## PREFACE

The **Connecticut Department of Labor's Office of Research** is the state's leading producer of information and statistics on the economy, workforce, occupations, and careers. Our mission is to produce, analyze, and deliver timely and reliable workforce information and statistics to assist in decision-making for those planning economic development initiatives, for education and training providers, and for job seekers and students who are seeking guidance in making career choices.

In support of these efforts, the Office of Research is pleased to provide the **2011 Information for Workforce Investment Planning**. This publication contains a variety of data on Connecticut and each of the state's five Workforce Investment Areas including population and population density, labor force, employment and wages by industry sector, and new housing permits. In addition, detailed information on residents in need of workforce investment services such as high school dropouts, Medicaid recipients, adult probationers, Temporary Family Assistance (TFA) recipients, and other residents with barriers to employment is included. New this year is information on commuting patterns, long-term unemployment insurance claimants, and a work area profile for each WIA.

The **2011 Information for Workforce Investment Planning** also includes appendix tables and historical data on the aforementioned topics for comparisons and trends analysis.

Data sources are cited on each appendix table, which includes other State agencies, the Connecticut Department of Labor and the U.S. Census Bureau. We wish to thank all of the data providers for their contribution to this year's publication. The charts and tables in the **2011 Information for Workforce Investment Planning** are within the public domain, and may be copied and/or quoted. However, we do request that you attribute such material to this publication.

We hope that you find the **2011 Information for Workforce Investment Planning** an effective data source for your planning needs.

## ACKNOWLEDGMENTS

**Director:** Andrew Condon

**Managing Editors:** Sarah York, Economist  
Matthew Krzyzek, Economist

We would like to thank the following Department of Labor and Office of Research staff who provided data and editorial assistance for this publication: Diana Arbelaez, Todd Bentsen, Edward Doukas, Patrick Flaherty, Jungmin Joo, Doreen LeBel, Linda Mothersese, Dana Placzek, Michael Polzella, Manisha Srivastava and Mark Stankiewicz.

## Connecticut

- From 2000 to 2010 Connecticut's population increased by 168,490 residents, from 3,405,607 to 3,574,097.
- Danbury, New Haven and Mansfield had the largest percent share of this statewide population growth.
- Statewide population density increased by 5 percent over the period.
- The Eastern WIA had the largest population density increase of the five WIAs, rising 7.7 percent over the term.

## Northwest WIA

- The Northwest WIA experienced a ten-year population increase of 27,959, from 571,639 to 599,598 residents.
- The towns with the largest ten-year population increases were Danbury, Waterbury and Newtown.
- Waterbury was the most densely populated town with 3,863 persons per square mile.
- Cornwall was the least densely populated at 30.9 persons per square mile.
- The towns with the largest percent increase in population density were Middlebury, Warren and New Hartford.

\*\*Denotes population density increase from 2000-10

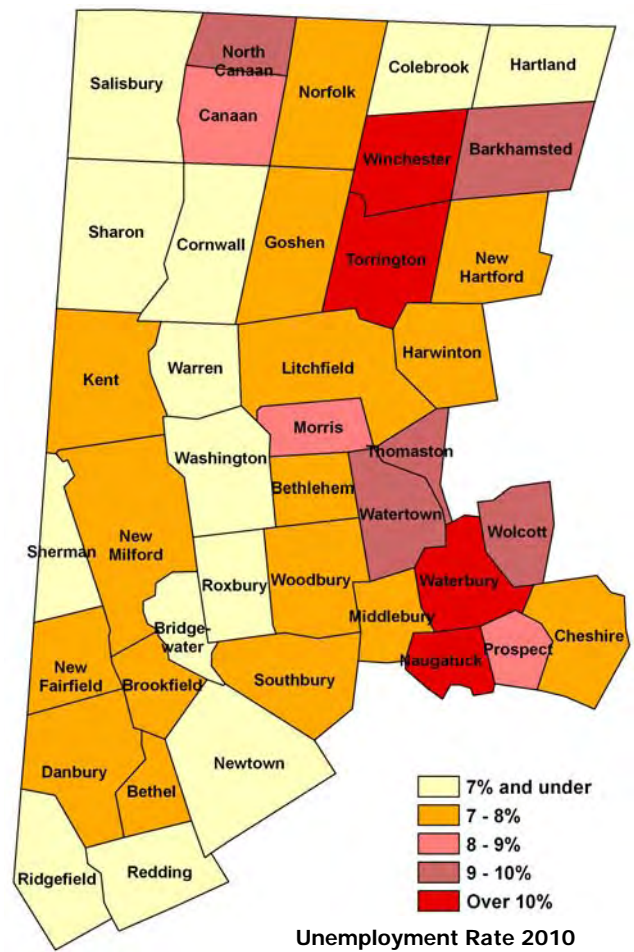

See Also Appendix Tables and Maps on Pages 16 and 33

**Connecticut**

- Connecticut’s annual average labor force increased by 10,600 to 1,897,400 from 2009 to 2010.
- During this period, the state’s annual average unemployment rate rose from 8.3% in 2009 to 9.1% in 2010.
- This year-over-year rate increase resulted in a 16,700 unemployment rise, from 156,700 in 2009 to 173,400 in 2010.

**Northwest WIA**

- The Northwest WIA’s highest unemployment rate of 14.5 percent was found in Waterbury.
- The town of Colebrook had the WIA’s lowest unemployment rate of 4.6 percent in 2010.
- From 2009 to 2010, the towns of Kent, Naugatuck and Winchester had the largest percentage point increases in unemployment.
- Thomaston, Harwinton and Ridgefield all experienced unemployment rate decreases.

