South Central WIA

The South Central Workforce Investment Area (WIA), with the city of New Haven at its core, is comprised of 30 towns along the mid-point of Connecticut's southern coast. The land area spans 737 square miles, of which East Haddam is the largest town and Essex is the smallest. New Haven is situated on Long Island Sound, just 40 miles from Hartford, 75 miles from New York City, and 135 miles from Boston. The South Central WIA is served by Interstate Routes 95 and 91, as well as the Merritt Parkway (Route 15).

PREFACE

The Office of Research is Connecticut's leading producer of information and statistics on the economy, workforce, occupations, and careers. Our mission is to produce, analyze, and deliver timely and reliable workforce information and statistics to assist in decision-making for those planning economic development initiatives, for education and training providers, and for job seekers and students who are seeking guidance in making career choices.

The Workforce Investment Act provides a valuable framework through which to organize and coordinate a broad range of undertakings to support workforce investment activities. State and local Workforce Investment Boards are important customers of the workforce information system. The Office of Research provides much of the core information needed by administrators and service providers to plan, evaluate, and effectively serve the business and individual customers of the workforce system.

Our office is pleased to provide the *Information for Workforce Investment Planning – 2007*. This publication includes data on Connecticut's population, its labor force, industry employment and wages, employment by town, and on persons with barriers to employment. In this current edition, we've added 2006 data on employment by industry clusters and their relative importance statewide and for each workforce investment area; home sales and median home prices, housing inventory and fair market rents; highlights of Connecticut's regional occupational forecast, 2004 to 2014; along with additional historical data for comparisons and trends.

We believe this information will be useful for the Workforce Investment Board planners and policy makers who make critical workforce system decisions.

Sources for the data are cited on each table, and include other State agencies, the Connecticut Department of Labor and the United States Census Bureau. We wish to thank these providers for their contribution to this year's publication. The charts and tables in the *Information for Workforce Investment Planning – 2007* are within the public domain, and may be copied and/or quoted. However, we do request that you attribute such material to this publication.

We hope that you find this publication helpful and informative.

ACKNOWLEDGMENTS

Cynthia DeLisa, Rachel Meyerhoff, and Mark Stankiewicz of the Office of Research prepared this publication.

We would like to thank the following Department of Labor and Office of Research staff who provided data for this publication: John DiSette, Edward Doukas, Jessy George, Nicholas Jolly, Doreen LeBel, Dana Placzek, David Post, and Joseph Slepiski. Special thanks go to John Tirinzonie, State Labor Economist and Director of Job Development, and to Brandon T. Hooker for providing the regional and statewide employment forecasts included in this publication.

South Central WIA

POPULATION AND POPULATION DENSITY

From 2000 to 2006, Connecticut's population increased from 3,405,602 to 3,504,809 residents (+2.9%), and was up just 4,108 residents from its revised 2005 level. Over the six-year period, the North Central WIA saw the largest population increase (+26,614 residents), followed by South Central (+21,543), Northwest (+21,250), Eastern (+17,319), and finally the Southwest (+12,481) area. Nine towns in the State reported a net decline in population from 2000 to 2006, but none were in the South Central WIA.

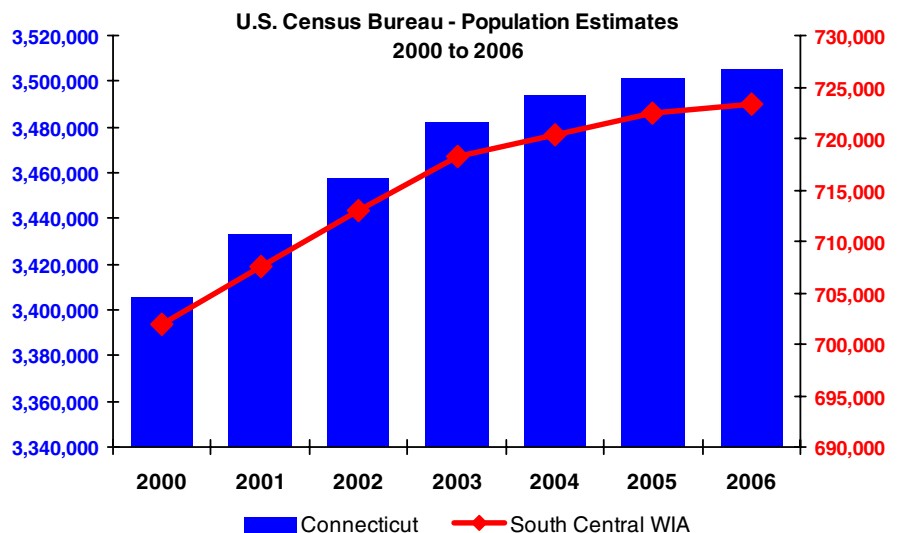

The South Central WIA reported the third largest population (723,413) among the State's five workforce investment areas. From 2000 to 2006, the South Central WIA population grew by 21,543 residents (+3.1%). Milford trumped the other area towns with the largest over-the-period population increase, up 2,497 residents to 54,802 in 2006. Middletown had the WIA's second highest increase (+1,875), followed by Wallingford (+1,710), Hamden (+1,417), and Meriden (+1,409).

New Haven (124,791), Meriden (59,653), Hamden (58,180), Milford (54,802), and West Haven (52,923) were the only South Central WIA towns to have population counts of over 50,000 residents in 2006. Together, these five towns represented 48% of the total South Central WIA population in 2006. Three of the WIA's 30 towns had populations of under 5,000 in 2006: Deep River (4,714), Middlefield (4,281), and Chester (3,832).

In 2006, the South Central WIA had the third highest population density overall (981 persons per square mile) among the State's five workforce investment areas. New Haven (6,620 persons/19 sq. mi.) was the most densely populated among the area's 30 towns; West Haven ranked second in population density (3,367 persons/16 sq. mi.), followed by Meriden (2,512 persons/24 sq. mi.), Milford (2,429 persons/23 sq. mi.), and East Haven (2,345 persons/12 sq. mi.). In contrast, Haddam (173 persons/44 sq. mi.) and East Haddam (162 persons/54 sq. mi.) were the WIA's least densely populated towns.

In 2006, the South Central WIA accounted for 21% of CT's total population

South Central WIA

LABOR FORCE

From 2005 to 2006, Connecticut's labor force increased by 21,300 (+1.2%) to 1,844,200. Over the year, the total number of employed residents increased by 30,700 to 1,765,100 residents, while 9,300 fewer residents were unemployed, bringing their total to 79,200. This is noteworthy considering that from 2004 to 2005 there was a decline of only 400 in the number of unemployed residents. In 2006, Connecticut's unemployment rate fell to 4.3%, down from 4.9% in both 2004 and 2005.

The North Central WIA reported the largest labor force (511,000 residents) and highest unemployment rate (4.6%) among Connecticut's five workforce investment areas in 2006. The South Central WIA, with a labor force of 396,300, had the third highest labor force and its unemployment rate was the same as Connecticut's, at 4.3%. All five areas followed the statewide trend of higher employment and lower unemployment in 2006.

