INTRODUCTION

The Connecticut Occupational Statistics provides occupational data from the Bureau of the Census Equal Employment Opportunity (EEO) Special Tabulation from the 2000 Census. Data is presented for 471 occupations according to the gender and race or Hispanic Origin of those persons in the civilian labor force. This data is also available on the Connecticut Department of Labor's website at:

www.ctdol.state.ct.us/lmi.

Although the report will have many uses both now and in the future, the primary use will be for affirmative action planning for both public and private sectors. The Commission on Human Rights and Opportunities (CHRO) has the responsibility for making EEO data available to State agencies for the purpose of affirmative action planning as required under the provisions of State law. The Department of Labor has the responsibility for making EEO data available to all private sector employers who have contracts with the federal, state, local, or quasi-governmental entities for the purpose of affirmative action planning as required under Federal law. With few exceptions, all organizations that receive Federal or State funds must prepare an Affirmative Action Plan. The data in this document will provide most of the base data necessary to complete such plans.

This report consists of two volumes, each covering a certain geographic portion of the state (see Geographic Coverage). The geographic data used from the 2000 Special EEO Tabulation consists of data for the State of Connecticut, the eight counties, Primary Metropolitan Statistical Areas and Metropolitan Statistical Areas within Connecticut.

GEOGRAPHIC COVERAGE

The 2000 Special EEO Tabulation which was the source for this report has data available for the State of Connecticut, its eight counties, Primary Metropolitan Statistical Areas (PMSA's) and Metropolitan Statistical Areas (MSA's).

There are 16 different geographical areas within Connecticut for which EEO data is available. The Connecticut Occupational Statistics presents this data in two volumes that cover the following sections of the state:

Volume 1 - Western Connecticut

Volume 2 - Eastern Connecticut

Each volume contains a statewide summary and data for the covered counties, PMSA's, and MSA's in that section of Connecticut.

The specific areas covered in each volume are as follows:

<u><i>Volume 1</i></u>	<u><i>Volume 2</i></u>
State of Connecticut	State of Connecticut
Fairfield County	Hartford County
Litchfield County	Middlesex County
New Haven County	New London County
Bridgeport MSA	Tolland County
Danbury MSA	Windham County
New Haven/Meriden MSA	Hartford MSA
Stamford/Norwalk MSA	New London/Norwich CT-RI MSA
Waterbury MSA

APPENDIX A

OCCUPATIONAL SYSTEM

Occupational Data & Occupational Groups - Census 2000 Special EEO Tabulation

The Census 2000 Special EEO Tabulation occupational groupings began with 509 unique categories from the Standard Occupational Classification - O*NET-SOC system. These data were adjusted as follows: (a) 35 categories with fewer than 10,000 employed nationwide were aggregated into larger categories, so that all occupational categories shown on the EEO File will be greater than 10,000; (b) four military specific occupations were excluded; and (c) one category was added for the unemployed with no work experience since 1995. When the unemployed with no work experience since 1995 (Census Code 992) are added to the 471 occupational categories, there are 472 occupational categories.

A list of codes and titles are presented below for the 14 EEO Occupational Groups for the 2000 Special EEO Tabulation.

EEO Occupational Groups and Titles for the Census 2000 Special EEO Tabulation

EEO Occupational Codes	EEO Occupational Group Titles for the Special EEO Tabulation
1	Management, Business and Financial Workers
2	Science, Engineering and Computer Professionals
3	Healthcare Practitioner Professionals
4	Other Professional Workers
5	Technicians
6	Sales Workers
7	Administrative Support Workers
8	Construction and Extractive Craft Workers
9	Installation, Maintenance and Repair Craft Workers
10	Production Operative Workers
11	Transportation and Material Moving Operative Workers
12	Laborers and Helpers
13	Protective Service Workers
14	Service Workers, except Protective

APPENDIX B

RACE / NATIONAL ORIGIN

The racial categories in this publication will be:

White Non-Hispanic
Black Non-Hispanic
Hispanic In Any Race
Other Races

Other Races include:

American Indian/Alaskan Native (AIAN) Non-Hispanic
Asian Non-Hispanic
Native Hawaiian/Other Pacific Islander (NHOPI), Non-Hispanic
AIAN and White Non-Hispanic
AIAN and Black Non-Hispanic
Asian and White Non-Hispanic
Balance 2+ Races, Non-Hispanic

The concept of race as used by the Census Bureau reflects self-identification; it does not denote any clear-cut scientific definition of biological stock. The data for race represent self-classification by people according to the race with which they most closely identify. Furthermore, it is recognized that the categories of the race item include both racial and national origin or socio-cultural groups. Origin can be viewed as the ancestry, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. Persons of Hispanic origin may be of any race. The categories are defined below.

