106 recipients, +19.2%) and the number of medical recipients rose to 5,854 (+2,562 recipients, +77.8%). The Northwest WIA had the second highest combined percentage change over the term. Statewide SAGA cash recipients were down 1.1 percent (-56 recipients) to 4,701. Statewide medical recipients increased by 45.4 percent (+11,645 recipients) to 37,288.
- In 2009, the Northwest WIA accounted for fourteen percent of Connecticut's SAGA cash and sixteen percent of its medical recipients.
- Waterbury accounted for fifty-four percent (3,578 recipients) of the WIA's SAGA recipients (6,511). Danbury (700 recipients, 10.8%) and Torrington (614 recipients, 9.2%) also had significant recipient counts.

#### **Department of Developmental Services Clients**

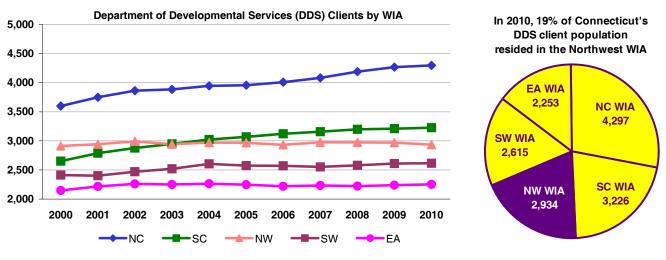

# **Northwest WIA**

- As of June 2010, there were 15,325 active Department of Developmental Services (DDS) clients in Connecticut, an increase of 26 individuals since 2009 and an increase of 1,601 clients since 2000. Among the five workforce investment areas, client number changes from 2009 ranged from an increase of 30 clients in the North Central WIA to a decrease of 38 clients in the Northwest WIA. Of the 15,325 DDS clients in the State of Connecticut, the North Central WIA reported 28% of that population and the Eastern WIA reported the lowest percentage of the population at 15%.
- The North Central (4,297) and South Central (3,226) WIAs had the highest total number of DDS clients among the five areas in June 2010, accounting for forty-nine percent of the statewide total.
- From June 2000 to June 2010, the Northwest WIA reported an increase of 20 (+0.7%) DDS clients. Waterbury (+59), Cheshire (+38) and Watertown (+35) had the area's biggest increase, while Southbury (-213) reported the largest decline. From June 2009 to June 2010, Waterbury (+21 clients) and Southbury (-28 clients) represent the only changes (+/-) greater than 15 in the number of DDS clients.

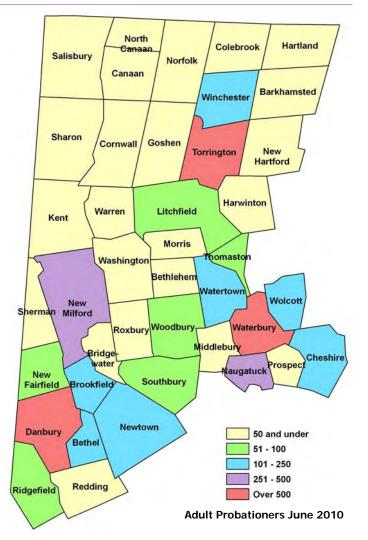

Washington (+1, +25%), Sharon (+1, +25.0%) and Goshen (+1, +20.0%) all experienced DDS client growth rates above 10%. Salisbury (-2, -50.0%), Norfolk (-2, -33.3%) and Barkhamsted (-4, -25.0%) all experienced DDS client rate declines greater than -10%. Nominal scale obviously affected these proportional results.

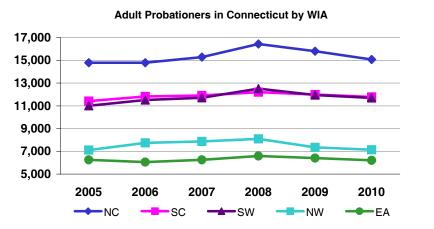

• Forty-eight percent of the total DDS client population in the Northwest WIA (2,934) resided in Waterbury (578), Southbury (509) and Torrington (317) in June 2010.