From 2005 to 2006, the South Central WIA labor force increased by 4,800 residents (+6,700 employed and -1,900 unemployed). In 2006, nearly one-third (31.5%) of the area's labor force resided in New Haven (55,270), Meriden (31,533), Milford (31,425), Hamden (30,758), and West Haven (29,406). Eighteen of the South Central WIA's 30 towns had a labor force total below 10,000 residents. Chester had the lowest labor force, with 2,262 residents in 2006.

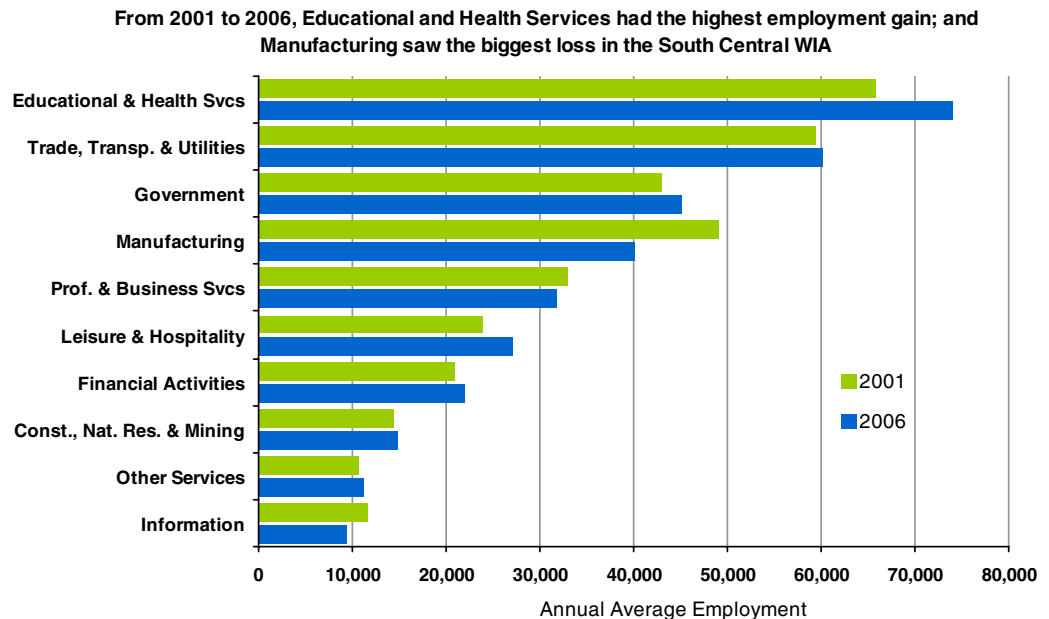

New Haven (6.6%) had the highest unemployment rate in the WIA. In addition to New Haven, Meriden (5.4%), West Haven (4.8%), East Haven (4.6%), and East Hampton (4.5%) represented the South Central WIA towns with an unemployment rate of 4.5% or higher in 2006. The town of Woodbridge reported the South Central WIA's lowest unemployment rate (2.7%) in 2006; while Guilford, Haddam, and Madison, all at 2.9%, also reported unemployment rates below 3.0 percent.

See Also Appendix Tables on Pages 18, 39-40

EMPLOYMENT BY INDUSTRY

Connecticut's employment grew by 28,198 (+1.7%) to 1,672,161 from 2005 to 2006. Professional & Business Services added 6,474 jobs (+3.2%), and Educational & Health Services was up 5,962 jobs (+2.2%). These industries accounted for 44% of the State's total over-the-year growth. Leisure & Hospitality, which gained 3,113 jobs (+2.4%), and Other Services, up 1,545 (+2.7%), also saw impressive gains during the same period. The industry sectors losing employment over the year were Manufacturing (-1,526 jobs, -0.8%), Trade, Transportation, & Utilities (-1,177 jobs, -0.4%), and Information (-328 jobs, -0.9%).

Educational & Health Services (+25,049 jobs, +10.1%), and Leisure & Hospitality (+12,436 jobs, +10.4%) had the highest employment growth from 2001 to 2006. In contrast, the Manufacturing (-32,821 jobs, -14.5%), and Information (-6,942, -15.5%) sectors had the greatest employment declines over the same period.

From 2005 to 2006, the South Central WIA experienced an overall gain of 6,289 jobs (+1.9%), bringing its employment total to 335,957 in 2006. Among the State's five workforce investment areas, the South Central WIA accounted for 20 percent of Connecticut's total employment. Educational & Health Services (+1,809 jobs, +2.5%) and Leisure & Hospitality (+894 jobs, +3.4%) industries experienced the WIA's largest private sector employment increase, and accounted for 43 percent of the area's over-the-year gain.

The South Central WIA was up 3,799 jobs (+1.1%) from 2001 to 2006; and the industry with the highest employment growth was Educational & Health Services (+8,256 jobs, +13%). During the same period, Manufacturing had the area's highest employment decline (-8,956 jobs, -13%). In 2006, over half (53%) of all South Central WIA workers were employed in the Educational & Health Services (22%), Trade, Transportation & Utilities (18%), and Government (13%) sectors.

South Central WIA

ANNUAL AVERAGE WAGES BY INDUSTRY

From 2005 to 2006, annual average wages for Connecticut's workers increased by \$1,879, from \$52,964 to \$54,843 (+3.5%). Workers in the Financial Activities sector saw the largest boost in their paychecks, up \$6,603 from 2005 to 2006, and more than three times higher than the overall statewide increase. Manufacturing (+\$2,907), Professional & Business Services (+\$2,705), and Information (+\$2,258) also experienced over-the-year gains greater than the annual average wage increase for all industries. Financial Activities workers in the State earned the highest annual average wages in 2006 (\$122,874) among all industries, followed by Professional & Business Services (\$66,746), Manufacturing (\$65,940), and Information (\$65,719). Those employed in Other Services* (\$28,302) and in Leisure & Hospitality (\$19,005) averaged the lowest annual wages.

Connecticut workers experienced a net increase of \$7,853 (+16.7%) in annual average wages from 2001 to 2006. During the same period, the Financial Activities sector (+\$32,916) again reported the largest net gains among Connecticut's industries, followed by Manufacturing (+\$10,216), Information (+\$8,015), and Professional & Business Services (+\$7,871). Workers in the Other Services (+\$2,533) and Leisure & Hospitality (+\$1,748) sectors received the smallest annual average wage increases from 2001.

In 2006, the South Central WIA reported the third highest annual average wages (\$46,229) and the third lowest over-the-year increase (+\$1,153) among the State's five workforce investment areas. Among the South Central WIA's ten major industry sectors, Financial Activities workers received the largest annual average wages in 2006 (\$69,355), as well as the highest wage increase (+\$5,866, +9.2%) from 2005. Workers in the Manufacturing (\$60,599) and Information (\$59,961) sectors earned the second and third highest wages in 2006. Those employed in the South Central WIA's Education & Health Services sector earned an average of \$46,597 in 2006, and had the area's second highest 'raise' (+\$1,540) in their paychecks from 2005. Information (+\$1,492) and Manufacturing (+\$1,439) workers followed in the ranking with wage increases during this period.