WHITE - A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as "White" or report entries such as Irish, German, Portuguese, Italian, Lebanese, Near Easterner, Arab, or Polish.

The category is defined by the White Non-Hispanic category, i.e., from the above-presented Race and Ethnicity for Other than Hawaii specifications; this is White, Non-Hispanic.

BLACK - A person having origins in any of the Black racial groups of Africa. It includes people who indicate their race as "Black, African Am., or Negro," or provide written entries such as African American, Afro-American, Kenyan, Nigerian, or Haitian. Combining the Black, Non-Hispanic category with the Black and White Non-Hispanic category, i.e. creates the category, combine Black, Non-Hispanic with Black and White Non-Hispanic.

HISPANIC - The category is created by combining all Hispanics, as was done in previous versions of the EEO File, i.e., from the above-mentioned specifications, add White, Hispanic; Black, Hispanic; and Other Hispanic.

OTHER - The category is created from the remaining categories, i.e. Balance 2+ Races, from the specifications for Race and Ethnicity for:

American Indian or Alaska Native -

American Indian: This category includes people who indicated their race as “American Indian,” entered the name of an Indian tribe, or reported such entries as Canadian Indian, French American Indian, or Spanish American Indian.

Alaska Native. This category includes written responses of Eskimos, Aleuts, and Alaska Indians as well as entries such as Arctic Slope, Inupiat, Upik, Alutiiq, Egegik, and Bribilovian. The Alaska tribes are the Alaskan Athabascan, Tlingit, and Haida. The information for Census 2000 is based on the American Indian Tribal Classification List for the 1990 census, which was expanded to list the individual Alaska Native Villages when provided as a written response for race.

The AIAN category is created by combining the American Indian or Alaska Native, Non-Hispanic category with the American Indian or Alaska Native and White, Non-Hispanic category, i.e., from above-cited specifications, add American Indian or Alaska Native Non-Hispanic to American Indian or Alaska Native and White Non-Hispanic.

Asian - A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. It includes “Asian Indian,” “Chinese,” “Filipino,” “Korean,” “Japanese,” “Vietnamese,” and “Other Asian.”

The Asian category is created by combining the Asian, Non-Hispanic category with the Asian and White, Non-Hispanic category, i.e., from the Race and Ethnicity for Other than Hawaii specifications, add Asian, Non-Hispanic to Asian and White, Non-Hispanic.

Native Hawaiian or Other Pacific Islander - A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. It includes people who indicate their race as “Native Hawaiian,” “Guamanian or Chamorro,” “Samoan,” and “Other Pacific Islander.”

The NHOPI category is defined by the Native Hawaiian or Other Pacific Islander, Non-Hispanic category, i.e., from the Race and Ethnicity for Other than Hawaii specifications, this is Native Hawaiian or Other Pacific Islander Non-Hispanic. Other than Hawaii, combine American Indian or Alaska Native and Black, Non-Hispanic.

Balance 2+ Races - Balance of individuals reporting more than one race Non-Hispanic plus individuals reporting some other race, Non-Hispanic.

People may have chosen to provide two or more races either by checking two or more race response check boxes, by providing multiple write-in responses or by some combination of check boxes and write-in responses. The race response categories shown on the questionnaire are collapsed into the five minimum races identified by the OMB, and the Census Bureau "Some other race" category. For data product purposes, "Two or more races" or "Balance 2+ Races" refers to combinations of two or more of the following race categories:

1. White
2. Black or African American
3. American Indian and Alaska Native
4. Asian
5. Native Hawaiian and Other Pacific Islander
6. Some other race

There are 57 possible combinations involving the race categories shown above. Thus, according to this approach, a response of "White" and "Asian" was tallied as two or more races, while a response of "Japanese" and "Chinese" was not because "Japanese" and "Chinese" are both Asian responses. When this data presentation is used, the individual race categories will add to more than the total population because people may be included in more than one category. In this publication, these are displayed as **OTHER**.

Comparability

The data on race in Census 2000 are not directly comparable to those collected in previous censuses. The October 1997 revised standards issued by the OMB led to changes in the question on race for Census 2000. The Census 2000 Dress Rehearsal data were the first to reflect these changes. First, respondents were allowed to select more than one category for race. Secondly, the sequence of the questions on race and Hispanic origin changed. Third, there were terminology changes to the response categories, such as spelling out "American" instead of "Amer." For the American Indian or Alaska Native category, and adding "Native" to the Hawaiian response category. The 1990 category, "Other race," was renamed "Some other race." Other differences that may affect comparability involve the individual categories on the Census 2000 questionnaire. The 1990 category, "Asian and Pacific Islander," was separated into two categories, "Asian" and "Native Hawaiian and Other Pacific Islander" for Census 2000.