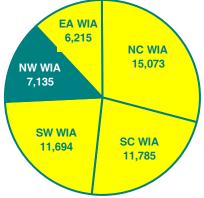

#### **Adult Probationers**

- The number of adult probationers in Connecticut fell to 55,309 in 2010 from 56,901 in 2009. The towns that reported the largest adult probationer populations were Bridgeport (5,197), Hartford (5,057), New Haven (4,588), Waterbury (2,628), and New Britain (1,982). These five towns accounted for thirty-five percent of Connecticut's total number of adult probationers.
- From 2005 to 2010, the Northwest WIA's adult probationer population increased slightly by 24 to 7,135 the second lowest total among the state's five workforce investment areas. During this period, four area towns reported an increase of more than 25 adult probationers: Danbury (+223), Cheshire (+46), Ridgefield (+33) and Bethel (+31); Waterbury (-109), Watertown (-37), Canaan (-36) and Torrington (-33) were the only towns that experienced a decline of at least 25 adult probationers.
- Danbury (+70) was the only Northwest WIA town to experience an increase of at least 20 adult probationers from 2009 to 2010. Conversely, Waterbury (-82), Watertown (-50) and Naugatuck (-30) reported the largest decreases.
- In 2010, three towns had more than 500 adult probationers: Waterbury (2,628), Danbury (1,265) and Torrington (+682), accounting for sixty-four percent of the Northwest WIA's total adult probationer population.

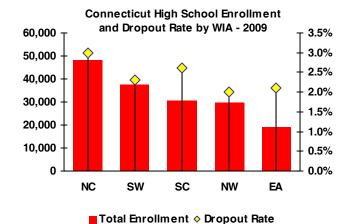

#### **High School Enrollment and Dropout Rates**

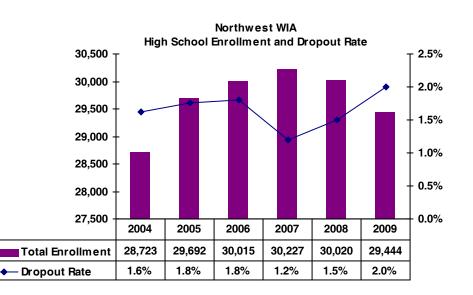

- During the 2008 to 2009 school year, high school enrollment in Connecticut was 174,607, a 693 student decline over the previous year amount of 175,300. This marks the second consecutive year of high school enrollment decline since the 2,400 student gain experienced during the 2006-07 school year. For the fifth consecutive year, the number of dropouts increased (+225) to 4,119 students. The dropout rate rose from 2.2 percent for the 2007-08 school year (SY) to 2.4 percent for the 2008-09SY. This was the largest year-over-year increase since 2000.
- In 2009, enrollment rose by 286 students in Connecticut's Technical High School System to 10,257. The dropout rate among the states technical high school system was only 0.2 percent (22 dropouts) during the 2008-09SY. Since 2004 the dropout rate has never exceeded 0.6 percent.
- Among the states five workforce investment areas, the highest and lowest dropout rates were found respectively in the North Central (3.0%) and Northwest (2.0%) WIAs. The three other WIAs had rates as follows; Eastern 2.1 percent, South Central (2.6) and Southwest (2.3).
- After a decline of 107 students from the 2006-07SY to the 2007-08SY, the Northwest WIA experienced a 556 student decline in enrollment during the 2008-09SY, which stood at 29,444 students. Thirty-six percent of the WIA's enrollment resided in Waterbury (4,315), Danbury (2,925), Ridgefield (1,781) and Newtown (1,704).
- Waterbury (278), Danbury (68) and New Milford (27) had the highest number of dropouts. Regional District 12 (0) and Bethel (2) had the lowest. Waterbury 6.4%, Explorations (Winchester) 5.9% and the Gilbert School (Winchester) 3.8% had the highest dropout rates during the 2008-09 school vear. Bethel (0.0%) and **Regional District 12** (0.0%) had the lowest rates.