Similar to the statewide trend, South Central WIA workers in the Other Services (\$27,436) and Leisure & Hospitality (\$17,199) sectors received the lowest earnings in 2006. These two industries also reported the area's lowest over-the-year wage increases (+\$622 and +\$561, respectively), gaining about half the overall increase for the South Central WIA from 2005 to 2006.

From 2001 to 2006, the Financial Activities sector reported the South Central WIA's largest net increase in annual wages (+\$17,704), which was nearly three times the total over-the-period increase for the area (+5,997). Information (+\$9,128) and Manufacturing (+\$8,007) workers ranked second and third in annual average wage increases over this period.

South Central WIA

EMPLOYMENT CONCENTRATION AND INDUSTRY CLUSTERS

The industry clusters with the greatest employment concentration in Connecticut relative to the U.S. were aerospace (5.22), insurance/financial services (1.29), and metal manufacturing (1.21). The clusters with the smallest were agriculture (0.53), bioscience (0.81), and plastics (0.81). Between 2003 and 2006, the fastest growing industry clusters in the State were maritime (4%), tourism (4%), and healthcare/services (4%). The fastest shrinking were plastics (-8%), bioscience (-6%), and creative industries (-2%).

As a percentage of 2006 South Central WIA employment, the largest industry clusters were healthcare/services (16%), tourism (9%), and insurance/financial services (5%). The smallest were bioscience (1%), plastics (0.6%), and maritime (0.3%). The industry clusters with the greatest employment concentration in the WIA relative to Connecticut were medical devices (2.1), bioscience (1.45), and plastics (1.24). The clusters with the smallest concentrations were insurance/financial services (0.73), aerospace (0.59), and maritime (0.38).

Between 2003 and 2006, the fastest growing industry clusters in the South Central WIA were maritime (50%), medical devices (17%), and tourism (9%). The fastest shrinking clusters were information technology (-9%), plastics (-13%), and bioscience (-15%). The industry clusters that provide more employment in the WIA relative to Connecticut, but provide less employment in the State relative to the U.S. are bioscience, information technology, and plastics.

South Central WIA

NEW HOUSING PERMITS

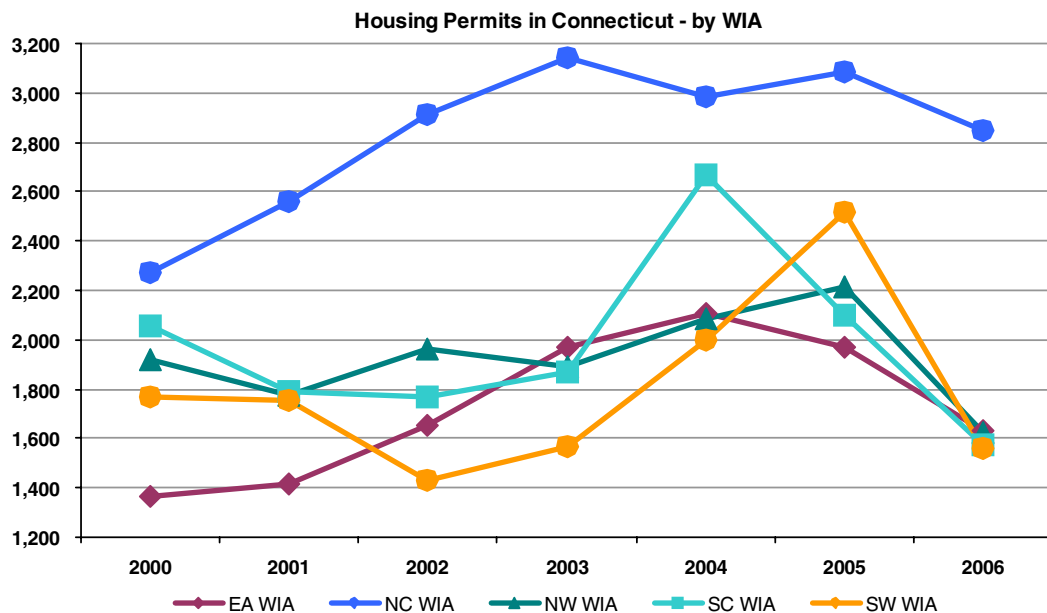

From 2005 to 2006, new housing permits in Connecticut decreased from 11,885 to 9,236, which represented the first decline since 2001, the largest over-the-year decrease (-2,649) since 2000, and the lowest number of new housing permits issued in the State since 1996. All five of the State's workforce investment areas reported over-the-year decreases in new housing permits issued. The Southwest WIA had the largest decrease (-952), followed by the Northwest (-594), South Central (-528), Eastern (-335), and North Central (-240) WIAs.

The South Central WIA reported 1,571 new housing permits issued in 2006, which was the second lowest total among the workforce investment areas. Only the Southwest WIA, with 1,562 new permits, reported less activity in 2006. Milford (281), New Haven (247), and Middletown (213) had the area's highest number of new housing permits in 2006.

In 2006, eight of the South Central WIA's 30 towns showed gains in housing permit activity from 2005, New Haven (+135) had the most significant increase. Twenty-one area towns reported an over-the-year decrease in housing permit activity, led by Wallingford (-113), North Haven (-97), and Meriden (-66).

Among the WIAs, the South Central WIA experienced the largest net decrease (-486) in new housing permits issued from 2000 to 2006. Twenty-four WIA towns reported an over-the-period decrease, led by Hamden (-175) and Madison (-121). Six of the area's thirty towns posted an over-the-period net increase, led by New Haven (+222) and Milford (+86).

South Central WIA

HOME SALES AND MEDIAN SALES PRICES

In 1996, 56,333 homes were sold throughout Connecticut with a median sales price of \$138,000. During 2000, the State had home sales of 56,032, a decrease of 301 units, and a lower median sales price of \$135,500. The number of home sales took a big tumble in 2006 when 37,665 homes sold (-18,367), possibly reflecting an increase in the median sales price to \$275,000.

All five of Connecticut's workforce investment areas experienced net declines in total home sales from 1996 to 2006. The Southwest WIA reported the most significant decline (-7,294), followed by the South Central (-3,373), North Central (-3,730), Northwest (-3,327), and Eastern (-944) regions. All five areas showed significant increases in median home sales prices during this period, led by the Southwest WIA (+\$280,000), and followed by the Northwest (+\$187,500), South Central (+\$170,250), North Central (+\$134,000), and Eastern (+\$119,100) regions.

From 1996 to 2006, all 169 Connecticut towns saw an increase in median home sales prices, ranging from Union (+\$36,550) to Greenwich (+\$1,242,500).

However, 143 towns (85%) reported a net decline in home sales during the same ten-year period. Twelve towns reported a net increase of 10 or more homes sold from 1996 to 2006, with two (Chester and East Hampton) located in the South Central Workforce Investment Area (WIA).