10 Largest Northwest WIA Labor Forces in 2010

Connecticut Labor Force Composition

See Also Appendix Tables on page 17, 34 and 35

## Connecticut

- From 2009 to 2010, Connecticut lost 19,305 jobs.
- The largest growth industry was Educational and Health Services, with an increase of 4,126 jobs.
- The largest job loss came from the Manufacturing industry, with a decrease of 5,570 jobs.

In 2010, the NW WIA accounted for 13% of Connecticut's total employment

## Northwest WIA

- From 2009 to 2010, the Northwest WIA lost 2,948 jobs.
- The largest growth industry was Educational and Health Services, with an increase of 660 jobs.
- The largest job loss came from the Government sector, with a decrease of 786 jobs.

Educ. & Health Svcs. had the highest employment gain; and Manufacturing saw the biggest job loss from 2002-10

### Annual Average Employment by Industry

In 2010, over half (56%) of the NW WIA's total employment was in the Trade, Transportation & Utilities; Educational & Health Services; and Government sectors.

\* The 'Other Services' (except Public Admin.) sector includes a wide range of employment establishments engaged in activities such as automotive & equipment repair/maintenance; religious or political advocacy activities; dry-cleaning/laundry, personal, death, or pet care services; and private household services.

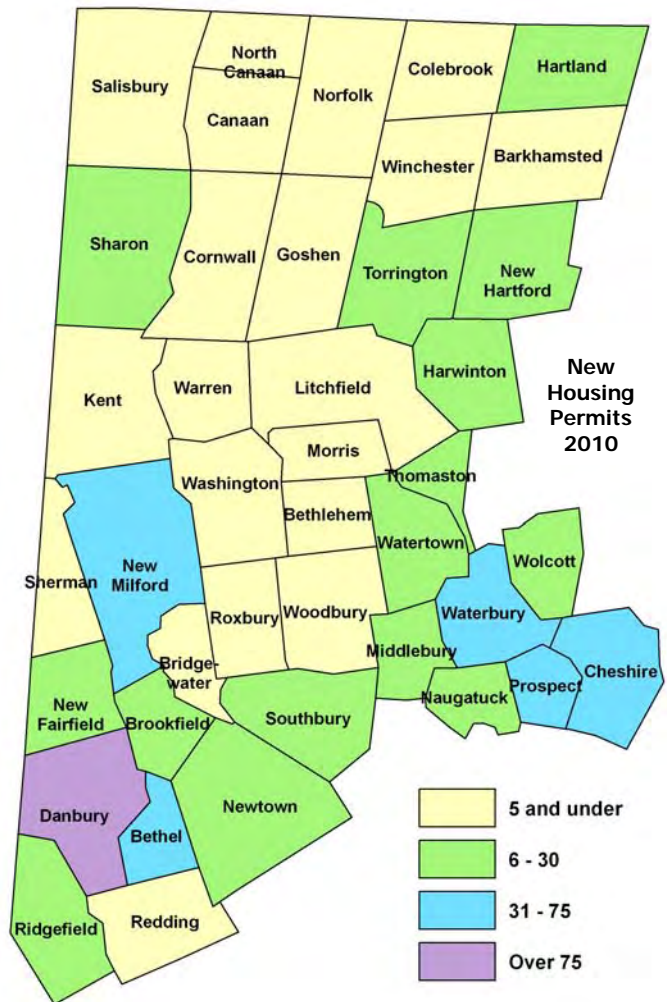

See Also Appendix Tables and Maps on Pages 20-22 and 37-39

**Connecticut**

- In 2010, Connecticut issued 3,932 new housing permits; an increase of 146 from 2009.
- Since the peak in 2005, the number of new housing permits has declined by 67%.
- The South Central WIA is the only area that experienced an over-the-year increase in permits.

**Northwest WIA**

- The Northwest WIA issued 572 new housing permits in 2010, 70 fewer than in 2009.
- Danbury (128), Bethel (65) and Prospect (48) reported the highest number of permits.
- The town of New Milford (+24) had the largest increase from 2009 in the area.

In 2010, 27% of Connecticut's total new housing permits were issued in the Northwest WIA