# Northwest WIA high school districts with over 1,500 students

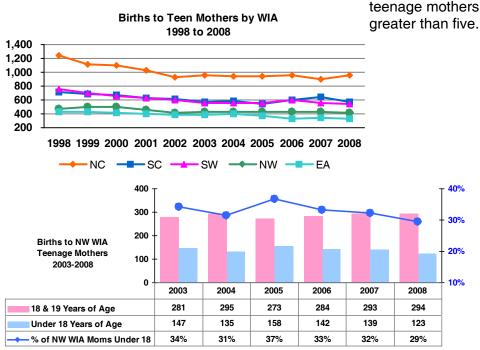

SYE* 2009	Total	Dro	pouts

\* School Year Ending

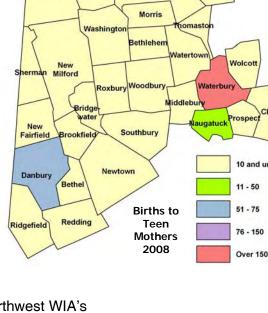

- In 2008, the total number of births to teenage mothers dropped to 2,817 in Connecticut. This is a 2% decline from the previous year, and a 16% (533) decline from 2000. From 2000 to 2008, births to teens under 18 years of age fell by 272 (-24%) to 872, and for teens between 18 and 19 vears of age the number declined by 261(12%) to 1,945 births. In 2008, fifty percent of the statewide total number of births to teenage mothers was reported in Hartford (415), Bridgeport (318), New Haven (278), Waterbury (251) and New Britain (159).
- The North Central WIA reported 961 births to teen mothers in 2008, accounting for thirty-four percent of the statewide total. The South Central (565) and Southwest (543) accounted for twenty percent and nineteen percent, respectively. The Northwest WIA (417) represented fifteen percent, and twelve percent were recorded in the Eastern WIA (331).
- From 2007 to 2008, four of the five WIAs experi-• enced a decrease in births to teenage mothers. The largest decrease was in the South Central WIA (-79), followed by the Southwest (-20), the Northwest (-15), and the Eastern (-7) WIAs. The North Central WIA (+66) was the only area to experience an increase in births to teen mothers.
- Waterbury (251) and Danbury (66) reported the Northwest WIA's • highest number of births to teenage mothers in 2008, accounting for seventy-six percent of the area's total. There were no towns in this area that experienced either an increase or decrease of births to

Information by county and labor market area is available online: www.ct.gov/dol Labor Market Information

# From 2007 to 2009, ninety-eight percent of the worksites in the Northwest WIA were employers with less than 100 employees, accounting for sixty-four percent

# Industry Employment Concentration Northwest WIA relative to Connecticut and the U.S.

These figures reflect the importance of various industries to the economy of an area, in terms of the number of jobs they provide, compared with their significance to the State and Nation. Specifically, they measure the concentration of an industry's employment in a local area relative to the larger areas. A ratio above 1.0 indicates that an industry may be more important to the area than to the State or Nation as a whole. For example, if an industry provides 3.0 percent of local area jobs and 1.5 percent of State jobs, its local employment concentration ratio would be 2.0, revealing twice the concentration of jobs in that industry in the local area than exists in the State overall. This may uncover smaller industries that make relatively significant contributions to the local economy, representing both a source of economic strength to the area and a potential vulnerability if an economic turn affects those industries. In the Northwest WIA, the concentration of employment in the mining industry is over three times its share of employment statewide and nationwide.

<sup>1</sup> Number of persons (unduplicated) includes those receiving mental health or addiction services or both through Department of Mental Health and Addiction Services (DMHAS) operated or funded programs. Includes all DMHAS services such as clinical (e.g., treatment including evaluation/assessment) and supportive (e.g., housing services, employment/vocational). Also included are persons served in DMHAS' Problem Gambling Services program. Not included are individuals receiving prevention services.

<sup>2</sup> Based upon client's most current ZIP code as reported to DMHAS. Some ZIP codes include more than one town, e.g., Town of Union is included in a Stafford ZIP Code.

<sup>3</sup> Statewide totals include persons with out-of-state or unknown ZIP codes.

<sup>4</sup> State Fiscal Year is July 1 through June 30

\* Excludes government

Size Class is determined by the number of employees at a worksite.

NOTE: The sum of the areas is less than the statewide total because some firms only report statewide employment and are not included in the area data.

#### Source: Connecticut Department of Labor, Office of Research

Information by county and labor market area is available online: www.ct.gov/dol Labor Market Information

#### From 2007 to 2009, ninety-eight percent of the worksites in Connecticut were employers with less than 100 employees, accounting for fifty-seven percent of the state's total annual employment.