Essex (+\$293,750), Madison (+\$285,500), Old Saybrook (+\$247,500), and Guilford (+\$223,625) reported the South Central WIA's highest net increase in median home sales prices from 1996 to 2006. During the same period, Chester (+19) and East Hampton (+15) were the only towns in the WIA that had a net increase in home sales of 10 or more. Eleven of the WIA's 30 towns reported a net decrease in home sales of 100 or more, ranging from West Haven (-110) to New Haven (-807).

In 2006, the highest median home sales prices in the South Central WIA were in Madison (\$502,500), Woodbridge (\$480,000), Essex (\$472,250), Orange (\$410,000), Old Saybrook (407,500), and Guilford (\$400,000). The lowest median home sales prices were found in Meriden (\$201,000), New Haven (\$218,250), Middletown (\$230,000), and West Haven (\$234,000). Home sales in Meriden (817), Hamden (769), Milford (583), New Haven (526), and West Haven (524) were the highest among the South Central WIA towns, accounting for 44% of the area's total in 2006.

South Central WIA

FOOD STAMP AND TEMPORARY FAMILY ASSISTANCE RECIPIENTS

From 2000 to 2006, Connecticut saw a 35% decline in the total number of Temporary Family Assistance (TFA) recipients (-24,407). Each of the State's five workforce investment areas experienced a similar trend during this period. Among the five workforce investment areas, the North Central (-8,352), South Central (-7,798), and Southwest (-5,274) showed the largest net decreases in Temporary Family Assistance recipients from 2000 to 2006.

In 2006, the total number of Temporary Family Assistance recipients in Connecticut decreased over the year by 3,809 to 44,365, which represented the lowest level over the past ten years. The North Central (-1,417) and South Central (-1,172) areas reported the largest over-the-year decreases among the five WIAs.

The South Central WIA reported 10,703 Temporary Family Assistance recipients in 2006, which was the second largest total among the WIAs. Within the South Central WIA, the largest number of TFA recipients was in New Haven (5,931), Meriden (1,570), and West Haven (865). Ironically, these same three towns: New Haven (-715), West Haven (-130), and Meriden (-123) reported the largest decreases in Temporary Family Assistance recipients from 2005 to 2006.

In 2006, the number of Food Stamp recipients in Connecticut increased by 5,720 (+3.0%) from 188,591 to 194,311, which represented the highest level over the past eight years, and fifth consecutive year of increases.

With the exception of the Southwest, which experienced a slight decrease (-78), each of the State's workforce investment areas reported increases over the year, led by North Central (+1,654), Northwest (+1,436), Eastern (+1,433), and South Central (+1,277). These areas also reported increases in Food Stamp recipients for five consecutive years.

With 45,056 total Food Stamp recipients in 2006, the South Central WIA recorded the second largest total among the State's five workforce investment areas. Within the WIA, New Haven (+528), Meriden (+203), and Hamden (+149) reported the area's largest gains from 2005 to 2006. In total, 19 of the South Central WIA's 30 towns showed over-the-year increases in Food Stamp recipients.

From 2000 to 2006, Connecticut experienced a net increase of 31,629 Food Stamp recipients. The largest net increases were reported in the North Central (+11,058),

Northwest (+8,518), and Eastern (+4,926) workforce investment areas. In all, each of the State's five workforce investment areas reported net increases during this period.

South Central WIA

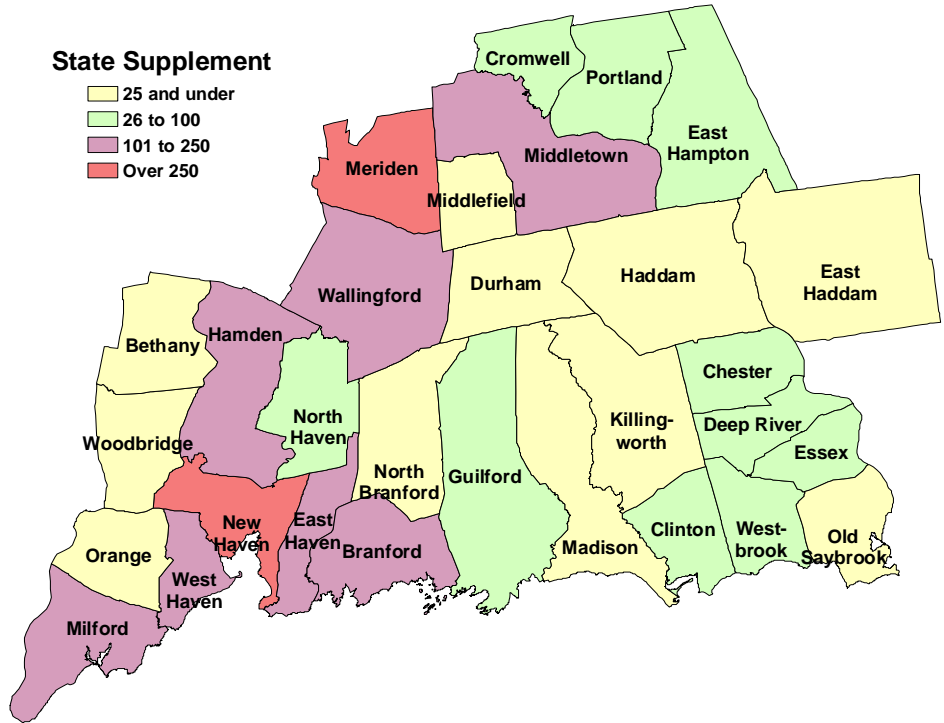

STATE SUPPLEMENT AND MEDICAID RECIPIENTS

Connecticut experienced a 37% decrease in the total number of State Supplement recipients, down by 9,211 from 2000 to 2006. Each of the State's five workforce investment areas reported net decreases, led by the Southwest (-1,847 recipients, -43%) and the North Central (-3,187 recipients, -38%) areas, whose declines exceeded the statewide percentage drop.

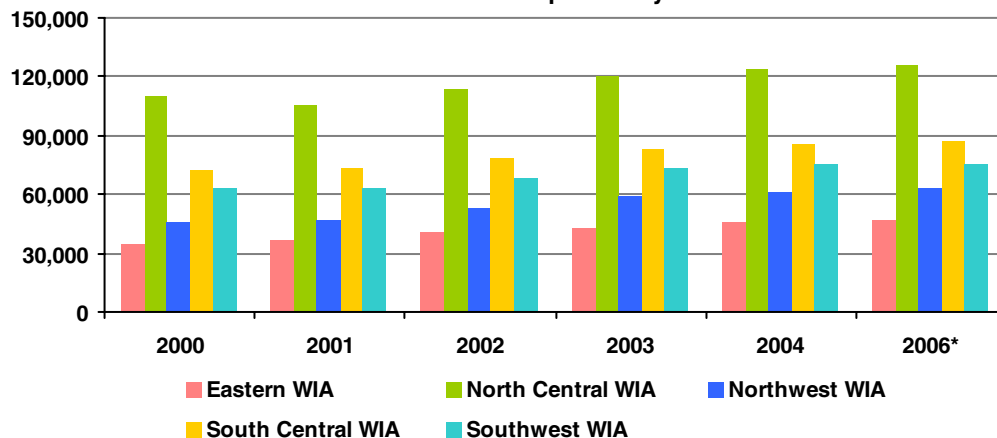

From 2005 to 2006, the total number of State Supplement recipients in Connecticut decreased by 893 (-5%) to 15,599, representing a steady decline during the past seven years. With 3,583 total State Supplement recipients in 2006, the South Central WIA experienced a 4% over-the-year drop (-146). Most of the decline took place in New Haven (-104), which still reported the highest number of recipients, 1,193, or one-third of the area's total. The second highest was Meriden, up by 12 to a total of 524 State Supplement recipients.