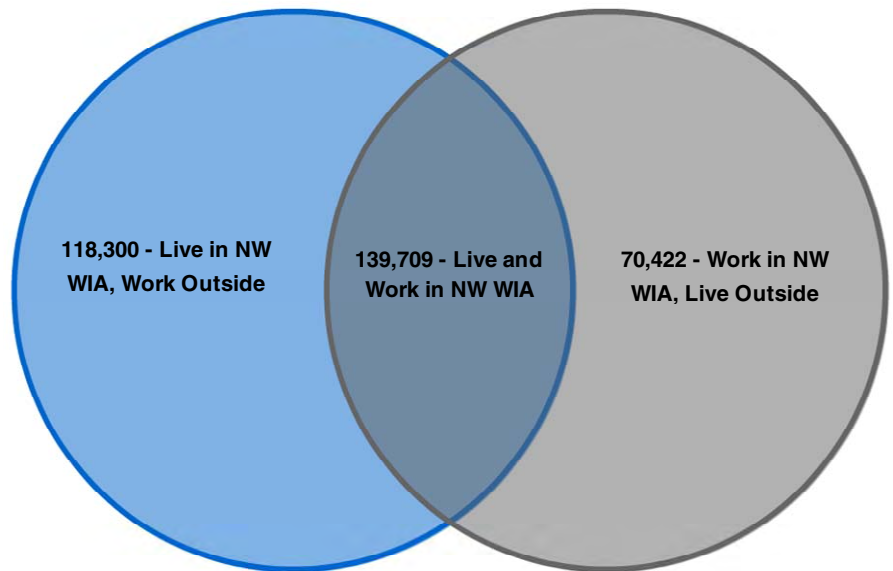

See Also Appendix Table on Page 23

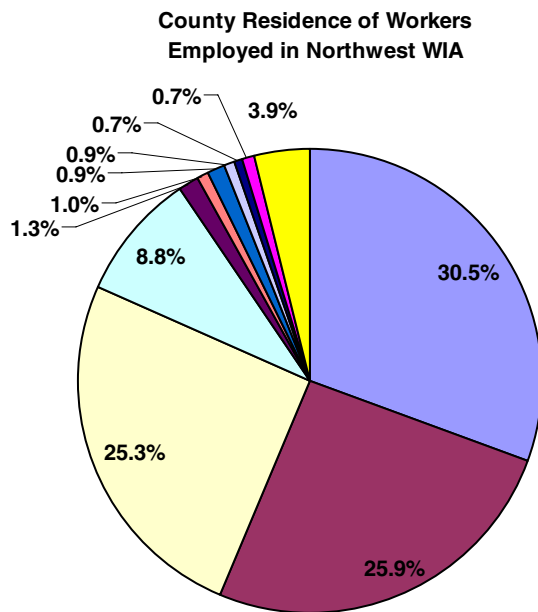

Northwest WIA

- In 2009, 258,009 Northwest WIA residents were working; 46 percent had jobs located outside the WIA.
- Of the 210,131 people who worked in the Northwest WIA, 34 percent were non-residents.
- The majority of those that worked in the Northwest WIA lived in New Haven County.
- Of the five WIAs, the Eastern WIA had the largest proportion of non-resident workers.

**Connecticut**

- The number of Temporary Family Assistance (TFA) recipients in Connecticut increased by 2,705 to 41,442 in 2010 from the year before.
- This increase follows the 2001-09 period where recipient levels fell by 22,104 from 60,841 in 2001.

**Northwest WIA**

- Fifteen percent of Connecticut's total TFA population lived in the Northwest WIA (6,354 recipients) in 2010, among which sixty-seven percent lived in Waterbury.
- From 2009 to 2010, the majority of the Northwest WIA's 556 recipient increase occurred in Waterbury, Danbury and Torrington.
- Northwest town TFA decreases from 2009 to 2010 occurred most notably in North Canaan, Middlebury and Watertown.

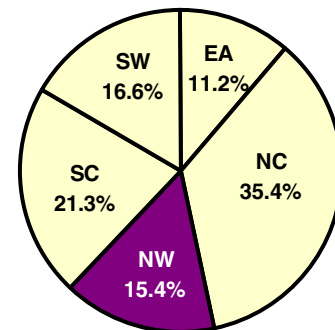

TFA Recipients in the Northwest WIA

TFA Recipients in Connecticut

2010 Connecticut TFA Recipients by WIA

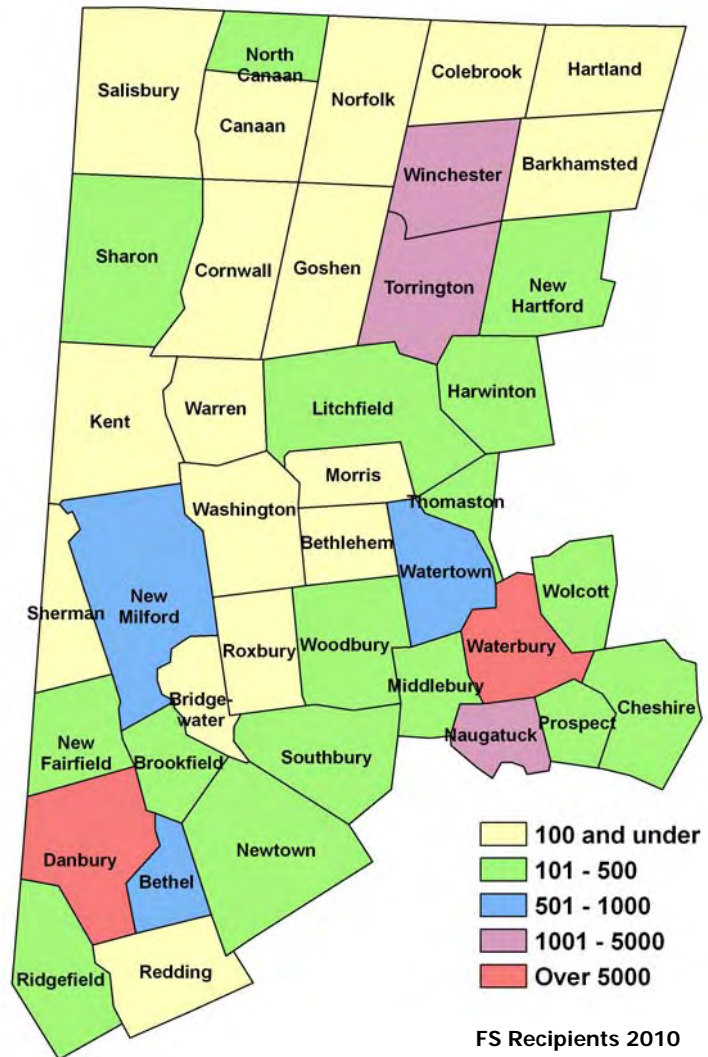

See Also Appendix Table on Page 24

**Connecticut**

- From 2009 to 2010, the total number of Food Stamp (FS) recipients in Connecticut increased by 71,151 to 298,856, more than triple the previous year-over-year increase of 22,111 recipients.
- The North Central WIA had the largest year-over-year nominal increase in FS recipients (+21,463), followed by the South Central (+14,418), Southwest (+13,582), Northwest (+11,617) and Eastern (+10,069) WIAs.