Accordingly, on the Census 2000 questionnaire, there were seven Asian categories and four Native Hawaiian and Other Pacific Islander categories. The two residual categories, "Other Asian" and "Other Pacific Islander," replaced the 1990 single

category “Other API.” The 1990 categories, “American Indian,” “Eskimo,” and “Aleut,” were combined into “American Indian and Alaska Native.” American Indians and Alaska Natives can report one or more tribes.

Hispanic Or Latino

The data on the Hispanic or Latino population, which was asked of all people, were derived from answers to long-form questionnaire Item 5, and short-form questionnaire Item 7. The terms “Spanish,” “Hispanic origin,” and “Latino” are used interchangeably. Some respondents identify with all three terms, while others may identify with only one of these three specific terms. Hispanics or Latinos who identify with the terms “Spanish,” “Hispanic,” or “Latino” are those who classify themselves in one of the specific Hispanic or Latino categories listed on the questionnaire – “Mexican,” “Puerto Rican,” or “Cuban” – as well as those who indicate that they are “other Spanish, Hispanic, or Latino.”

Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person’s parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

Some tabulations are shown by the origin of the householder. In all cases where the origin of households, families, or occupied housing units is classified as Spanish, Hispanic, or Latino, the origin of the householder is used.

If an individual could not provide a Hispanic origin response, their origin was assigned using specific rules of precedence of household relationship. For example, if origin was missing for a natural-born daughter in the household, then either the origin of the householder, another natural-born child, or the spouse of the householder was assigned. If Hispanic origin was not reported for anyone in the household, the origin of a householder in a previously processed household with the same race was assigned. As opposed to the procedure used in 1990, in Census 2000 race and Spanish surnames were used to assist in assigning an origin.

Comparability - Hispanic Origin

There are two important changes to the Hispanic origin question for Census 2000. First, the sequence of the race and Hispanic origin questions for Census 2000 differs from that in 1990; in 1990, the race question preceded the Hispanic origin question. Testing before Census 2000 indicated that response to the Hispanic origin question could be improved by placing it before the race question without affecting the response to the race question. Second, there is an instruction preceding the Hispanic origin question indicating that respondents should answer both the Hispanic origin and the race questions. This instruction was added to give emphasis to the distinct concepts of the Hispanic origin and race questions and to emphasize the need for both pieces of information.

In 1990, the Hispanic origin question and the race question had separate edits; therefore, although information may have been present on the questionnaire, it was not fully utilized due to the discrete nature of the edits. However, for Census 2000, there was a joint race and Hispanic origin edit which for example, made use of race responses in the Hispanic origin question to impute a race if none was given.

APPENDIX C

AGE and GENDER

AGE

The data on age, which was asked of all people, were derived from answers to the long-form questionnaire Item 4 and short-form questionnaire Item 6. The age classification is based on the age of the person in complete years as of April 1, 2000. The age of the person usually was derived from their date of birth information. Their reported age was used only when date of birth information was unavailable.

Data on age are used to determine the applicability of some of the sample questions for a person and to classify other characteristics in census tabulations. Age data are needed to interpret most social and economic characteristics used to plan and examine many programs and policies. Therefore, age is tabulated by single years of age and by many different groupings, such as 5-year age groups.

GENDER

The data on gender, which was asked of all people, were derived from answers to long-form questionnaire Item 3 and short-form questionnaire Item 5. Individuals were asked to mark either “male” or “female” to indicate their gender. For most cases in which gender was not reported, it was determined from the person’s given (i.e., first) name and household relationship. Otherwise, gender was imputed according to the relationship to the householder and the age of the person.

APPENDIX D

AREA CLASSIFICATIONS

COUNTY

The primary legal divisions of most states are termed “counties.” Each county and statistically equivalent entity is assigned a three-digit Federal Information Processing Standards code that is unique within each state. These codes are assigned in alphabetical order of county or county equivalent within each state, except for the independent cities, which are assigned codes higher than and following the listing of counties.

METROPOLITAN AREA

The general concept of a metropolitan area (MA) is one of a large population nucleus, together with adjacent communities that have a high degree of economic and social integration with that nucleus. Some MA's are defined around two or more nuclei. The MA's and the central cities within an MA are designated and defined by the Federal Office of Management and Budget, following a set of official standards that are published in a Federal Register Notice. The interagency Federal Executive Committee developed these standards on Metropolitan Areas, with the aim of producing definitions that are as consistent as possible for all MA's nationwide.