## Employment and Wages by Industry ~ 2009 Annual Average

#### **Connecticut Occupational Wages and Estimated Employment**

The mid-wage is the median wage. The average wage is the mean wage. The entry-level wage is equal to the average of the lower third of reported wages for the occupation. Source: Connecticut Department of Labor, Office of Research, Occupational Employment, 2Q2010

- More than half (52%) of Connecticut's jobs are concentrated in five major occupational categories (excl. Mgmt.): Office and Administrative Support, Sales and Related, Education, Training, and Library, Food Preparation and Serving-Related, and Production. Among these five categories, workers in the Education, Training, and Library earned the highest wages.
- Workers in 11 of Connecticut's 22 major occupational categories earn an annual average wage of at least \$50K/year.
- Entry level wages of below \$10/hour are predominate in five of the 22 occupational categories: Personal Care and Service, Food Preparation and Serving-Related, Sales and Related, Building/Grounds Cleaning and Maintenance, and Transportation and Material Moving.
- Entry level wages of more than \$20/hour are predominate in six of the 22 occupational categories: Healthcare Practitioners and Technical, Business and Financial Operations, Legal, Architecture and Engineering, Computer and Mathematical, and Management.

Per Capita Personal Income, Median Family	y Income, and Median Household Income
---	---------------------------------------

r revised

\* 2008

#### SOURCE:

Per Capita Income: U.S. Bureau of Economic Analysis Median Family and Household Income: U.S. Census Bureau, 2008 American Community Survey

#### Per capita personal income

This measure of income is calculated as the total personal income of the residents of an area divided by the population of the area. Per capita personal income is often used as an indicator of consumers' purchasing power and of the economic well-being of the residents of an area.

- The population of Connecticut in 2009 was 3,493,006. Its rank was 29th in the nation.
- In 2009 Connecticut had a per capita personal income (PCPI) of \$54,397. This PCPI ranked 1st in the U.S. and was 139 percent of the national average of \$39,138. The 2009 PCPI reflected a decrease of one percent from 2008. The 2008-2009 national change was -2.6 percent.
- In 1999 the PCPI of Connecticut was \$38,718 and ranked 1st in the United States. The 1999-2009 average annual growth rate of Connecticut PCPI was 3.5 percent. The average annual growth rate for the nation was 3.3 percent.

#### Family household (Family)

A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

#### Household

A household includes all the people who occupy a housing unit as their usual place of residence.

Source: Connecticut Department of Labor, Performance and Accountability Unit

**Base Period:** A selected period of time, frequently one year, against which changes to other points in time are calculated *(also see Index Number).* 

**Benchmarking:** The process of re-estimating statistics as more complete data become available. Estimates are usually calculated using only a sample of the universe (total count). Therefore, benchmarking allows for correction of estimating errors. New benchmarking levels are introduced on an annual basis.

**Covered Employment:** Employment in any industry insured under the provisions of the Connecticut Unemployment Compensation Law.

**Current Population Survey:** A national household survey conducted each month by the Census Bureau for the U.S. Bureau of Labor Statistics. Information is gathered from a sample of about 60,000 households (1,200 in Connecticut) designed to represent the civilian non-institutional population of persons 16 years of age and over.

**Discouraged Workers:** Persons not included in the unemployment count who say they did not look for work because they think none is available, or they believe they lack the skills necessary to compete in the labor market.

Dislocated Worker: As defined under the Workforce Investment Act of 1998, an individual who: 1. (a) has been terminated or laid off, or received notice of same; (b) is eligible for or has exhausted entitlement to unemployment compensation, or has demonstrated attachment to the workforce but is not eligible for unemployment compensation; and (c) is unlikely to return to a previous industry or occupation. 2. (a) has been terminated or laid off, or has received notice of same, as a result of permanent closure or substantial layoff at a plant, facility or enterprise; or (b) is employed at a facility at which employer has made a general announcement that such facility will close within 180 days; (c) for purposes of receiving certain services, is employed at a facility at which the employer has made a general announcement that such facility will close; (d) was self-employed but is unemployed as a result of general economic conditions in the community in which the individual resides or because of natural disasters; (e) is a displaced homemaker.

**Displaced Homemaker:** An individual who has been providing unpaid services to family members in the home and who: (a) has been dependent on the income of another family member but is no longer supported by that income; and (b) is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

**Durable Goods:** Items with a normal life expectancy of three years or more. Automobiles, furniture, household appliances, and mobile homes are examples. Because of their nature, expenditures for durable goods are generally postponable. Thus, durable goods sales are the most volatile component of consumer expenditures.