**Northwest WIA**

- Sixteen percent of Connecticut's total FS population resided in the Northwest WIA (47,388 recipients) in 2010, among which 78 percent lived in Waterbury, Danbury and Torrington.
- The towns with the largest over-the-year food stamp recipient increases occurred in Waterbury, Danbury and Torrington.
- The smallest growth occurred in Warren, North Canaan and Colebrook. Note: variance in population size effectively skews percent change.

Connecticut Food Stamp Recipients 2001-10

Connecticut's Total Food Stamp Recipient Population By WIA

See Also Appendix Table on Page 24

**Connecticut**

- From 2009 to 2010, the total number of State Supplement recipients (SSR) in Connecticut remained largely unchanged, rising by 6 to 14,939.
- 2010 is the third straight year of relatively flat SSR change (see Graph below) that followed a seven-year decline from a high of 22,952 in 2001 to 14,868 recipients in 2008.
- The Northwest WIA, rising by 36 recipients, had the largest increase and the North Central WIA, falling 53 recipients, had the largest decline.

**Northwest WIA**

- The Northwest WIA experienced an increase of 36 recipients since 2009.
- Sixteen percent of Connecticut's total SSR population resided in the Northwest WIA (2,368 recipients) in 2010, among which sixty-three percent resided in Waterbury, Torrington and Danbury.

- Waterbury, Newton, Torrington and Cheshire had the largest increases in 2010.
- Thomaston and Danbury had the WIA's largest decreases.

In 2010, 16% of Connecticut's SSR Population Lived in the Northwest WIA

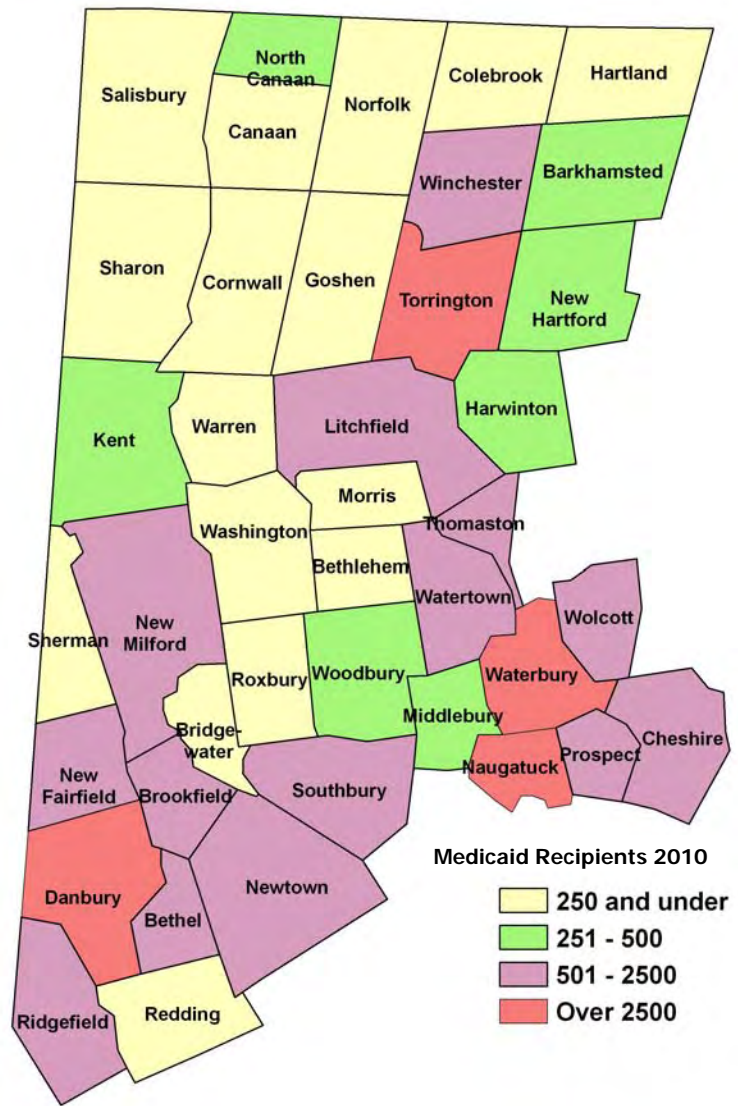

See Also Appendix Table on Page 25

**Connecticut**

- Connecticut’s Medicaid population increased by 100,752, from 367,124 in 2009 to 467,876 in 2010.
- Each of the state’s five WIAs experienced a year-over-year increase.

**Northwest WIA**

- Seventeen percent of the state’s total Medicaid population resided in the Northwest WIA (78,066 recipients) in 2010, among which fifty-nine percent resided in Waterbury and Danbury.
- The largest increases in the number of recipients occurred in Waterbury, Danbury and Torrington.