From 2000 to 2006*, Connecticut saw a 22% rise in the total number of Medicaid recipients (+70,717), with all of the State's five workforce investment areas following this trend. The Northwest (+17,557 recipients, +38%) and Eastern (+11,661 recipients, +33%) areas experienced percentage increases greater than the statewide total. The South Central (+14,337 recipients, +20%) and Southwest (+11,873 recipients, +19%) areas were on par with the statewide percentage increase, while the North Central WIA (+15,318 recipients, +14%) had the smallest increase over the six-year period.

The total number of Medicaid recipients in Connecticut increased by 5,614 (+1.4%) from 2004* to 2006 and, at 397,641, was at its highest level in the past ten years. The South Central WIA also experienced a 1.4% over-the-period rise (+1,188) in the number of Medicaid recipients, with Hamden (+431), West Haven (+325) and East Haven (+212) reporting the area's largest increases. New Haven (where one in four recipients lived) together with Meriden, West Haven, Middletown, and Hamden, accounted for 76% of the WIA's total Medicaid population in 2006.

South Central WIA

STATE ADMINISTERED GENERAL ASSISTANCE RECIPIENTS

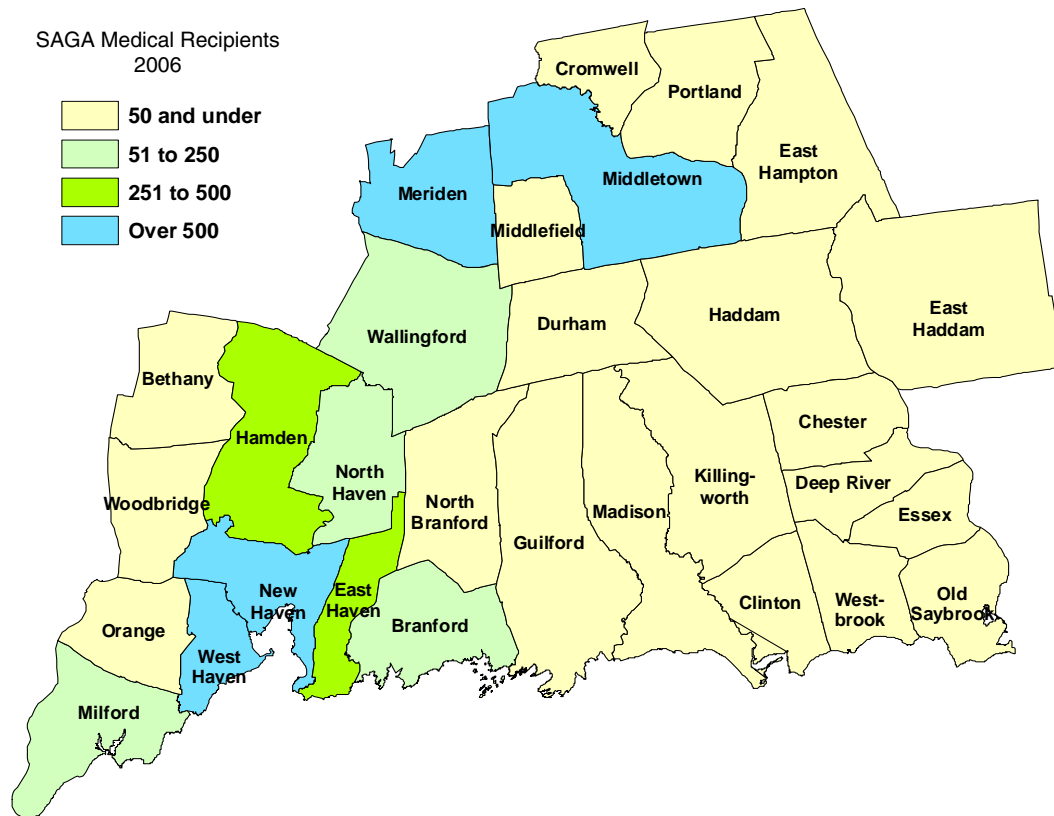

The number of State Administered General Assistance (SAGA) recipients, who received cash assistance in Connecticut, declined by 33 to 4,100 from 2000 to 2006, with an over-the-period high of 4,757 in 2003. The number of SAGA medical assistance recipients had a steady annual increase over the same period, rising 73% from 18,085 in 2000 to 31,307 in 2006. During this period, the South Central WIA reported the second highest annual number of SAGA cash and medical assistance recipients among the State's five workforce investment areas.

From 2000 to 2006, the number of SAGA cash assistance recipients in the South Central WIA declined from 991 to 906. During the same period, the number of SAGA medical assistance recipients increased by 69% from 4,739 in 2000 to 8,008 in 2006. The South Central WIA accounted for 22% of Connecticut's SAGA cash assistance recipients and 26% of the State's SAGA medical assistance recipients, in 2006. The City of New Haven posted over half of the WIA's SAGA medical assistance recipients from 2000 to 2006.

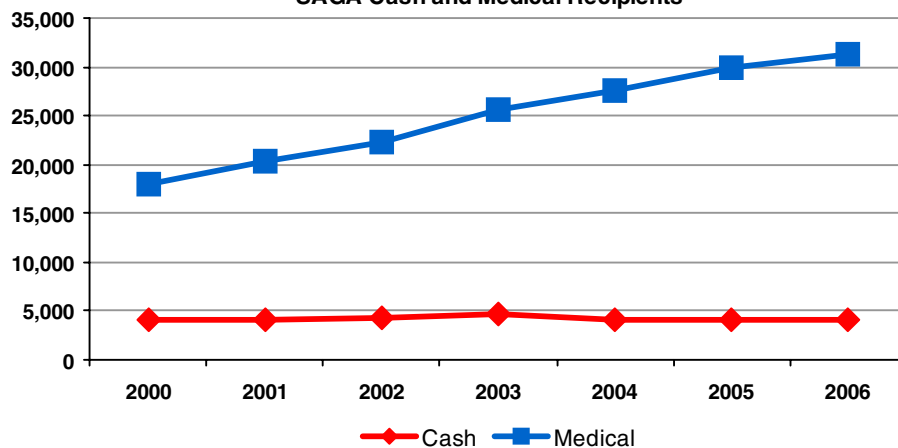

New Haven experienced the largest increase (+1,441, +52%) in the number of SAGA medical assistance recipients from 2000 to 2006; Meriden and West Haven (+393 and +300, respectively) followed in the ranking, each up 83% over the same period. The number of SAGA medical recipients in Middletown (+258) and Hamden (+180) nearly doubled from 2000 to 2006. New Haven (+244) and Meriden (+95) also recorded the largest over-the-year increases in the number of SAGA medical assistance recipients.