**Employed Persons:** Those individuals who are 16 years of age and over who worked for pay any time during the week which includes the 12th day of the month, or who worked unpaid for 15 hours or more in a family-owned business, and individuals who were temporarily absent from their jobs due to illness, bad weather, vacation, labor dispute, or personal reasons. Excluded are persons whose only activity consists of work around the house and volunteer work for religious, charitable, and similar organizations.

**Employment Concentration:** Industry Employment Concentration, or Location Quotient reflects the importance of an industry to the economy of a geographical area, in terms of the number of jobs it provides. It is a calculated ratio that determines whether or not the local economy has a greater share of that industry than expected. This publication uses Location Quotients to compare workforce investment area employment by industry relative to Connecticut. A Location Quotient of greater than 1.0 indicates a higher level of employment concentration in an area, while a Location Quotient of 2.0 shows that an industry has twice the employment concentration in that area relative to Connecticut as a whole.

**Establishment:** An economic unit such as a farm, mine, factory, or store, which produces goods or provides services. It is usually at a single physical location and engaged in one predominant type of economic activity.

**Family:** A group of two or more people who reside together and who are related by birth, marriage, or adoption.

**Farm Employment:** Persons who work as owners and operators of farms, as unpaid family workers on farms, or as hired workers who are engaged in farm activities.

Full-Time Employment: Employment of 35 or more hours per week.

**Household:** A household includes all the people who occupy a housing unit as their usual place of residence.

**Housing Permits:** Counted by the Bureau of the Census, new housing permits include permits issued for all new privately owned, attached and detached single-family houses.

**Index Number:** A measure of the relative changes occurring in a series of values compared with a base period. The base period usually equals 100, and any changes from it represent percentages. By use of an index number, large or unwieldy data, such as sales in thousands of dollars or costs in dollars and cents, are reduced to a form in which they can be readily understood.

**Industry:** A generic term for a distinct group of economic activities. Industries are described and classified by their primary activity or product.

**Initial Claim:** A notice filed by a worker, at the beginning of a period of unemployment, requesting a determination of insured status for jobless benefits.

Labor Force: All persons 16 years of age and over who are classified as employed, unemployed and seeking employment, or involved in a labor-management dispute. The labor force does not include persons who never worked a full-time job lasting two weeks or longer and "discouraged workers" who have been unemployed for a substantial length of time and are no longer actively seeking employment. Members of the armed forces stationed either in the United States or abroad are counted by their place of residence. The civilian labor force excludes members of the armed forces and the institutionalized population.

**Labor Force Participation Rate:** The proportion of the total civilian non-institutional population or of a demographic subgroup of that population classified as "in the labor force."

**Labor Market Area (LMA):** As defined by the U.S. Bureau of Labor Statistics, an economically integrated geographic area within which individuals can reside and find employment within a reasonable distance or can readily change employment without changing their place of residence.

**Labor Market Information (LMI):** The body of information that deals with the functioning of labor markets and the determination of the demand for and supply of labor. It includes, but is not limited to, such key factors as changes in the level and/or composition of economic activity, the population, employment and unemployment, income and earnings, wage rates, and fringe benefits.

Labor Surplus Area: A civil jurisdiction where the average unemployment rate is at least 20 percent above the average unemployment for all states, or its unemployment during the previous two calendar years was ten percent or more. The designation allows establishments in the area preference in bidding for certain federal contracts.

**Location Quotients:** Measures an industry's concentration or specialization in one geographical area relative to a larger area (also see *Employment Concentration*).

**Manufacturing:** Includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power-driven machines and materials handling equipment. The new product of a manufacturing establishment may be "finished" in the sense that it is ready for utilization and consumption, or it may be "semi-finished" to become a raw material for an establishment engaged in further manufacturing.

Median: The middle value or midpoint between two

middle values in a set of data arranged in order of increasing or decreasing magnitude. As such, one-half of the items in the set are less than the median and one-half are greater.

**Median Income:** The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median. For households and families, the median income is based on the distribution of the total number of households and families, including those with no income.

**Metropolitan Statistical Area (MSA):** The general concept of a Metropolitan Statistical Area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. Connecticut currently has seven Metropolitan Statistical Areas, as defined by the federal Office of Management and Budget.