Medicaid Recipients - By WIA

Medicaid Recipients in Connecticut

See Also Appendix Table on Page 25

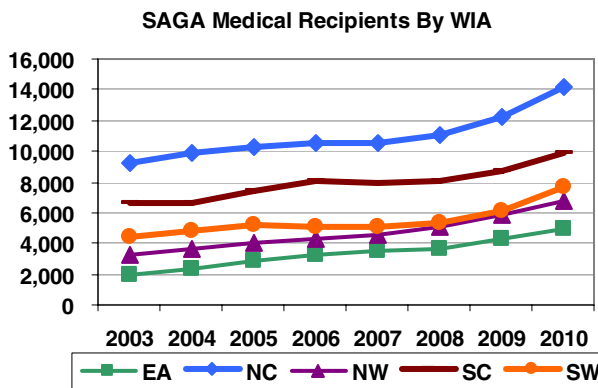

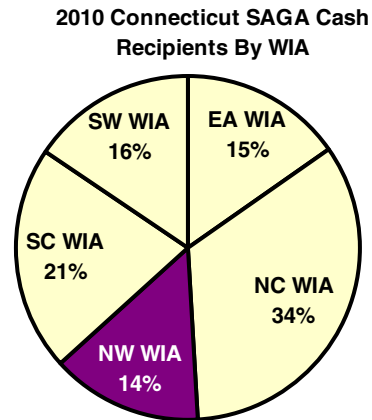

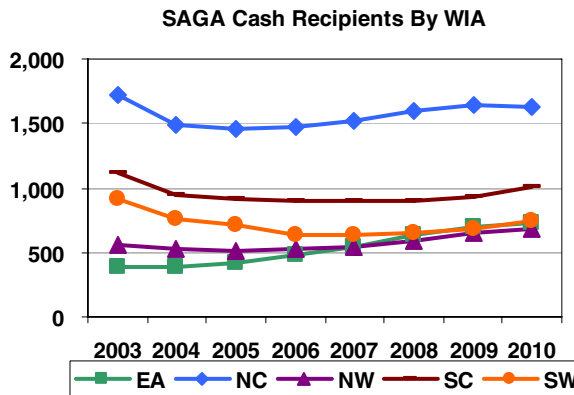

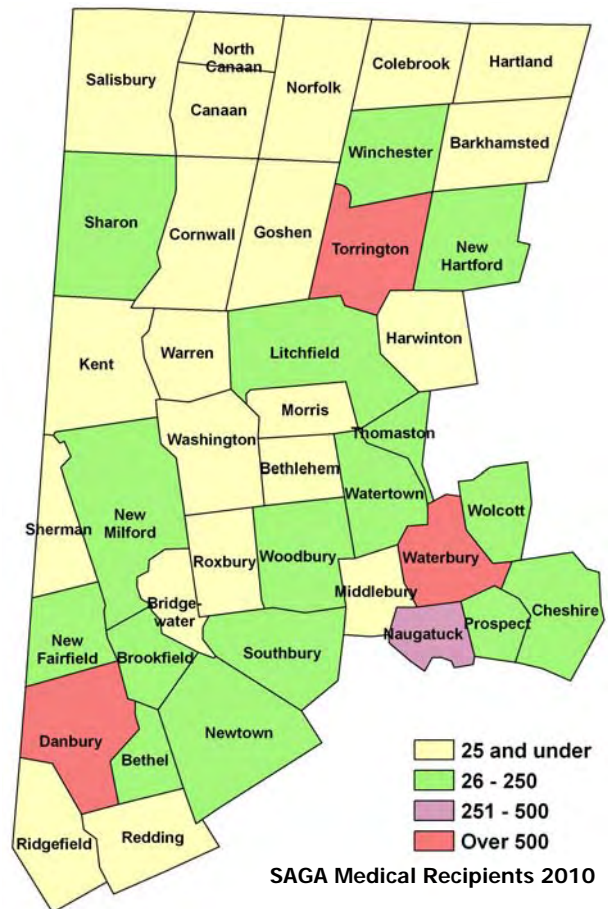

**Connecticut**

- The number of the combined State Administered General Assistance (SAGA) recipients increased by 6,312 from 2009 to 2010.
- Cash recipients increased by 168 and medical recipients increased by 6,144.

**Northwest WIA**

- Northwest WIA cash recipients increased by 32 from 2009.
- From 2008 onward, the Northwest WIA has had the lowest number of cash recipients.
- Medical recipients grew by 866 from 2009.
- Seventy-four percent of the Northwest WIA’s combined cash and medical SAGA population lived in Waterbury, Danbury and Torrington.

See Also Appendix Table on Page 26

**Connecticut**

- As of June 2011, there were 15,471 active Department of Developmental Services (DDS) consumers in Connecticut, an increase of 146 since 2010.
- The number of consumers have increased by 10% since 2001.

**Northwest WIA**

- The Northwest WIA had 2,957 consumers in June 2011, a drop of 15 since 2010.
- Waterbury (578) and Southbury (509) had the largest DDS consumer population in the area.
- Waterbury (+21) had the largest over-the-year increase in DDS consumers.
- Southbury (-28) had the largest over-the-year decrease in DDS consumers.

In 2011, 19% of Connecticut's DDS consumer population resided in the Northwest WIA