DEPARTMENT OF MENTAL RETARDATION-ACTIVE CLIENTS

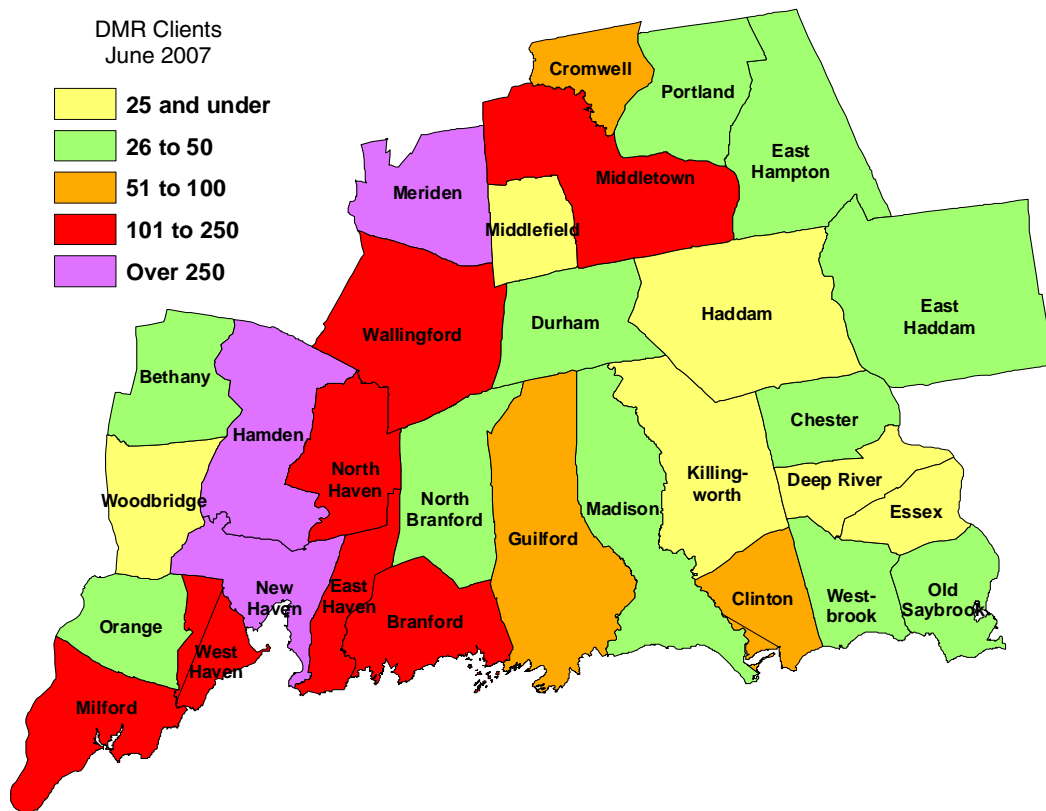

The number of active Connecticut Department of Mental Retardation (DMR) clients decreased by 14 from June 2006 to June 2007, going from 15,018 to 15,004. However, this small decline did not snap the steady annual increase of the State's DMR client population over the past five years. The North and South Central areas reported the highest annual counts, the Northwest area ranked third, while the Southwest and Eastern WIAs had the lowest annual DMR client counts.

As of June 2007, the South Central WIA reported 3,159 active DMR clients, up by 36 from the prior year. Five towns reported a client population of over 200, led by New Haven (593), and represented 55% of the area's total number of DMR clients. Seventeen of the area's 30 towns reported fewer than 50 active clients.

From June 2002 to June 2007, New Haven (+70), Hamden (+37), Clinton (+23), Milford (+23), Guilford (+20), and West Haven (+20) had the greatest increases in the number of active DMR clients; Old Saybrook (-8) and Madison (-7) reported the South Central WIA's largest declines. From June 2006 to June 2007, Hamden had the greatest increase (+19) and North Branford reported the South Central WIA's largest drop (-8) in the number of active DMR clients.

South Central WIA

ADULT PROBATIONERS

The total number of adult probationers in Connecticut increased by 3,694 to 53,125, up 7.5% from June 2004 to June 2007. Nearly one-fourth of the adult probationers (12,505) were provided services by the General Security Services Corp. Among the State's five workforce investment areas, the Eastern and Northwest areas reported the highest rate increases (+28% and +22% respectively), while the North Central WIA experienced the largest over-the-period gain (+2,155) in the number of adult probationers. The South Central and Southwest areas had the smallest over-the-period increases.

Adult Probationers 2007

The South Central area accounted for 22% of the total number of adult probationers in Connecticut as of June 2007. The region experienced the lowest increase (+0.6%) among the State's five areas, up by just 74 from June 2006 to a total of 11,901. Only three towns in Connecticut reported an increase of over 100 in the number of adult probationers, including Meriden (+111). Conversely, only New Haven (-209) reported a decrease of over 100 over the same period.

From June 2004 to June 2007, the South Central WIA towns with increases of over 100 adult probationers were Meriden (+271), Middletown (+134), West Haven (+119) and Milford (+102). As of June 2007, the South Central WIA towns with the highest number of adult probationers were New Haven (4,686), Meriden (1,480), and West Haven (1,069), and their combined total accounted for 61% of the area's total and 14% of the statewide count.

HIGH SCHOOL ENROLLMENT AND DROPOUT RATES

During the school year ending 2006, high school enrollment in Connecticut increased by just 484 to 173,709 students, after having gained nearly 4,600 students during the prior year. The number of high school dropouts rose by 185 to 3,212 from the prior school year ending (SYE) 2005, and the dropout rate in Connecticut rose from 1.7% to 1.8%. Despite the large number of students enrolled in Connecticut's Technical High School System, at 10,325 in 2006, the dropout rate was below 1.0% for each year from SYE 2004 to 2006. During this period, however, total enrollment declined by over 900, or 8%, in the State's Technical High School System.

From SYE 2004 to 2006, the total roll count of South Central WIA high schools increased by 1,528 to 31,728 students, and the dropout rate declined from 1.8% during both SYE 2004 and 2005 to 1.7% during SYE 2006. From SYE 2005 to 2006, North Haven had the WIA's largest increase in high school enrollment (+111 students), while New Haven and Meriden gained 196 students, each, between 2004 and 2006.

Among the three school districts in Connecticut with over 5,000 students, New Haven was the only district to report a high school dropout rate below 5.0% during SYE 2006*. Furthermore, New Haven's dropout rate declined from 6.1% in 2004 down to 4.2% in 2006.

These six districts accounted for 53% of the South Central WIA's total high school enrollment in SYE 2006

	Total Enrollment	Dropouts	
		#	%
New Haven	5,512	233	4.2%
Meriden	2,587	44	1.7%

EDUCATIONAL ATTAINMENT

From 2000 to 2005, the number of Connecticut residents (age 25 or older) with a high school diploma or higher increased by 94,131 (+5%) to 2,022,092. Nearly 90% of this increase can be attributed to residents who earned a Bachelor's degree or higher, up 82,221 (+11%).