**Money Income:** Census-based money income is derived from a sample of individuals 15 years of age and older, and consists only of income that is received by individuals in cash and its equivalents.

**Nondurable Goods:** Items that generally last for only a short period of time (three years or less). Food, beverages, apparel, and gasoline are common examples. Because of their nature, nondurable goods are generally purchased when needed.

**Nonfarm Employment:** The total number of persons on establishment payroll employed full- or part-time who received pay for any part of the pay-period which includes the 12th day of the month. Temporary and intermittent employees are included, as are any workers who are on paid sick leave, on paid holiday, or who work during only part of the specified pay period. A striking worker who only works a small portion of the survey period, and is paid, is included. Persons on the payroll of more than one establishment are counted in each establishment. Data exclude proprietors, self-employed, unpaid family or volunteer workers, farm workers, and domestic workers. Persons on layoff the entire pay-period, on leave without pay, on strike for the entire period or who have not yet reported for work are not counted as employed.

**Occupation:** A name or title of a job that identifies a set of activities or tasks that employees are paid to perform. Employees that perform essentially the same tasks are in the same occupation, whether or not they are in the same industry. Some occupations are concentrated in a few particular industries, other occupations are found in the majority of industries.

**Part-Time Employment:** As defined by the U.S. Bureau of Labor Statistics, employment in which a worker is regularly scheduled to work fewer than 35 hours a week.

**Per Capita Personal Income:** The annual total personal income of residents divided by resident population as of July 1st of current year.

**Personal Income:** Measures the net earnings, rental income, personal dividend income, personal interest income, and transfer payments by place of residence before the deduction of personal income taxes and other personal taxes. Reported in current dollars.

**Private Household Workers:** Persons who work for profit or fees in private households such as child care workers, cooks, housekeepers or other household staff.

**Production Worker:** Employees, up through the level of working supervisor, who are directly engaged in the manufacture of the product of an establishment. Among those excluded from this category are persons in executive and managerial positions and persons engaged in activities such as accounting, sales, advertising, routine clerical work, and professional and technical functions.

**SAGA (State-Administered General Assistance):** Provides cash, medical, and emergency assistance to persons who do not qualify for federal and state assistance programs, such as Supplemental Security Income (SSI), Temporary Family Assistance (TFA), and Medicaid.

**Seasonal Adjustments:** The adjustment of time-series data to eliminate the effect of intra-year variations that tend to occur each year in approximately the same manner. Examples of such variations include school terms, holidays, and yearly weather patterns.

**Seasonal Industry:** An industry in which activity is affected by regularly recurring weather changes, holidays, vacations, etc. The construction and recreational industries are typically characterized as "seasonal."

**Self-Employed Workers:** Persons who work for profit or fees in their own business, profession, trade, or farm. Self-employed persons whose businesses are incorporated are included among wage and salary workers, because technically, they are paid employees of a corporation.

**Underemployed:** Persons working full- or part-time in jobs that are below their earning capacity or level of competence. The terms "underemployed" and "underutilized" are used interchangeably. Underemployment has also been defined as "involuntary part-time" employment or employment of a person on a part-time basis when full-time work is desired.

**Unemployed:** Persons who, during the survey week, had no employment but were available for work and: (a) had engaged in any job-seeking activity within the past four weeks, i.e. registered at a public or private employment office, met with prospective employers, checked with friends or relatives, placed or answered advertisements, wrote letters of application, or was on a union or professional register; (b) were waiting to hear back from a job which they had been laid off; or (c) were waiting to report to a new wage/salary job within 30 days. **Unemployment Rate:** Represents the number unemployed as a percent of the labor force. The seasonally adjusted unemployment rate eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, etc., and therefore, more clearly shows the underlying basic trend of unemployment.

Units: (see Establishment)

**Workforce Investment Act (WIA) of 1998:** Represents significant changes to federal statutes governing programs of job training, adult education and literacy, and vocational rehabilitation in order to establish a coordinated, streamlined and more flexible workforce development system. It is a revitalized system that focuses on providing *employers* with skilled workers, and the economic and workforce information they need to conduct business effectively - and on providing *workers* with the information, advice, job search assistance, and training they need to get and keep good jobs.

**Worksite:** A worksite is an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed (e.g. factory, mill, store, hotel, restaurant).