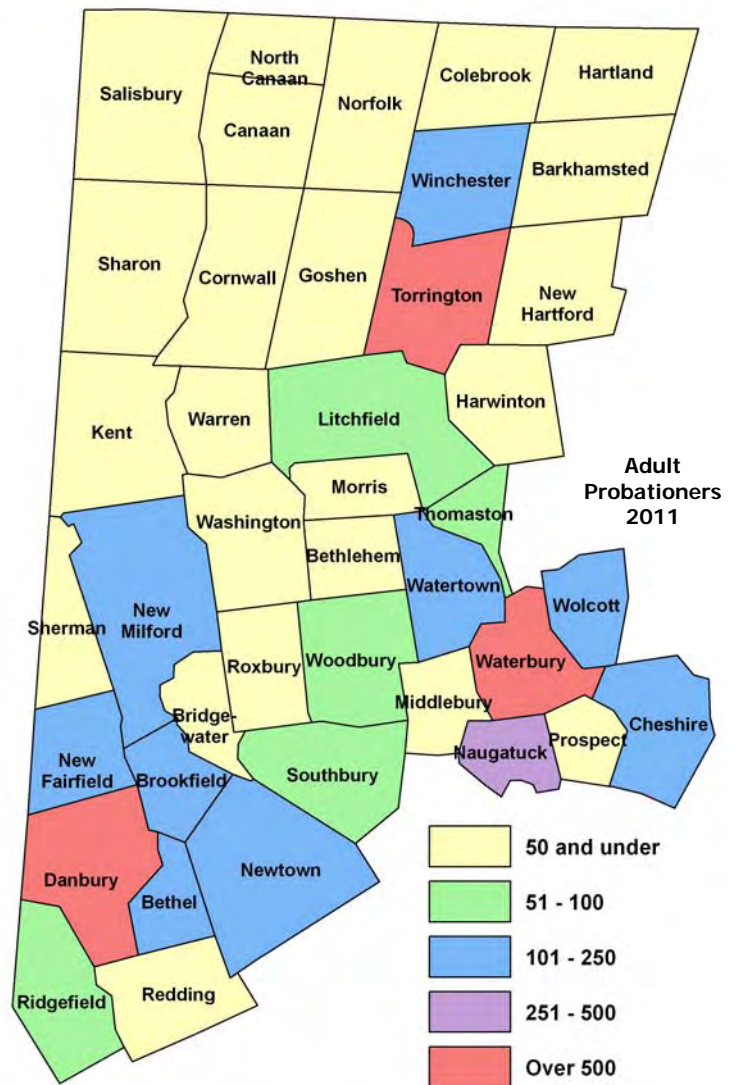

See Also Appendix Table on Page 27

## Connecticut

- In August 2011, there were 51,152 adult probationers in Connecticut, a decrease of 4,157 from 2010.
- All five WIAs experienced an over-the-year decrease in their adult probationer population.

## Northwest WIA

- The Northwest WIA had 6,372 adult probationers in 2011, down 763 from 2010.
- Waterbury (2,272), Danbury (1,190) and Torrington (559) accounted for 63% of the area's probationers.
- Canaan (+22) had the largest over-the-year increase of adult probationers.
- Waterbury (-356) had the largest over-the-year decrease of adult probationers.

As of August 2011, 12% of Connecticut's total number of adult probationers resided in the Northwest WIA

See Also Appendix Table on Page 29

## Connecticut

- Statewide high school student enrollment for the 2009-10 school year was 170,717, a 2.6 percent decrease over the previous school year.
- The number of dropouts fell 12.1 percent during this period to 3,621 from 4,119.
- Connecticut's Technical High School System experienced minor change in enrollment and dropout rates over-the-year, its student enrollment increasing by 212 to 10,469 and dropouts increasing by 4 students.

## Northwest WIA

- The Northwest WIA had 29,629 high school students enrolled during the 2009-10 school year, with 694 recorded dropouts.
- The WIA's 2.3 percent dropout rate was a slight increase over the previous school year's 2 percent rate.
- Waterbury had the highest dropout rate of the WIA's 26 districts.

10 Largest Northwest WIA School Districts

2009-10 School Year	Total Enrollment	Dropouts	
		#	%
Waterbury	4,523	363	8.03
Danbury	2,943	122	4.15
Ridgefield	1,753	**	**
Newtown	1,731	8	0.46

New Fairfield	1,020	**	**
Brookfield	1,016	13	1.28

\*\* Dropout Levels Below 5 Students are Subject to Confidentiality Withholding

See Also Appendix Table on Page 30

## Connecticut

- In 2009, there were 2,630 births to teenage mothers, the lowest amount in the past decade.
- Thirty percent of the births were to teenagers younger than 17.

## Northwest WIA

- In the Northwest WIA, there were 397 births to teenage mothers in 2009.
- Waterbury (243) and Danbury (54) had the highest number of births.
- Wolcott (+5) had the largest over-the-year increase in births.
- Danbury (-12) had the largest over-the-year decrease in births.

Births to Teen Mothers by WIA 2009

	2004	2005	2006	2007	2008	2009

## Industry Employment Concentration Northwest WIA relative to Connecticut and the U.S.

These figures reflect the importance of various industries to the economy of an area, in terms of the number of jobs they provide, compared with their significance to the State and Nation. Specifically, they measure the concentration of an industry's employment in a local area relative to the larger areas. A ratio above 1.0 indicates that an industry may be more important to the area than to the State or Nation as a whole. For example, if an industry provides 3.0 percent of local area jobs and 1.5 percent of State jobs, its local employment concentration ratio would be 2.0, revealing twice the concentration of jobs in that industry in the local area than exists in the State overall. This may uncover smaller industries that make relatively significant contributions to the local economy, representing both a source of economic strength to the area and a potential vulnerability if an economic turn affects those industries. In the Northwest WIA, the concentration of employment in the mining industry is over three times its share of employment statewide.

\*Excludes government

Size class is determined by the number of employees at a worksite.

NOTE: The sum of the areas is less than the statewide total because some firms only report statewide employment and are not included in the area data.

The mid-wage is the median wage. The average wage is the mean wage. The entry-level wage is equal to the average of the lower third of reported wages for the occupation. **Source: Connecticut Department of Labor, Office of Research, Occupational Employment 2Q2011**

- Nearly half (49%) of Connecticut's jobs are concentrated in five major occupational categories: Office and Administrative Support, Sales and Related, Education, Training, and Library, Food Preparation and Serving-Related, and Management. Among these five categories, workers in the Management occupation earned the highest wages.
- Workers in 11 of Connecticut's 22 major occupational categories earn an annual average wage of at least \$50K/year.
- Entry level wages of below \$10/hour are predominate in five of the 22 occupational categories: Food Preparation and Serving-Related, Personal Care and Service, Sales and Related, Farming, Fishing, and Forestry and Building/Grounds Cleaning and Maintenance.
- Entry level wages of more than \$20/hour are predominate in seven of the 22 occupational categories: Life, Physical, and Social Science, Healthcare Practitioners and Technical, Business and Financial Operations, Legal, Architecture and Engineering, Computer and Mathematical, and Management.

**Per Capita Income:** U.S. Bureau of Economic Analysis

**Median Family and Household Income:** U.S. Census Bureau, 2010 CPS

**Per capita personal income**

This measure of income is calculated as the total personal income of the residents of an area divided by the population of the area. Per capita personal income is often used as an indicator of consumers' purchasing power and of the economic well-being of the residents of an area.