In 2005, 88% of Connecticut's population age 25 or older had at least a high school diploma – up from 84% in 2000. The number of residents age 25 or older with a high school diploma increased by 22,401 (+3%) from 2000 to 2005.

In 2000, 21% of Connecticut's population (age 25 or older) with a high school diploma or higher resided in the South Central WIA – the 3rd highest percentage among the State's five workforce investment areas.

Of the South Central WIA's total population age 25 or older, 85% had at least a high school diploma – highest among the five areas; and 31% had at least a Bachelor's degree – 2nd highest among the five areas in 2000.

In 2000, 20% of Connecticut's total population (age 25 or older) with a bachelor's degree or higher resided in the South Central WIA

In 2000, 31% of the South Central WIA's total population (age 25 or older) had a Bachelor's Degree or higher

South Central WIA

BIRTHS TO TEENAGE MOTHERS

From 2000 to 2005, Connecticut experienced a net decline (-508) in the total number of births to teenage mothers. Each of the State's five workforce investment areas reported net declines in births to teenage mothers, led by the North Central (-160), South Central (-133), and Southwest (-108) areas. More specifically, the births to teenagers under the age of 18 dropped by 206 (18%), while births to 18 and 19 year olds decreased by 302 (14%).

From 2004 to 2005, the total number of births to teenage mothers in Connecticut decreased by 67 (2%) to 2,842, representing the lowest level in over ten years. Births to 18 and 19 year olds dropped by 48, the first decrease since 2002; while births to teenagers under the age of 18 declined by 19, representing the fourth over-the-year decrease in the past five years.

From 2000 to 2005, the North Central WIA reported the highest cumulative total number of births to teenage mothers (5,905) among the five workforce investment areas. The South Central WIA reported 3,608 births to teenage mothers, representing the second highest total.

In 2005, there were 543 births to teenage mothers in the South Central WIA, accounting for 19% of Connecticut's total. New Haven (273), Meriden (89), West Haven (53), and Middletown (31) reported the highest number of births to teenage mothers. Collectively, these towns accounted for 82% of the WIA's total in 2005.

* Excludes government

Size Class is determined by the number of employees at a worksite.

NOTE: The sum of the areas is less than the statewide total because some firms only report statewide employment and are not included in the area data.

FAIR MARKET RENTS

Fair Market Rents (FMRs) For The Section 8 Housing Assistance Payments Program

FMRs are gross rent estimates. They include the shelter rent plus the cost of all tenant-paid utilities (except telephones, cable or satellite television service, and internet service). HUD sets FMRs to assure that a sufficient supply of rental housing is available to program participants. To accomplish this objective, FMRs must be both high enough to permit a selection of units and neighborhoods, and low enough to serve as many low-income families as possible.

* Proposed as of July 2007 - final FMRs will be published by October 1, 2008

** CT and WIA average FMRs

Note: Figures represent 100% of Fair Market Rents. For all Section 8 properties - the actual monthly payment amount is influenced by a number of factors including the deduction of utility allowances, condition of the property, market comparisons, and any other policies of the local housing authority. The figures above represent the highest monthly dollar amount that HUD may pay through Section 8.

* Excludes government

Size Class is determined by the number of employees at a worksite.

NOTE: The sum of the areas is less than the statewide total because some firms only report statewide employment and are not included in the area data.

Glossary of Terms

Base Period: A selected period of time, frequently one year, against which changes to other points in time are calculated (*also see Index Number*).

Benchmarking: The process of re-estimating statistics as more complete data become available. Estimates are usually calculated using only a sample of the universe (total count). Therefore, benchmarking allows for correction of estimating errors. New benchmarking levels are introduced on an annual basis.

Covered Employment: Employment in any industry insured under the provisions of the Connecticut Unemployment Compensation Law.

Current Population Survey: A national household survey conducted each month by the Census Bureau for the U.S. Bureau of Labor Statistics. Information is gathered from a sample of about 60,000 households (1,200 in Connecticut) designed to represent the civilian non-institutional population of persons 16 years of age and over.

Discouraged Workers: Persons not included in the unemployment count who say they did not look for work because they think none is available, or they believe they lack the skills necessary to compete in the labor market.

Dislocated Worker: As defined under the Workforce Investment Act of 1998, an individual who: 1. (a) has been terminated or laid off, or received notice of same; (b) is eligible for or has exhausted entitlement to unemployment compensation, or has demonstrated attachment to the workforce but is not eligible for unemployment compensation; and (c) is unlikely to return to a previous industry or occupation. 2. (a) has been terminated or laid off, or has received notice of same, as a result of permanent closure or substantial layoff at a plant, facility or enterprise; or (b) is employed at a facility at which employer has made a general announcement that such facility will close within 180 days; (c) for purposes of receiving certain services, is employed at a facility at which the employer has made a general announcement that such facility will close; (d) was self-employed but is unemployed as a result of general economic conditions in the community in which the individual resides or because of natural disasters; (e) is a displaced homemaker.

Displaced Homemaker: An individual who has been providing unpaid services to family members in the home and who: (a) has been dependent on the income of another family member but is no longer supported by that income; and (b) is unemployed or underemployed and is experiencing difficulty in obtaining or upgrading employment.

Durable Goods: Items with a normal life expectancy of three years or more. Automobiles, furniture, household appliances, and mobile homes are examples. Because of their nature, expenditures for durable goods are generally

postponable. Consequently, durable goods sales are the most volatile component of consumer expenditures.

Employed Persons: Those individuals who are 16 years of age and over who worked for pay any time during the week which includes the 12th day of the month, or who worked unpaid for 15 hours or more in a family-owned business, and individuals who were temporarily absent from their jobs due to illness, bad weather, vacation, labor dispute, or personal reasons. Excluded are persons whose only activity consists of work around the house and volunteer work for religious, charitable, and similar organizations.

Employment Concentration: Industry Employment Concentration, or Location Quotient reflects the importance of an industry to the economy of a geographical area, in terms of the number of jobs it provides. It is a calculated ratio that determines whether or not the local economy has a greater share of that industry than expected. This publication uses Location Quotients to compare workforce investment area employment by industry relative to Connecticut. A Location Quotient of greater than 1.0 indicates a higher level of employment concentration in an area, while a Location Quotient of 2.0 shows that an industry has twice the employment concentration in that area relative to Connecticut as a whole.

Establishment: An economic unit such as a farm, mine, factory, or store, which produces goods or provides services. It is usually at a single physical location and engaged in one predominant type of economic activity.

Family: A group of two or more people who reside together and who are related by birth, marriage, or adoption.

Farm Employment: Persons who work as owners and operators of farms, as unpaid family workers on farms, or as hired workers who are engaged in farm activities.

Full-Time Employment: Employment of 35 or more hours per week.

Household: A household includes all the people who occupy a housing unit as their usual place of residence.

Housing Permits: Counted by the Bureau of the Census, new housing permits include permits issued for all new privately owned, attached and detached single-family houses.

Index Number: A measure of the relative changes occurring in a series of values compared with a base period. The base period usually equals 100, and any changes from it represent percentages. By use of an index number, large or unwieldy data, such as sales in thousands of dollars or costs in dollars and cents, are reduced to a form in which they can be readily understood.

