## CONNECTICUT LABOR MARKET INFORMATION

### Connecticut Labor Situation

Highlights changes from both a month and a year earlier in unemployment, nonfarm employment, and changes over-the-year for manufacturing wages and hours for the State and its nine labor market areas. Other economic indicators for CT, such as seasonally adjusted nonfarm employment, average weekly initial claims for unemployment insurance, the unemployment rate, and average manufacturing weekly hours, are listed by month for the entire previous year up to the current period.

### Connecticut Economic Digest

Every month the Economic Digest provides the most current economic data available for Connecticut. Decision-makers from many arenas are better informed because the Digest makes it possible to follow the trends and understand the status of economic forces that influence Connecticut's labor markets. We are pleased to continue providing information that is useful in making decisions, setting plans, and engaging in informed conversation.

### Local Area Unemployment Statistics

The LAUS program produces monthly employment, unemployment, and labor force data for Census regions and divisions, States, counties, metropolitan areas, and many cities, by place of residence. A major source of labor force data estimates, the Current Population Survey (CPS) includes a sample of over 1,200 Connecticut households each month regarding the labor force status of their occupants.

### Information for Workforce Investment Planning

Contains a variety of data on Connecticut and each of the state's five WDAs including population and population density, labor force, employment and wages by industry sector, and new housing permits. In addition, detailed information on residents in need of workforce investment services such as high school dropouts, Medicaid recipients, adult probationers, Temporary Family Assistance (TFA) recipients, and other residents with barriers to employment is included. New this year is information on commuting patterns, long-term unemployment insurance claimants, and work area profile for WDAs.