- The population of Connecticut in 2010 was 3,574,097. Its rank was 29th in the nation.
- In 2010 Connecticut had a per capita personal income (PCPI) of \$54,877. This PCPI ranked 1st in the U.S. and was 137 percent of the national average of \$39,945. The 2010 PCPI reflected a 2.4 percent increase from 2009. The 2009-2010 national change increased by 2.8 percent.
- In 2000 the PCPI of Connecticut was \$36,426 and ranked 1st in the United States. The 2000-2010 average annual growth rate of Connecticut PCPI was 5.1 percent. The average annual growth rate for the nation was 4.6 percent.

**Family household (Family)**

A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

**Household**

A household includes all the people who occupy a housing unit as their usual place of residence.

Source: Connecticut Department of Labor, Performance and Accountability Unit

**Base Period:** A selected period of time, frequently one year, against which changes to other points in time are calculated (*also see Index Number*).

**Benchmarking:** The process of re-estimating statistics as more complete data become available. Estimates are usually calculated using only a sample of the universe (total count). Therefore, benchmarking allows for correction of estimating errors. New benchmarking levels are introduced on an annual basis.

**Covered Employment:** Employment in any industry insured under the provisions of the Connecticut Unemployment Compensation Law.

**Current Population Survey:** A national household survey conducted each month by the Census Bureau for the U.S. Bureau of Labor Statistics. Information is gathered from a sample of about 60,000 households (1,200 in Connecticut) designed to represent the civilian non-institutional population of persons 16 years of age and over.

**Discouraged Workers:** Persons not included in the unemployment count who say they did not look for work because they think none is available, or they believe they lack the skills necessary to compete in the labor market.

**Dislocated Worker:** As defined under the Workforce Investment Act of 1998, an individual who: 1. (a) has been terminated or laid off, or received notice of same; (b) is eligible for or has exhausted entitlement to unemployment compensation, or has demonstrated attachment to the workforce but is not eligible for unemployment compensation; and (c) is unlikely to return to a previous industry or occupation. 2. (a) has been terminated or laid off, or has received notice of same, as a result of permanent closure or substantial layoff at a plant, facility or enterprise; or (b) is employed at a facility at which employer has made a general announcement that such facility will close within 180 days; (c) for purposes of receiving certain services, is employed at a facility at which the employer has made a general announcement that such facility will close; (d) was self-employed but is unemployed as a result of general economic conditions in the community in which the individual resides or because of natural disasters; (e) is a displaced homemaker.

**Displaced Homemaker:** An individual who has been providing unpaid services to family members in the home and who: (a) has been dependent on the income of another family member but is no longer supported by that income; and (b) is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

**Durable Goods:** Items with a normal life expectancy of three years or more. Automobiles, furniture, household appliances, and mobile homes are examples. Because of their nature, expenditures for durable goods are generally postponable. Thus, durable goods sales are the most volatile component of consumer expenditures.

**Employed Persons:** Those individuals who are 16 years of age and over who worked for pay any time during the week which includes the 12th day of the month, or who worked unpaid for 15 hours or more in a family-owned business, and individuals who were temporarily absent from their jobs due to illness, bad weather, vacation, labor dispute, or personal reasons. Excluded are persons whose only activity consists of work around the house and volunteer work for religious, charitable, and similar organizations.

**Employment Concentration:** Industry Employment Concentration, or Location Quotient reflects the importance of an industry to the economy of a geographical area, in terms of the number of jobs it provides. It is a calculated ratio that determines whether or not the local economy has a greater share of that industry than expected. This publication uses Location Quotients to compare workforce investment area employment by industry relative to Connecticut. A Location Quotient of greater than 1.0 indicates a higher level of employment concentration in an area, while a Location Quotient of 2.0 shows that an industry has twice the employment concentration in that area relative to Connecticut as a whole.

**Establishment:** An economic unit such as a farm, mine, factory, or store, which produces goods or provides services. It is usually at a single physical location and engaged in one predominant type of economic activity.

**Family:** A group of two or more people who reside together and who are related by birth, marriage, or adoption.

**Farm Employment:** Persons who work as owners and operators of farms, as unpaid family workers on farms, or as hired workers who are engaged in farm activities.

**Full-Time Employment:** Employment of 35 or more hours per week.

**Household:** A household includes all the people who occupy a housing unit as their usual place of residence.

**Housing Permits:** Counted by the Bureau of the Census, new housing permits include permits issued for all new privately owned, attached and detached single-family houses.

**Index Number:** A measure of the relative changes occurring in a series of values compared with a base period. The base period usually equals 100, and any changes from it represent percentages. By use of an index number, large or unwieldy data, such as sales in thousands of dollars or costs in dollars and cents, are reduced to a form in which they can be readily understood.

**Industry:** A generic term for a distinct group of economic activities. Industries are described and classified by their primary activity or product.

**Initial Claim:** A notice filed by a worker, at the beginning of a period of unemployment, requesting a determination of insured status for jobless benefits.

**Labor Force:** All persons 16 years of age and over who are classified as employed, unemployed and seeking employment, or involved in a labor-management dispute. The labor force does not include persons who never worked a full-time job lasting two weeks or longer and “discouraged workers” who have been unemployed for a substantial length of time and are no longer actively seeking employment. Members of the armed forces stationed either in the United States or abroad are counted by their place of residence. The civilian labor force excludes members of the armed forces and the institutionalized population.

**Labor Force Participation Rate:** The proportion of the total civilian non-institutional population or of a demographic subgroup of that population classified as “in the labor force.”

**Labor Market Area (LMA):** As defined by the U.S. Bureau of Labor Statistics, an economically integrated geographic area within which individuals can reside and find employment within a reasonable distance or can readily change employment without changing their place of residence.