Industry: A generic term for a distinct group of economic activities. Industries are described and classified by their primary activity or product.

Initial Claim: A notice filed by a worker, at the beginning of a period of unemployment, requesting a determination of insured status for jobless benefits.

Labor Force: All persons 16 years of age and over who are classified as employed, unemployed and seeking employment, or involved in a labor-management dispute. The labor force does not include persons who never worked a full-time job lasting two weeks or longer and “discouraged workers” who have been unemployed for a substantial length of time and are no longer actively seeking employment. Members of the armed forces stationed either in the United States or abroad are counted by their place of residence. The civilian labor force excludes members of the armed forces and the institutionalized population.

Labor Force Participation Rate: The proportion of the total civilian non-institutional population or of a demographic subgroup of that population classified as “in the labor force.”

Labor Market Area (LMA): As defined by the U.S. Bureau of Labor Statistics, an economically integrated geographic area within which individuals can reside and find employment within a reasonable distance or can readily change employment without changing their place of residence.

Labor Market Information (LMI): The body of information that deals with the functioning of labor markets and the determination of the demand for and supply of labor. It includes, but is not limited to, such key factors as changes in the level and/or composition of economic activity, the population, employment and unemployment, income and earnings, wage rates, and fringe benefits.

Labor Surplus Area: A civil jurisdiction where the average unemployment rate is at least 20 percent above the average unemployment for all states, or its unemployment during the previous two calendar years was ten percent or more. The designation allows establishments in the area preference in bidding for certain federal contracts.

Location Quotients: Measures an industry’s concentration or specialization in one geographical area relative to a larger area (also see *Employment Concentration*).

Manufacturing: Includes establishments engaged in the mechanical or chemical transformation of materials or substances into new products. These establishments are usually described as plants, factories, or mills and characteristically use power-driven machines and materials handling equipment. The new product of a

manufacturing establishment may be “finished” in the sense that it is ready for utilization and consumption, or it may be “semi-finished” to become a raw material for an establishment engaged in further manufacturing.

Median: The middle value or midpoint between two middle values in a set of data arranged in order of increasing or decreasing magnitude. As such, one-half of the items in the set are less than the median and one-half are greater.

Median Income: The median divides the income distribution into two equal parts: one-half of the cases falling below the median income and one-half above the median. For households and families, the median income is based on the distribution of the total number of households and families, including those with no income.

Metropolitan Statistical Area (MSA): The general concept of a Metropolitan Statistical Area is one of a large population nucleus, together with adjacent communities which have a high degree of economic and social integration with that nucleus. Connecticut currently has seven Metropolitan Statistical Areas, as defined by the federal Office of Management and Budget.

Money Income: Census-based money income is derived from a sample of individuals 15 years of age and older, and consists only of income that is received by individuals in cash and its equivalents.

Nondurable Goods: Items that generally last for only a short period of time (three years or less). Food, beverages, apparel, and gasoline are common examples. Because of their nature, nondurable goods are generally purchased when needed.

Nonfarm Employment: The total number of persons on establishment payroll employed full- or part-time who received pay for any part of the pay-period which includes the 12th day of the month. Temporary and intermittent employees are included, as are any workers who are on paid sick leave, on paid holiday, or who work during only part of the specified pay period. A striking worker who only works a small portion of the survey period, and is paid, is included. Persons on the payroll of more than one establishment are counted in each establishment. Data exclude proprietors, self-employed, unpaid family or volunteer workers, farm workers, and domestic workers. Persons on layoff the entire pay-period, on leave without pay, on strike for the entire period or who have not yet reported for work are not counted as employed.

Occupation: A name or title of a job that identifies a set of activities or tasks that employees are paid to perform. Employees that perform essentially the same tasks are in the same occupation, whether or not they are in the same industry. Some occupations are concentrated in a few particular industries, other occupations are found in the majority of industries.

Part-Time Employment: As defined by the U.S. Bureau of Labor Statistics, employment in which a worker is regularly scheduled to work fewer than 35 hours a week.

Per Capita Personal Income: The annual total personal income of residents divided by resident population as of July 1st of current year.

Personal Income: Measures the net earnings, rental income, personal dividend income, personal interest income, and transfer payments by place of residence before the deduction of personal income taxes and other personal taxes. Reported in current dollars.

Private Household Workers: Persons who work for profit or fees in private households such as child care workers, cooks, housekeepers or other household staff.

Production Worker: Employees, up through the level of working supervisor, who are directly engaged in the manufacture of the product of an establishment. Among those excluded from this category are persons in executive and managerial positions and persons engaged in activities such as accounting, sales, advertising, routine clerical work, and professional and technical functions.

SAGA (State-Administered General Assistance): Provides cash, medical, and emergency assistance to persons who do not qualify for federal and state assistance programs, such as Supplemental Security Income (SSI), Temporary Family Assistance (TFA), and Medicaid.

Seasonal Adjustments: The adjustment of time-series data to eliminate the effect of intra-year variations that tend to occur each year in approximately the same manner. Examples of such variations include school terms, holidays, and yearly weather patterns.

Seasonal Industry: An industry in which activity is affected by regularly recurring weather changes, holidays, vacations, etc. The construction and recreational industries are typically characterized as “seasonal.”

Self-Employed Workers: Persons who work for profit or fees in their own business, profession, trade, or farm. Self-employed persons whose businesses are incorporated are included among wage and salary workers, because technically, they are paid employees of a corporation.

Underemployed: Persons working full- or part-time in jobs that are below their earning capacity or level of competence. The terms “underemployed” and “underutilized” are used interchangeably. Underemployment has also been defined as “involuntary part-time” employment or employment of a person on a part-time basis when full-time work is desired.

Unemployed: Persons who, during the survey week, had no employment but were available for work and: (a) had

engaged in any specific job-seeking activity within the past four weeks, such as registering at a public or private employment office, meeting with prospective employers, checking with friends or relatives, placing or answering advertisements, writing letters of application, or being on a union or professional register; (b) were waiting to be called back from a job from which they had been laid off; or (c) were waiting to report to a new wage or salary job within 30 days.

Unemployment Rate: Represents the number unemployed as a percent of the labor force. The seasonally adjusted unemployment rate eliminates the influence of regularly recurring seasonal fluctuations which can be ascribed to weather, crop-growing cycles, holidays, vacations, etc., and therefore, more clearly shows the underlying basic trend of unemployment.

Units: (see *Establishment*)

Workforce Investment Act (WIA) of 1998: Represents significant changes to federal statutes governing programs of job training, adult education and literacy, and vocational rehabilitation in order to establish a coordinated, streamlined and more flexible workforce development system. It is a revitalized system that focuses on providing *employers* with skilled workers, and the economic and workforce information they need to conduct business effectively - and on providing *workers* with the information, advice, job search assistance, and training they need to get and keep good jobs.

Worksite: A worksite is an economic unit, generally at a single physical location, where business is conducted or where services or industrial operations are performed (e.g. factory, mill, store, hotel, restaurant).