Each MA must contain either a place with a minimum population of 50,000 or a U.S. Census Bureau-defined urbanized area and a total MA population of at least 100,000 (75,000 in New England). In New England, MA's consist of groupings of cities and county subdivisions (mostly towns) rather than whole counties.

To meet the needs of various users, the standards provide for a flexible structure of metropolitan definitions that classify each MA either as a Metropolitan Statistical Area (MSA) or as a Consolidated Metropolitan Statistical Area (CMSA) divided into Primary Metropolitan Statistical Areas (PMSA).

CONSOLIDATED AND PRIMARY METROPOLITAN STATISTICAL AREAS (CMSA & PMSA)

If an area that qualifies as a Metropolitan Area (MA) has 1 million people or more, two or more PMSA's may be defined within it. Each PMSA consists of a large urbanized county or cluster of counties (cities and towns) that demonstrate very strong internal economic and social links, in addition to close ties to other portions of the larger area. When PMSA's are established, the larger MA of which they are component parts is designated a CMSA.

METROPOLITAN STATISTICAL AREA (MSA)

Metropolitan Statistical Areas (MSA's) are Metropolitan Areas (MA's) that are not closely associated with other MA's. Non-metropolitan counties (county subdivisions in New England) typically surround MSA's.

APPENDIX E

ROUNDING and CONFIDENTIALITY

ROUNDING

Effects of Required Rounding:

The Census Bureau's internal Disclosure Review Board (DRB) is responsible for reviewing specifications for all census data products, and determining that no product format is approved that contains any degree of disclosure risk. To meet the DRB's disclosure avoidance standards, the Special EEO Tabulation was created using approved rounding rules that are described in the Confidentiality section of this appendix. Basically, all counts in these files are rounded.

Specifically, in the EEO residence and worksite files, each occupational group contains combinations of characteristics that are individually rounded (for example, the gender - race group variables in file # 1, such as White non-Hispanic males) and also a total civilian labor force variable that was constructed based on the unrounded total and was then rounded (named "total" on the files). This approach provides users with occupational group totals that are closer to the actual unrounded estimates. However, the total civilian labor force value may not equal the sum of the individually rounded characteristic variables for each occupational group. (This rounding procedure occurs for each observation in the file; for example, each geographic unit's occupational group.) In addition, the totals for a particular summary level of geography (state) will likely not equal the sum of the geographies within that summary level (counties).

In the EEO worksite/residence (also known as workflow) files, the rounding of the total number of people employed at work occurs for each observation in the file, which is a combination of occupational groups by race and by gender for every place of work by place of residence occurrence. Some totals may not agree between files for the same geographic areas and/or occupational groups, because of rounding of estimates.

Data from the Special EEO Tabulation will not agree with estimates from other Census 2000-based products (such as Summary Files 3 and 4) because of universe difference and rounding. Use published SF-3 and SF-4 data products to obtain estimates of the total civilian labor force, total number of employed, or high-level

occupational groups for the civilian employed population. The Special EEO Tabulation gives users access to more detailed occupational group data.

CONFIDENTIALITY

In preparing to publish data from Census 2000, the Census Bureau became extremely concerned that with the emergence of advanced computer technology that decodes information for areas by combining extremely detailed characteristics such as occupations with small geographic units, the possibility of revealing information on individual respondents would be greatly enhanced.

In 1997 the Office of Management and Budget (OMB) rescinded Statistical Policy Directive Number 15 (1977), covering the publication and use of data covering race and ethnicity. Based on OMB's Revised Standards (1997), the Special EEO Tabulation presents data for 12 race/ethnicity groups instead of six, including several dual-race combinations, such as Black/White and Black/Asian, among others

These expanded race/ethnicity distinctions, combined with the increased ability to electronically match different data files, prompted the Census Bureau's Disclosure Review Board (DRB) to issue two rules in 2000 affecting the Census 2000 Special EEO Tabulation.

1. Any occupational category containing fewer than 10,000 people employed nationwide cannot be shown separately, and must be combined with related occupational categories to create aggregates containing 10,000 or more people.
2. Detailed occupational categories, when cross-tabulated by the 14 race/ethnicity categories, cannot be shown for any geographic area containing fewer than 50,000 people. Geographic areas containing fewer than 50,000 people must be combined in such a way that the resulting aggregation:
 - a. Contains 50,000 or more people, **and**
 - b. The subtraction of any geographic subset from a larger, combined area does not reveal information for any area containing fewer than 50,000 people.