**Labor Market Information (LMI):** The body of information that deals with the functioning of labor markets and the determination of the demand for and supply of labor. It includes, but is not limited to, such key factors as changes in the level and/or composition of economic activity, the population, employment and unemployment, income and earnings, wage rates, and fringe benefits.

**Labor Surplus Area:** A civil jurisdiction where the average unemployment rate is at least 20 percent above the average unemployment for all states, or its unemployment during the previous two calendar years was ten percent or more. The designation allows establishments in the area preference in bidding for certain federal contracts.

**Location Quotients:** Measures an industry’s concentration or specialization in one geographical area relative to a larger area (also see *Employment Concentration*).

**Manufacturing:** Includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power-driven machines and materials handling equipment. The new product of a manufacturing establishment may be “finished” in the sense that it is ready for utilization and consumption, or it may be “semi-finished” to become a raw material for an establishment engaged in further manufacturing.

**Median:** The middle value or midpoint between two

middle values in a set of data arranged in order of increasing or decreasing magnitude. As such, one-half of the items in the set are less than the median and one-half are greater.

**Median Income:** The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median. For households and families, the median income is based on the distribution of the total number of households and families, including those with no income.

**Metropolitan Statistical Area (MSA):** The general concept of a Metropolitan Statistical Area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. Connecticut currently has seven Metropolitan Statistical Areas, as defined by the federal Office of Management and Budget.

**Money Income:** Census-based money income is derived from a sample of individuals 15 years of age and older, and consists only of income that is received by individuals in cash and its equivalents.

**Nondurable Goods:** Items that generally last for only a short period of time (three years or less). Food, beverages, apparel, and gasoline are common examples. Because of their nature, nondurable goods are generally purchased when needed.

**Nonfarm Employment:** The total number of persons on establishment payroll employed full- or part-time who received pay for any part of the pay-period which includes the 12th day of the month. Temporary and intermittent employees are included, as are any workers who are on paid sick leave, on paid holiday, or who work during only part of the specified pay period. A striking worker who only works a small portion of the survey period, and is paid, is included. Persons on the payroll of more than one establishment are counted in each establishment. Data exclude proprietors, self-employed, unpaid family or volunteer workers, farm workers, and domestic workers. Persons on layoff the entire pay-period, on leave without pay, on strike for the entire period or who have not yet reported for work are not counted as employed.

**Occupation:** A name or title of a job that identifies a set of activities or tasks that employees are paid to perform. Employees that perform essentially the same tasks are in the same occupation, whether or not they are in the same industry. Some occupations are concentrated in a few particular industries, other occupations are found in the majority of industries.

**Part-Time Employment:** As defined by the U.S. Bureau of Labor Statistics, employment in which a worker is regularly scheduled to work fewer than 35 hours a week.

**Per Capita Personal Income:** The annual total personal income of residents divided by resident population as of July 1st of current year.

**Personal Income:** Measures the net earnings, rental income, personal dividend income, personal interest income, and transfer payments by place of residence before the deduction of personal income taxes and other personal taxes. Reported in current dollars.

**Private Household Workers:** Persons who work for profit or fees in private households such as child care workers, cooks, housekeepers or other household staff.

**Production Worker:** Employees, up through the level of working supervisor, who are directly engaged in the manufacture of the product of an establishment. Among those excluded from this category are persons in executive and managerial positions and persons engaged in activities such as accounting, sales, advertising, routine clerical work, and professional and technical functions.

**SAGA (State-Administered General Assistance):** Provides cash, medical, and emergency assistance to persons who do not qualify for federal and state assistance programs, such as Supplemental Security Income (SSI), Temporary Family Assistance (TFA), and Medicaid.

**Seasonal Adjustments:** The adjustment of time-series data to eliminate the effect of intra-year variations that tend to occur each year in approximately the same manner. Examples of such variations include school terms, holidays, and yearly weather patterns.

**Seasonal Industry:** An industry in which activity is affected by regularly recurring weather changes, holidays, vacations, etc. The construction and recreational industries are typically characterized as “seasonal.”

**Self-Employed Workers:** Persons who work for profit or fees in their own business, profession, trade, or farm. Self-employed persons whose businesses are incorporated are included among wage and salary workers, because technically, they are paid employees of a corporation.

**Underemployed:** Persons working full- or part-time in jobs that are below their earning capacity or level of competence. The terms “underemployed” and “underutilized” are used interchangeably. Underemployment has also been defined as “involuntary part-time” employment or employment of a person on a part-time basis when full-time work is desired.

**Unemployed:** Persons who, during the survey week, had no employment but were available for work and: (a) had engaged in any job-seeking activity within the past four weeks, i.e. registered at a public or private employment office, met with prospective employers, checked with friends or relatives, placed or answered advertisements, wrote letters of application, or was on a union or professional register; (b) were waiting to hear back from a job which they had been laid off; or (c) were waiting to report to a new wage/salary job within 30 days.

**Unemployment Rate:** Represents the number unemployed as a percent of the labor force. The seasonally adjusted unemployment rate eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, etc., and therefore, more clearly shows the underlying basic trend of unemployment.

**Units:** (see *Establishment*)

**Workforce Investment Act (WIA) of 1998:** Represents significant changes to federal statutes governing programs of job training, adult education and literacy, and vocational rehabilitation in order to establish a coordinated, streamlined and more flexible workforce development system. It is a revitalized system that focuses on providing *employers* with skilled workers, and the economic and workforce information they need to conduct business effectively - and on providing *workers* with the information, advice, job search assistance, and training they need to get and keep good jobs.

**Worksite:** A worksite is an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed (e.g. factory, mill, store, hotel, restaurant).
